## One last thing

Derrick Kolling, chair of Marshall's Department of Chemistry, along with a Marshall chemistry graduate who is now an associate professor of chemistry at UNC Chapel Hill, have published research that has gained attention in the scientific community.

Kolling and Dr. Leslie Hicks conducted research on the tardigrade, also known as the water bear, that delves into the cause of their resilience, which they hope can encourage additional exploration of organisms withstanding extreme conditions. Read more in [ScienceNews](#), [PhysOrg](#) and [Scientific American](#).
