number of significant studies of communities and has provided assistance to the productive.

Byron D. Carpenter, center director, said one of the biggest plusses of the first year is that the center is helping to develop a "believing attitude" among the people of the region.

In addition to the federal and state support, the center through its own projects has generated another $80,000 in contracts for studies it has completed or is now conducting for Mcdonald County, Point Pleasant-Mason County, and the City of Huntington.

Carpenter said 20 Marshall faculty members and 45 students have participated in projects sponsored by the EDA program. The MU center was one of only three new EDA university centers created last year.

Carpenter said the center also has served as a reference point for businesses to secure market, demographic and land cost information in making decisions to locate businesses in the region. Another area the center expects to become involved in is providing assistance to help new businesses get started in their first year or so of operation.

Dr. Robert Maddox, associate professor of academic affairs and dean of the MU Graduate School

College of Education

(Continued from page 1)

Dr. Virginia Plummer, chairperson of the Department of Educational and Regional Progress Center, has been named a fellow of the American Library Association. Also, two separate departments created. They are the Department of Vocational, Technical and Adult Education, headed by Dr. W. Allen Olson, professor of vocational, technical and adult education, and the Department of Mining, Occupa­

tional, and Transportation Safety. Each, a separate associate professor of education, will be interim chair­
man of that department.

The Department of Health, Physical Education and Recreation will now function as a division rather than a department. The Department of Curriculum and Foundations also was abolished with responsibilities assigned to the Division of Teacher Education and in an Educational Foundations area in the College of Education and Institutional Support and Leadership Studies, Mori said.

The Department of Geography, headed by Dr. Sam Clagg, has moved administratively from the College of Education to the College of Liberal Arts. Mori said other departments in the College of Education essentially would remain the same.

duct director for the Galveston program is Carl J. Johnson, associate professor of education, and Dr. Jack Jervis, professor of education and director of off-campus programs.

who was active in the establishment of the center and continued to oversee its programs, said the center still is in its infancy stage and the potential for much greater contributions will come with further expansion of pro­
gress to develop intermediate and advanced analytical equipment for Marshall faculty, staff

and students.

In addition the many advantages it brings to the university as faculty members and students have greater opportunities to share their expertise and provide con­sulting for "This in turn can attract quality faculty members and students," he said.

Additionally, Maddox said the center will be working closely with the new Division of Educational Media and the Learning Resources Center. This just recently was mov­
ed to the MU campus and will be provided $100,000 in state funds for a state-wide program of centers in several other state cities.

While the center has concentrated on economic development in its first year, it actually has six major divisions. In addition to business and industry, it also in­
cludes divisions of community and government, educa­tion, arts and culture, health, and family and consumer.

---

Faculty, staff activities . . .

Dr. ROBERT P. ALEXANDER, dean of the College of Business, has been selected as a test question for the New York Board of Regents Course Equivalency Ex­ams. Alexander previously has served as a developer for the National Curriculum and Testing Administration for the National Management Association.

DR. N. C. McINTYRE, dean of the College of Liberal Arts, has been named by the American Council on Education to the National Development and Research with Industry Board.

Dr. W. A. GRAMM, professor of education and director of the Autism Training Center, has been reappointed for a three-year term to the board of editors of the Journal of Applied Behavior Analysis.

DR. STEBBS B. CHANDOR, chairman of pathology, recently attended the Southeastern Cancer Study Group meeting in Atlanta as a consultant. He attended meetings of the hemopathology, pathology and lymph­

Dr. PHILIP S. SHORE, assistant professor of health, physical education and recreation, presented a research paper at the national meeting of the American College of Sports Medicine May 25-29 in Nashville, Tenn. The paper, also published in the April issue of Medicine and Science in Sports and Exercise, was entitled, "Exer­

The Hemodynamic Profile at Rest and During Exercise in Mild Hypertension.

GEORGE Y. TRAVIS, adjunct associate professor of occupational, adult and safety education, has had an ar­
cicle published in the June 1985 issue of Lifelong Learn­

An Omnibus of Practice and Research. The article was entitled, "Androgyny and the Disabled Adult Learner."".

Dr. N. PAUL BROMLEY, professor of finance and business law, attended the June, 1985, Program of In­
struction for Lawyers at the Harvard Law School.

Progress center's impact 'significant'

Marshall University's Center for Regional Progress, in operation little more than a year, already is having a significant impact on southern West Virginia, MU Presi­
dent Dale F. Nitzschke said.

"I'm both pleased and encouraged by the contribu­tion of the Center for Regional Progress is making now and its even greater potential for the future," Nitzschke said. "As a result, Marshall's role of service to the state is being enhanced greatly.

The center serves as a "bridge" between Marshall and southern West Virginia communities, enabling the university to offer its resources including the expertise of faculty and staff to meet economic and community development needs.

