Seminars focus on changing travel policies

The MU Accounting Office has worked with a Total Quality Management Team to develop new university procedures for implementing travel policies issued by the Higher Education Central Office, according to Larry Barnhill, director of accounting.

Policy changes released by the Higher Education Central Office were incorporated into existing university procedures as they became available. Some of the changes already made include revised meal allowances and changes to miscellaneous receipt-

ing requirements. Other changes that have occurred include a contract with AAA to provide travel services for the university and changing the corporate travel card provider to Diner's Club.

New policies allow for more flexibility in the processing of travel requests. The new travel procedures replace all previous travel regulations and take effect May 1.

Highlights of the new procedures include:

—Advance approval through the university Accounting Office is only required for direct billing of airfare, registration fees and lodging;

—If the traveler pays for all expenses and seeks reimbursement after the fact, required receipts can be attached directly to the expense account settlement form to be submitted for payment by the Accounting Office without the need to complete other forms;

—Forms previously issued by the state have been revised to enable the creation of any required forms by computer programs.

University travel policy manuals have been distributed to each vice president and dean. A copy also is on file in the Accounting Office, Old Main Room 201, and the AAA Office. Travel procedure manuals also have been distributed to directors and department chairs.

Two travel-related training sessions have been scheduled on Tuesday, May 6, in the Memorial Student Center Alumni Lounge. The first session from 9:30 to 10:30 a.m. will be on the state's corporate travel card program. The MU Accounting Office will conduct training on the new travel forms from 11 a.m. to 1 p.m. Representatives from AAA will be available at both sessions to answer questions about the University Travel Center. A light lunch will be available during the second session.

Reservations will be required for the second session. To make reservations or obtain further details contact the Marshall Accounting Office, 696-6488.

Suggestions for making improvements to the travel procedures can be sent to Barnhill in the Accounting Office or Dr. Gary Saunders in the College of Business.

McCarty named director

Dr. Sarah A. McCarty has been named director of generalist preclinical education for the Marshall University School of Medicine.

The new position will strengthen Marshall's efforts to prepare medical students for clinical practice, especially in primary care, even during the classroom years, said Dr. Patrick I. Brown, associate dean for academic and student affairs.

"We're seeking the optimum way to integrate and sequence the early patient-related courses with the crucial foundation courses such as pathology and physiology," he said. "We want to create a better educational experience for students."

McCarty, a professor of medicine, has been a leader since 1993 in Marshall's Interdisciplinary Generalist Curriculum project. She is a member of the School of Medicine Curriculum Committee, Clinical Coordinating Committee and Admissions Committee.

She received her undergraduate and medical degrees from the University of Vermont, then did her residency in internal medicine at Marshall.

New ESLI program set

A new program will be offered at Marshall University this fall for people interested in teaching English to international students.

The Teaching English to Speakers of Other Languages (TESOL) Certificate Program will be presented by Marshall's English as a Second Language Institute (ESLI).

The program provides 100 hours of formal training, teaching practice and classroom observation, according to Clark Egnor, ESLI director.

Applicants should be full-time students at the senior or graduate level, possess fluency in English and have experience studying another language (other than English). Up to six hours of undergraduate or graduate credit can be earned by successfully completing the program.

"Admission is selective and only 10 students will be chosen each semester," said Egnor.

The deadline for submitting applications is May 10. To obtain further details contact Egnor, 696-6265.

Employee achievements

Dr. VICTOR FET, assistant professor in the Department of Biological Sciences, was awarded a Project Development Grant through the COBASE (Collaboration in Basic Science and Engineering) grants program of the National Research Council's (NRC) Office for Central Europe and Asia. FET, who is an expert on biodiversity and environment of Central Asia, will travel to the Republic of Turkmenistan by the invitation of the local government and Academy of Sciences to work with Turkmen scientists on a biodiversity database.

Dr. PATRICIA BROCE, associate professor; Dr. WILLIAM J. RADIG, professor; NEAL G. ADKINS and ROBERT F. GODFREY, associate professors, and JOSEPH STONE, professor, all members of the Division of Accountancy and Legal Environment, had an article titled "Change the Teaching of Depreciation" published in the April/May issue of The West Virginia CPA (West Virginia Society of Certified Public Accountants).

