PRESIDENT'S MESSAGE

Adaptations for a Changing Association

Alice Brown

This year's conference theme suggested that the world is changing and Appalachia is adapting to those changes. Certainly the world is changing; whether Appalachia is adapting may be open to question. My major concern during this year, as president of the ASA, will not be how Appalachia is changing to adjust to national and international situations, but how the Association is changing to adjust to those factors which are affecting it.

First, while we are only slightly bigger in numbers of members, our conference registrations have brought an increasing amount of dollars to the Association. In 1987-88, when I was treasurer, the income from the conference was \$9,090; the last figure available for our immediate past conference was that income was expected to be close to \$22,000. These numbers reflect some increase in participation, but mainly they reflect increases in costs, necessitating increases in registration fees. While our profit margin remains nominal—the fact is that we are rapidly approaching the magic number—\$25,000—at which “the IRS requires annual informational returns.” While they may not require the organization to pay taxes, the ASA will be subject to scrutiny in a way that it has not been in the past.

Second, while the topics addressed at the conferences have changed little, the numbers of papers submitted for presentation and the numbers selected have increased. There is more competition for a place at the presentation table. There is, as a result, greater need for clearly defined criteria for selection of presenters.

Third, while we have maintained much of the sense of family, or at least community, in the association, we have increasingly sought—and found—greater public visibility. We have said we want a voice that can address the national stereotyping and politicizing of the region. We cannot seek a greater voice and speak in whispers. We must invite not only our neighbors to join us—but the national audiences as well. In seeking this increased public image, we will encourage greater public scrutiny—a scrutiny which will examine not only our strong philosophies but also our governance by “adhocracy.”

All of these changes have the potential to lead the association to the last place most of us want to see it go—to a bureaucratic organizational structure. The task before the officers and steering committee and anyone else willing to participate in the discussions is to find a way to capture that sense of ownership that those involved with the association have had since its inception—that willingness to contribute unselfishly to the association's efforts—at the same time we protect it—and ourselves—from the potential for a financial catastrophe or a philosophical upheaval. We can never escape debate or disagreement over what is most or least important or desirable. We can, however, collaborate to strengthen the base of the association—its philosophy and its financial and organizational base.

The surveys that were distributed at our last conference were a part of our efforts to determine what it is that is most valued about our relationships and how well we are succeeding at protecting those values. This newsletter contains a tally of the results of the survey on the association itself. The results of the survey related to the conference will be distributed to the committee planning the conference for 1994. The surveys are only the starting point. Continuing discussion and gatherings are necessary. With a sixteen-year history and a growing (ever-so-slightly) membership, there is little doubt that the Appalachian Studies Association will continue. Our goal is to see that the base on which we continue is as strong as our ideals.