It was opened in March 1984 with a $38,841 grant from the Governor's Office of Economic and Community Development and $12,000 in office space on the Mar­

shall campus last August. The center received $77,000 from the federal Economic Development Administration to establish an EDA University Center to serve 21 southern West Virginia counties.

Nitzschke said the center in cooperation with Marshall faculty and staff members already had conducted clinical experiences, now will be assistant dean for field and specialty experiences.

The four new divisions and division heads are Teacher Education, Dr. Corey Lock, professor of education; Health Sciences, Dr. David Koontz, professor of education; Donald Williams, formerly chairman of the Department of Health, Physical Education and Recreation; Specialized Allied Students, Dr. Philip Shore, chairperson of the Department of Home Economics; and Curriculum and Instructional Leadership Studies, Dr. Carolyn M. Karr, chairperson of the Department of Social Studies.

College of Education reorganized

A new organizational structure for the College of Edu­
cation is in effect. The following better utilize personnel and financial resources has been announced by Dean Allen A. Moomaw.

Mori said the reorganization includes the naming of an associate dean, two assistant deans and two directors, and creation of four new divisions. Some changes in departmental leadership, with responsibilities assigned to the Division of Teacher Education and in an Educational Foundations area in the College of Education and Institutional Support and Leadership Studies, Mori said.

The Department of Geography, headed by Dr. Sam Clagg, has moved administratively from the College of Education to the College of Liberal Arts. Mori said other departments in the College of Education essentially would remain the same.

Chemistry Department to buy advanced analytical equipment

Marshall has received a $38,422 National Science Foundation grant as part of a $74,000 program to buy an advanced analytical chemistry instrumentation for use by students and faculty, according to Dr. E.S. Hanahan, director of the College of Science.

Hanahan said the grant proposal was authored by Dr. George E. Cabaniss, assistant professor of chemistry who also will be grant project director in the use of the new computerized system. Cabaniss said the NSF grant will pay the major cost of buying a Fourier Transform In­
frared Spectrometer. The equipment costs $49,708 with $38,422 coming from NSF funds and the remaining $11,280 in local funds.

He said the instrument will be used to identify unknown compounds and can determine them in any physical state – gaseous, liquid or solid. Cabaniss said as part of the grant agreement with the NSF, Marshall will keep the equipment for at least five years and will match the state funds for an additional instrumentation including a High Performance Liquid Chromatograph to be used in separation of thermally unstable compounds.
NOTE: The following report on the July 16 meeting of the Advisory Council of Classified Employees to the West Virginia Board of Regents was submitted by Kenneth B. Reiffelt, Marshall University.

The Advisory Council of Classified Employees to the Board of Regents (ACCE) met July 16 in Charleston at the Board of Regents meeting room. The meeting was called to order by Clifton Neal of Bluefield State College, chairman, and William J. Walsh, director of personnel affairs, and James Schneider, director of finance.

The following agenda items were presented and action taken:

1. Minutes of the June 12 meeting were approved with minor corrections.

2. It was announced that Paul Martinelli, West Virginia University member of ACCE, has been named to the search and screening committee for the WVU presidency search. He will be the second staff member of ACCE to apply for such an opportunity since the freeze.

3. Walsh explained matters relative to Policy Bulletin No. 62 which was recently approved by the BOR.

4. A lengthy discussion regarding the lack of action on WVU-11 forms which have been sent to the Governor's Office since the freeze. Chancellor Leon Ginsberg arrived during this discussion and the BOR was also informed by Gary Adams, legislative liaison for the BOR. The BOR was unanimously agreed by all present that Chairman Neal be empowered to write a letter regarding the seriousness of the situation and to draw to his attention that the rank-and-file employee was the one suffering from the freeze. Chairman Neal will send a copy of this letter to all ACCE members.

5. Among other items, mentioned by Walsh was a reminder that under the freeze, all classifications all "comp" time must be taken within the same work week in which it is earned.

6. Schneider said a recent attorney general's opinion states no state pay raise can be retroactive. In this connection, he stated Chairman Neal must be aware that there must be two elements present for a legitimate grievance: 1. Does it concern wages, hours or conditions of employment? 2. Does the old salary still exist?

7. Correction to June report: It was stated in the last report that the majority of classified workers be those who have not been on the job temporarily were reviewed to the highest pay level after 30 years. This item still is under study by the BOR.

8. It was underlined that there must be two percent.

9. Regarding the longevity increase, he reported that the State Civil Service Commission was filing suit against the State Auditor to stop the use of longevity as requested by Governor Moore. It is the understanding of the BOR staff and ACCE that this longevity increase was never intended to be used for the longevity increase for 1985-86. It must be kept separate for accounting purposes and for the Court to make a determination on the matter by July 30.