Dr. GARY O. RANKIN, KELLY W. BEERS, VONDA J. TEETS and DIANNE K. ANESTIS of the Department of Pharmacology at the School of Medicine and Derek W. Nicoll had a paper titled "Buthionine sulfoximine (BSO) and N-(3,5-dichlorophenyl)succinimide nephrotoxicity: temporal aspects of BSO administration and BSO effects on renal transport systems" published in Toxicology (117: 1997, pp. 207-217).

Four retiring from MU Chemistry Department

Four veteran faculty members in Marshall University's Department of Chemistry have announced their retirements, according to Dr. Sarah Denman, vice president for academic affairs.

Dr. James E. Douglass, Dr. Edward S. Hanrahan, Dr. Chang L. Kong and Dr. Joseph L. Roberts all have announced plans to retire by the end of May or June.

Douglass joined the Marshall faculty in 1965 and served as chair of the Chemistry Department from 1977 to 1982.

He received his bachelor's degree from Rice University and his doctoral degree from the University of Texas at Austin. Between earning his degrees, he served three years as a Naval officer during the Korean War. He was a postdoctoral fellow at Yale University.

Prior to joining the Marshall faculty, he taught at the Univer-

sity of Kentucky.

Douglass has had 25 papers published in professional magazines and journals and received 10 research grants. He has served on many committees during his tenure at Marshall and supervised 30 master's degree students and directed the research of 26 undergraduate students.

(Continued on page 2)

Jarrell retiring from CTC effective June 1

Dr. Betty Joan Jarrell, professor and chair of the Business, Computer, Office Technology and Applied Science Technology departments in Marshall University's Community and Technical College has announced her retirement effective June 1.

A native of Huntington, Jarrell received a bachelor's degree in business education in 1971 and a master's degree in business administration in 1975, both from Marshall. She received her

doctorate in higher education administration from West Virginia University.

Prior to joining the Community and Technical College faculty in 1977, Jarrell taught business education at Ceredo-Kenova High School and served as coordinator of business education cooperative education programs for the Wayne County Board of Education. She also was a part-time marketing instructor in Marshall's College of Business. She had several years of experience in the legal and business fields before entering her academic career.

Jarrell is a certified public accountant and member of the American Institute of Certified Public Accountants and the West Virginia Society of CPAs. She is a past president of the Huntington chapter of CPAs and was the first woman to serve as director of the Ohio Valley Accountants Association.

She is a member and past director of the West Virginia Community College Association and received that organization's Outstanding Service Award. She is a member of the West Virginia Vocational Advisory Board and was honored by that group as Outstanding Postsecondary Vocational Educator. She was commended by the IRS for presenting educational tax programs in the community and received a service award from Hospice of Huntington.

She has served on many committees and task forces at Marshall and has written several papers for professional jour-

Jarrell

Osburn receives honor

Richard "Dale" Osburn of Huntington, manager of building trades in the Plant Operations Division, has been selected as the Marshall University Employee of the Month for April, according to Bill Burdette, chairman of the selection committee.

Osburn has worked for the university for 17 years.

He was nominated for the award by Nanna B. Gilley who with her husband, Marshall University President J. Wade Gilley, provided funds through a grant to establish the Employee of the Month and Employee of the Year program.

In making the nomination, Mrs. Gilley said, "Dale Osburn takes the responsibilities and duties of his job seriously and has a sincere desire to keep Marshall University property looking cared for and well maintained. He follows up on work in progress and work completed.

Osburn

Four retiring from MU Chemistry Department

(Continued from page 1)

Hanrahan joined the Marshall faculty in 1963 and served as chair of the Chemistry Department from 1967 to 1977 when he was named the first dean of the newly formed College of Science. He served as dean until 1994 when he returned to the department as a distinguished professor of chemistry.

He received his bachelor's degree from the University of Mississippi and his doctorate from West Virginia University. He also served as an officer in the Navy for three years between degrees.

Prior to joining the Marshall faculty, Hanrahan worked at DuPont as a research chemist.

Jarrell retiring June 1

nals and publications. She also has made presentations at numerous seminars and workshops throughout the area.

Jarrell was responsible for developing the curriculum for her program areas and received a number of grants during her tenure at the university.

"Dr. Jarrell has been a tremendous asset to Marshall University and the Community and Technical College," said Dr. Sarah Denman, vice president for academic affairs at

Marshall. "She has been instrumental in developing programs and curricula to help us meet the changing needs of our students and the changing focus of the Community and Technical College."

