Campus United Way campaign closing

The campus United Way fund appeal is entering its final week with contributions totaling approximately \$7,000, according to Dr. Mahlon Brown, co-chairman of the campus drive.

"We hope that all of our departmental representatives will make one more effort to reach their potential contributors before the campaign closes on Nov. 5," said Brown, Social Studies Department chairman.

Brown said he and his co-chairman Bos Johnson were concerned that the campus drive was below last year's giving level at this time. "This means that we aren't coming close to meeting the needs of the community," he said. "We didn't increase our pledge goal from last year in hopes that we could maintain the status quo. Unfortunately that doesn't seem to be the case," he added.

Campaign workers should return their packets by Nov. 5 to the Social Studies Office, Harris Hall 104, Brown said.

Roberta L. Walters new Institute manager

Communicator—That's the role that the new manager of Marshall University's Institute for the Arts, Roberta L. Walters, envisions for herself.

Keeping in touch with major and minor arts organizations in the region and acting as a liaison between community arts groups and MU's School of Fine Arts are two of her top priorities, said Ms. Walters, who assumed the manager's post Oct. 1.

"I will be working closely with the School of Fine Arts departments—Theatre/Dance, Music and Art, to assist them in promoting their activities, but I also want to develop close associations with area arts groups as well," she said. "I hope to encourage their use of Marshall as a primary arts resource for the area and develop outreach programs in the arts," she added.

Roberta Walters

Reactivating the "Tri-State Arts Forum," a monthly news letter published by the Institute that contains news about the arts and a calendar of events, is one of her first objectives, Ms. Walters said.

"Anyone interested in receiving the news letter may call the Institute Office, 696-3107, as we are working on the mailing list now," she said.

"Ms. Walters brings to the School of Fine Arts a solid background in arts administration with experiences in arts marketing, grant writing, and management," said Dr. Paul A. Balshaw, school director.

The Marshall University Athletic Committee met at 8 a.m., Monday, Oct. 18, in the Big Green Room, Henderson Center. Chairman Hatfield introduced and welcomed Earle Dillard as a new member to the committee.

Dr. Snyder presented the revised Athletic Department budget for 1982-83 to Committee members. He pointed out to the committee the specific budget items that were revised.

Dr. Snyder presented the Athletic Department's proposal to the Committee on Student Fees for a student activity increase for athletes. The committee went on record as supporting the student fee request.

Dr. Snyder stated that at the present time the Athletic Department is downplaying the idea of a new football stadium. He reported that he had discussed the idea with the Big Green Foundation Directors and President Hayes. He stressed that the Athletic Department needs to establish a group to study the options involved in building a new football stadium. The Athletic Department must have plans in case it becomes feasible to seriously consider building a new stadium.

THE GREENERY. . .

Take a break and relax at The Greenery, Memorial Student Center's new restaurant, serving lunch weekdays from 11:30 a.m. to 1:30 p.m. It's the perfect place for a business lunch or just to have lunch with a friend.

Pharmacology Department Chairman Donald S. Robinson, principal investigator for the project, said this will be the first long-term study of this type of antidepressant, which allows the body to overcome deficiencies of a chemical which helps regulate emotions and moods.

"Mood disorders are the most common of all medical problems seen in primary care," Robinson said. "Depression sufferers often have a wide variety of symptoms, such as anxiety, physical complaints and sleeping or eating problems. The illness can be quite disabling without proper treatment."

"Many people have more than one depressive episode in their life time," he added. "It's quite important that we determine how often the illness is apt to recur, when it is apt to recur, and whether we can minimize the risk of recurrence."

Robinson said that since phenelzine, like most antidepressants, is safe and non-addictive, it would be a practical drug for long-term maintenance therapy.

In the study, patients will be treated with phenelzine and remain in continuation therapy until they have been recovered for five months. Patients will then be divided into three groups for a two-year maintenance program, receiving one of two doses of phenelzine or an inactive substance. By comparing recurrence rates, Robinson will be able to find whether the maintenance treatment is beneficial and, if so, which dosage level is more effective.

Working with Robinson on the study will be Dr. John Corcella, Dr. Mildred Bateman, Dr. M. Hoback Clark, Binni Bennett, Elizabeth Devereaux, Thomas B. Cooper, Barry Hamilton, Carla Schneiderman, Doris Albright and Diantha B. Howard.