10. Adams presented a proposal for a "Legislative Issues & Procedures Group" (proposed member, classified, and student advisory councils) to be made up of a subcommittee from each group to meet in late July and August. The group would study and make recommendations regarding state tax dollars, financing possibilities, revenue makers for West Virginia for pay issues and possible use of lottery money, and study financing methods of other states. The study group will need to make a report to the BOR before it sends its legislative package to the governor in October or November.

11. Other items which Adams suggested might be looked into are A. classification schedule; B. fee waivers; C. medical education fee that might be expanded to include health, and D. pay raise for classified advisory council members. A. Walsh said that more revenue for these expensive programs with a portion going to a loan program; D. revision of SB 612 moving the forage South Education and Research Board (SREB) salaries, but also considering market conditions and equity, and E. sunset law which was postponed until 1986 legislation.

12. Walsh noted that it is important to hold WVU's administration and direction, and there was discussion regarding the continuation of the Board of Regents system itself. It was noted that public hearings are to be held regarding WVU's administration and direction, specifically "Why is it what it is and what does it plan on becoming?"

13. Mr. Neal motioned that the search committee for WVU's presidency be met.

14. The state ACCE membership be changed to proportionally represent the classified employees at each institution rather than just having one representative from each campus. This was presented in behalf of the WVU staff council. After a lengthy discussion it was moved by George Gaumond of Shepherd College that ACCE go on record as preferring the one delegate from each campus system and that proportionally representatives from President's Council, BOR staff, legislature, and possibly from the Governor's Office.

15. Walsh stated the new state-wide employee handbook, which will be printed soon will be distributed to all employees.

16. Under general questions it was asked "What constitution?" It was stated that Constitution is the best document to look to for all types of changes, former presidents etc.

17. Walsh stated that a recent attorney general's opinion states no state pay raise can be retroactive. In this connection, he stated Chairman Neal must be aware that there must be two elements present for a legitimate grievance: 1. Does it concern wages, hours or conditions of employment? 2. Does the old salary still exist?

18. Correction to June report: It was stated in the last report that the majority of classified workers be those who have not been on the job temporarily were reviewed to the highest pay level after 30 years. This item still is under study by the BOR.

19. It was also stated in the last report that there must be two percent.

20. Regarding the longevity increase, he reported that the State Civil Service Commission was filing suit against the state auditor to stop the use of longevity as requested by Governor Moore. It is the understanding of the BOR staff and ACCE that this longevity increase was never intended to be used for the longevity increase for 1985-86. It must be kept separate for accounting purposes and for the Court to make a determination on the matter by July 30.

21. Adams presented a proposal for a "Legislative Issues & Procedures Group" (proposed member, classified, and student advisory councils) to be made up of a subcommittee from each group to meet in late July and August. The group would study and recommend recommendations regarding state tax dollars, financing possibilities, revenue makers for West Virginia for pay issues and possible use of lottery money, and study financing methods of other states. The study group will need to make a report to the BOR before it sends its legislative package to the governor in October or November.

Final summer play set this weekend

"Mrs. McThing," a comedy/farce, will be presented at 8 p.m. today, Friday and Saturday in Old Main Auditorium as the final 1985 presentation of Marshall University Summer Theatre.

Four Huntington residents head a cast which includes actors from across the state and around the nation. The play centers on a wealthy, overprotective mother and her young son who are turned into stick figures by a wicked named Mrs. McThing.

The cast of "Mrs. McThing" this weekend's Marshall University Summer Theatre production, includes, from left, Laura Phillips, David Nitzschke, David Cook and Elizabeth Bunch. (Herald-Dispatch photo by Tim Grobe.)

Mori co-authors text on teaching disabled

Dr. Allen A. Mori, dean of the College of Education, is co-author of a new training manual/textbook dealing with teaching vocational training to the mentally disabled.

The book, "Vocational Training Curriculum For Workin..." was recently published by Special Child Publications in Seattle, Wash., and was co-authored by Dr. Bruno D'Alessio, professor of special education at the Arizona State University, Tempe.

The text, Mori's fifth, can be used to prepare personnel at the inservice and preservice level to provide vocational training to mentally and physically disabled persons in a variety of settings, Mori said.

He said because the text is comprehensive and packaged in a modular format, it can be used for training, as a reference, or as a self-instructional package.

Mori, a native of Pennsylvania, became director of the College of Education in September, 1984. He formerly was professor of special education and counseling and educational psychology and foundations at the University of Texas, Austin, at the Arizona State University, Tempe, and the University of New Mexico.

Carpenter art award given

Mark Moore of Charleston, who received a master's degree in art in May, has been selected by the Department of Art faculty for the 1985 Arthur Carpenter Award for Excellence in Art. The award, named after the former chairman of the department who retired in 1973, was presented to Moore for his ability to create acrylic paintings. It involved a $100 purchase award for one of his works which will be displayed on campus.