New publication lists Marshall as 'Best Buy'

Marshall University has been named to a list of the top 100 best college buys in the United States by a new publication that rates America's colleges and universities.

"The Student Guide to America's 100 Best College Buys" profiles the schools that are the highest rated academically but have the lowest total cost for the college year.

Compiled by Institutional Research and Evaluation in Gainesville, Ga., the guide not only lists the 100 best buys, it gives complete information on each one including cost, sources of financial aid, majors offered and information on campus life.

The company researched almost 1,800 colleges, according to John Culler, publisher. "Our research has shown that a prospective student could save \$30,000 to \$50,000 or more on a quality education," said Culler. "A prospective student should never pick a college without first doing serious comparison shopping for cost and quality. If that is done, the schools in this book will win every time."

To be considered for "America's 100 Best College Buys," a college must meet very specific requirements. It must be an accredited, four-year institution; offer full residential facilities including residence halls and dining services; offer opportunities to qualified students for need-based, academic-based and athletic-based financial aid; have an entering freshman class with a high school grade point average and SAT or ACT score above the national average, and the cost of attendance must be below the national average.

Hanrahan is the author of 17 papers published in professional journals. He participated in a number of committees while at Marshall and directed eight master's degree students. As dean of the College of Science, he was instrumental in the construction of the Science Building Addition and the renovation of the Science Building.

Kong has been a member of the Marshall faculty since 1967.

He received his bachelor's and master's degrees from Seoul National University in Korea. He then came to the United States and completed master's and doctoral degrees at St. Louis University.

Kong has had 14 articles published in professional journals and magazines and participated in a number of conferences and seminars. During his tenure at Marshall, Kong has directed five master's degree students.

His research interests have included the application of statistical thermodynamics to the problems of chemistry, experimental and theoretical studies of the thermodynamic properties of liquids and the study of intermolecular forces.

Roberts received his bachelor's degree from Oglethorpe College, his master's degree from the University of South Dakota and his doctorate from the University of Cincinnati.

While working on his Ph.D., he was employed as a research chemist/biophysicist at the Medical Center of the University of Cincinnati.

He joined the Marshall faculty in 1966 and has been involved in many university functions. He directed studies for three master's degree students and has had approximately 20 papers published in professional journals and magazines.

As a result of his interest in fire safety and the proper handling of hazardous materials, Roberts has served as adviser for a number of area fire departments. He served as chair of the Department of Chemistry's Safety Committee for many years.

Roberts played string bass for the Atlanta Symphony while in high school and college and performed in several other musical groups. He has been involved in various community organizations including the Boy Scouts and the Huntington Glass Club.

"We are going to miss these professors in the Department of Chemistry," said Denman. "They have, in large part, been the backbone of the department for a number of years and will most certainly be missed. It is somewhat unusual for this many professors from one department to retire at the same time but their long tenures at the university are indicative of the loyalty and professionalism found in the Marshall faculty."

Osburn receives honor

(Continued from page 1)

"He is always well-groomed, polite and courteous and is a good representative of the university to the Huntington community. He is a loyal employee and takes great pride in all that Marshall University stands for."

Osburn will receive a plaque and \$100 for being named Employee of the Month and will be eligible for the Employee of the Year Award.

The program has been designed to recognize outstanding performance by classified and non-classified staff at the university.

Awards will be made to MU employees who have exhibited exceptional levels of work performance and displayed high regard and loyalty toward the university and their job responsibilities.

Alumnae will be honored by Graduate School

Marshall University's Graduate School will present Distinguished Alumna awards to Sandy G. McGovern, president of the National Geographic Channel, and Sara S. Chapman, a fellow in the Radcliffe Public Policy Institute at Harvard University, during the school's Graduate Hooding Ceremony Friday, May 9, at 4 p.m. in the Huntington City Hall Auditorium.

McGovern received a bachelor's degree in education and a master's degree in counseling from Marshall in 1972 and did post-graduate studies at West Georgia College. She was named the first president of the National Geographic Channel (NGC) March 3. A newly created joint venture between National Geographic Television and NBC, NGC will offer branded channels in Europe, Latin America and Asia.

McGovern began her career as a teacher and counselor in West Virginia, Maryland and Georgia prior to accepting a position with Xerox Corporation in Atlanta. In 1980 she was named regional director for Rainbow Programming Services Company in Atlanta and later was promoted to vice president of field operations.

