4. The Academic Policy and Subcommittee presented a report on CLEP and its use at Marshall University. The question of how the students credit is counted from the general examination when a comparable subject exam or the equivalent courses has been taken was tabled until the April 29, 1982 meeting.

The following changes were approved:

1. Questions have been raised as to whether CLEP can be used to remove a D or F grade. On page 55 of the current catalog under "Quality Points Required for Graduation", the rule specifies only by repeating the course may the D or F be removed. The following phrase was approved to be added to the current paragraph on page 55: (including CLEP examination)

"If a student earns a grade of "D" or "F" on any course taken no later than the semester or summer term during which he attempts the sixtieth semester hours, and if he repeats this course prior to the receipt of a baccalaureate degree, the original grade shall be disregarded and the grade or grades earned when the course is repeated shall be used in determining his (sec) grade point average. Only by repeating this course and by no other means (including CLEP examination) can the original grade be disregarded. The original grade shall not be deleted from the student's record."

2. It was the concensus of the subcommittee that the statement concerning the use of CLEP in granting CR/NC on page 64 (shown below) of the current catalog should also appear on page 19 under CLEP information. The underlined sentence was added to the statement on page 64. This change was approved.

## CREDIT/NON-CREDIT OPTION

A student may elect to present a maximum of 18 semester hours of credit on a credit/non-credit basis toward fulfillment of requirements of a baccalaureate degree. **Credit completed through the College Level Examination Program (CLEP) does not count as a part of the 18-hour limit under the CR/NC option.** The decision to take a course on a credit/non-credit basis must be made during registration and may not be changed after the end of the registration period. Courses taken on this basis must be in areas other than the student's major area or teaching specialization.

If a student decided to change his major after taking a course Credit/Non-Credit, and that course then becomes a part of his major, the letter grade turned in by the instructor will be inserted in the transcript and will be included in the computation of the grade point average.

Course work taken on a credit/non-credit grade, recorded as CR or NC, will not be counted in computing the student's grade-point ratio. A course that has been taken on a credit/non-credit basis in which the grade of NC was awarded may be repeated either on a credit/non-credit basis or on a regular grade basis.