She then became vice president of affiliate sales and marketing for the Weather Channel in Atlanta. In 1987 she joined the Discovery Channel as senior vice president of affiliate sales and relations, overseeing the distribution of Discovery subscribership as it grew from 16 million that year to 59 million in 1992, becoming the fifth largest cable network in the United States. In 1992 she was promoted to senior vice president of international business development at the Discovery Channel.

In 1995 she was appointed president and chief operating officer of North American Television Inc., a joint venture of the Canadian Broadcasting Corporation and Power Broadcasting Inc. which launched the Newsworld International and TRIO cable television networks in the United States on Direct TV.

She was retained by National Geographic Television in 1996 to serve as executive consultant and managing director of network development.

Chapman currently is working on a book titled "What is Government For? American Democracy and the Genius of Invention." She received her bachelor's degree from the University of Charleston and received a master's degree in English from

Marshall in 1966. She also received a master's degree in library and information science from Ball State University and received her doctorate in American literature and historical linguistics from Ohio University.

She is a former fellow of the Rockefeller Foundation in Academic Administration and is an alumna of the Institute for Educational Management at Harvard University.

Chapman has held several positions in higher education. She served as an instructor at the University of Charleston and Marshall; associate professor, assistant dean of arts and sciences and director of the Honors Program and the Center for Women's Studies at Kansas State University; associate vice chancellor for academic affairs in the Minnesota State University System; professor at Tulane University; director of exemplary projects and programs for non-traditional learners at the National Endowment for the Humanities; visiting professor at Princeton University; professor and president of The Sage Colleges, and visiting research scholar at Harvard Graduate School of Education.

From 1989 to 1995, Chapman served as co-host and co-producer for "51%," a widely honored National Public Radio program focusing on public policy questions of particular concern to women. The program has been broadcast worldwide by the BBC, the United States Armed Forces Network and Voice of America.

Chapman's work with Public Radio also includes her continuing service as a member of the Educational Principles Committee of the Corporation for Public Broadcasting and the National Advisory Committee for "The Best of Our Knowledge," a program devoted to research in education sponsored by the Spencer Foundation.

She is the author of a book titled "Henry James's Portrait of the Writer as Hero" and several articles and papers published in professional magazines and journals.

"We are fortunate these two very distinguished alumnae have agreed to take a day or two off from their work to join us for the Hooding Ceremony," said Dr. Leonard J. Deutsch, dean of Marshall's Graduate School.

The Hooding Ceremony will be open to the public free of charge. To obtain further details contact the Marshall University Graduate School Office, 304-696-6606.

Four CATC workshops to be held in May

Four professional development workshops have been scheduled in May by the Computing Across the Curriculum (CATC) program at Marshall University, according to Ken Williams, CATC director.

The schedule includes the following programs:

—"Integrating Technology to Support Instruction" by Ken Williams on Wednesday, May 7, from 9 to 11:30 a.m. in a location to be announced;

—"Using USNET News Groups in Classes" by Phil Smith on

Wednesday, May 14, from 1:30 to 4 p.m. in Smith Hall Room 532;

—"Teaching in a Virtual Reality Environment" by Karen McComas on Saturday, May 17, from 9 a.m. to 4 p.m. in Smith Hall Room 532;

—"All About HTML Editors" by Brian Morgan and David Wiley on Saturday, May 26, from 9 a.m. to 4 p.m. in Smith Hall Room 532.

All of the workshops are free with reference materials provided. Continental breakfasts will be available starting at 8:30 a.m. for the Saturday workshops.

Enrollment will be limited to 20 participants in each program. Enrollment for the workshop on "Teaching in a Virtual Reality Environment" will close Monday, May 12.

To register or obtain further details contact Ken Williams in the Marshall University Communication Studies Department, 696-2811, or send E-mail to williams@marshall.edu.

Graduate School giving awards to advisers

Three Marshall University graduate faculty members will be presented \$500 awards in recognition of their contributions to student development outside the classroom during the Graduate School's Hooding Ceremony Friday, May 9, at 4 p.m. in the Huntington City Hall Auditorium.

Moore Auto Group Outstanding Graduate Advising awards will be presented to Dr. Robert Angel, professor in the Special Education Program in the Division of Teacher Education; Dr. John Lancaster, professor in the Mathematics Department, and Dr. Edmund Taft, professor of English.

Marshall University may be the first institution in the nation to acknowledge academic advising at the master's degree level through a monetary awards program, according to Dr. Leonard J. Deutsch, dean of the MU Graduate School.

"None of our Southern Regional Education Board peers honor advising in this manner and a survey conducted by the National Academic Advising Association failed to identify any university in the country that rewards outstanding graduate advising in this way," said Deutsch.

Dr. Charles Braun of Marshall's Management and Marketing Division chaired a committee that established the criteria for the awards and evaluated the nominations. The committee included Dr. Judith Silver of the Mathematics Department and three graduate students.

Recipients were selected based on the following criteria:

—Is the nominee available on a regular basis and at times that are convenient for students?

—Is the nominee available to consult with former students?

—Does the nominee provide accurate and timely program information to students, peers and administrators?

—Are advisees admitted to candidacy within the acceptable time frame?

—Does the nominee assist in the development of graduate-level handbooks and brochures?

—Has the nominee served as a master's thesis or dissertation director, committee member or director of graduate-level independent studies, internships or preceptorships?

—Does the nominee have a track record of encouraging qualified students to pursue more advanced training after completing their degree?

—Is the nominee an "ambassador to the community" for his or her graduate program?

—Does the nominee promote the intellectual development of advisees by going to conferences and encouraging them to present their research?

"The common trait most mentioned in nominations for all three of our honorees is their willingness to go the extra mile to help students," said Deutsch. "Their students, fellow faculty members and administrators all have high praise for our award winners. It seems they often go above and beyond the call of duty when it comes to serving as advisers to their students."

Program will train people to teach in China

"Appalachians Abroad," a non-profit cooperative program directed by Marshall University's Center for International Programs and English as a Second Language Institute (ESLI), has been established to develop educational and business relationships between Appalachia and the People's Republic of China.

The organization currently is seeking applicants to teach English as a foreign language in China, according to Clark Egnor, assistant executive director of Marshall's Center for International Programs.

Participants must have a baccalaureate degree, have native fluency in English and possess cross-cultural sensitivity. Participants must be able to make a commitment for one or two years beginning in August 1997.

A mandatory training program will be held May 23-25 to prepare selected participants with the necessary language and teaching skills for work in China. The training program will be repeated in September for people who would like to take part in the program in 1998.

Positions include a monthly salary, free accommodations, round-trip airfare, travel stipends and free medical care in China.

A registration fee of \$300 is required with the application and a health examination may be necessary to obtain a visa to China.

Teachers will be sent to several institutions including the Petrochemical Management College, the Shanghai Foreign Trade Vocational School, East China Normal University and the Changsha Lushan International Experimental Boarding School. Egnor said the program also intends to place instructors in the Henan-Marshall HMC Language Institute, the first educational joint venture between the People's Republic of China and West Virginia.

"This is the opportunity of a lifetime for those who are interested in gaining international and career experience within the realm of education," said Egnor. "China is a leader in international education and individuals from the Huntington metro area are able to take part in the exciting process of cross-cultural instruction."

To obtain further details contact Egnor at Marshall University's Center for International Programs, 304-696-6265. The center is located in Old Main Room 212.

Letter of appreciation

Dear Marshall Faculty and Staff:

We want to say thank you again for the overwhelming response you have given to us.

Since our last thank you note was printed, we received even more response so we thought a second thank you note was needed.

We should be in our new mobile home within the next week. Because of your response, we will have our lives put back together.

Sincerely,
Virginia and
Bernard Keeney

Gilley, Baker give reports during meeting

(The following report on the Marshall University general faculty meeting held April 17 was submitted by Kay Wildman, Faculty Senate secretary.)

The first item of business was nominations for faculty representative to the Institutional Board of Advisors. Karen McComas was nominated; there being no other nominees, it was moved and seconded to elect McComas by acclamation. The motion carried.

Recognition of Retiring Faculty Members:

The following retiring faculty members were recognized and thanked for their years of service by Dr. Sadat-Hossieny, chair of the University Functions Committee, and MU President J. Wade Gilley: Edwards S. Hanrahan, James E. Douglass, Chang L. Kong, Joseph L. Roberts, Harold T. Murphy, Jacqueline Guttmann, Carol Valentine, Betty McClellan, Warren L. Dumke, Anthony J. Bowdler, James D. Fix, Charles D. Webb, Robert F. Godfrey, Richard Jones, Phillip O. Prey, Betty Jo Jarrell and Maureen Milicia.

End-of-Year Remarks by Dr. J. Wade Gilley:

In his end-of-year remarks, President Gilley noted the following accomplishments:

—There has been an increase of 700 in student enrollment this year, primarily in full-time undergraduates;

—Construction continues on campus with the ground breaking last fall for the new Drinko Library and the continuation of the building of the new medical addition at Cabell Huntington Hospital;

—Marshall sports continue their winning ways with the NCAA Division 1-AA championship in football as well as Southern Conference championships by several other teams, including the women's basketball team that participated in the NCAA regional playoffs;

—The merger with the West Virginia Graduate College is now

Two named to Academic Team

Christine Baldwin of Huntington and Jane Norris of Hurricane have been chosen to represent Marshall University's Community and Technical College on the All-West Virginia Academic Team.

Two students were selected from each community college to the All-American Academic Team based on academic achievement and leadership qualities. The All-West Virginia Academic Team is made up of those students nominated for the All-American Team.

The academic team is sponsored by Phi Theta Kappa, an international honor society that recognizes extraordinary academic achievement and leadership qualities of students enrolled in two-year programs.

Team members recently were honored at the Capitol by West Virginia Governor Cecil H. Underwood. "I am extremely pleased to recognize your achievement of academic excellence," said Underwood. "All of you have made the necessary commitment and sacrifice to earn this prestigious award. I challenge you to apply the knowledge you have gained through your higher education experience to make West Virginia a better place to live."

Dr. Betty Kyger, provost of Marshall's Community and Technical College, attended the ceremony at the Capitol.

Baldwin serves as president of Phi Theta Kappa at Marshall. Norris serves as vice president of the MU chapter.

official with the governor's signature on April 9 (the actual merger will take effect July 1).

Gilley said that looking toward next year, the merger will increase our enrollment to 16,000 students of which 5,000 will be graduate students. Along with that, there are many things to address in order to provide a smooth and productive transition.

Several other construction projects are scheduled for next year including the expansion of the bookstore, renovation of the exterior of Old Main and the interior of Henderson Center, major improvements to Smith Hall and Harris Hall, and an addition of a jazz center to the Fine and Performing Arts building.

Enrollment should increase again next year, enhanced by a substantial scholarship program. A dramatic expansion is underway for the Robert C. Byrd Institute, including an additional building in South Charleston.

Gilley said all of the changes are moving toward strengthening Marshall University and positioning us for the 21st century.

State of the Faculty Address by Dr. Elaine Baker:

In her State of the Faculty address, Faculty Senate President Elaine Baker summarized the results of the recent faculty survey.

Some of the conclusions drawn were that Marshall faculty members are more productive and better-qualified now than five years ago and we have more tenured faculty who are moving into higher ranks. There are 20 additional tenure-track positions since 1991 and grants have almost doubled in that five-year period. Job satisfaction seems fairly strong, autonomy is high, and faculty believe in Marshall and agree with the direction the institution is going.

Baker said some of the pluses in the last five years have been the introduction of the phased retirement policy, more monies for faculty development, new technology (including the Faculty Senate web page), recognition of individuals for excellent teaching and research, and more reassigned time.

One of the major areas of concern is that there is no positive way of resolving personal conflict. Baker suggested that an ombudsperson be employed for that purpose. Also, the lack of a forum for the discussion of academic issues by faculty is an area of concern.

Baker then recognized her senate office staff for their fine work the past two years and invited everyone to a reception at Marco's after the meeting to honor the retirees.

The meeting adjourned at 4:45 p.m.

Library hours revised

Marshall University's James E. Morrow Library has revised its previously published summer schedule, according to Josephine Fidler, director of libraries.

The library will observe the following summer schedule from May 12 through Aug. 15: Sunday, 5 to 10 p.m.; Monday through Thursday, 7:45 a.m. to 9 p.m.; Friday, 7:45 a.m. to 5 p.m., and Saturday, 1 to 5 p.m.

The library will be closed May 24-26, July 4 and July 12-13.

Fidler also released the following schedule for the university's examination period: May 2, 7:45 a.m. to 9 p.m.; May 3, 10 a.m. to 9 p.m.; May 4, 1 p.m. to 1 a.m.; May 5-8, 7:45 a.m. to 1 a.m.; May 9, 7:45 a.m. to 6 p.m., and closed May 10-11.

Separate schedules are maintained by Special Collections (696-2343), Government Documents (696-2342), the Health Sciences Library (696-6426) and the Music Library (696-6647).
