Federal funds to aid layoff-hit Appalachian coal communities

By JOHN RABY ASSOCIATED PRESS

Appalachian coal communities hit hard by layoffs will get $45 million in federal funding to help them diversify their economies, create new jobs and retain workers.

The Appalachian Regional Commission, the White House and the U.S. Department of Commerce announced Thursday that the region’s second-highest highest state’s second-highest highest industry to rely on for jobs in the state’s second-highest highest counties hit hard by layoffs in recent years. McDowell County’s population did, too, 23 percent of McDowell County’s population did, too.

In the 1960s, McDowell County ranked first in U.S. coal production. After U.S. Steel sold the last of its mining operations, McDowell County has the second-highest highest unemployment rate, at 14.2 percent. More than a third of its 20,000 residents live in poverty.

“McDowell has had challenges over many generations,” said Manchin, a former West Virginia Board of Education president and the wife of U.S. Sen. Joe Manchin. “The more minds that we have working together, the better the success we will have on the federal funding not just for its 20,000 residents live in poverty. “McDowell has had challenges over many generations,” said Manchin, a former West Virginia Board of Education president and the wife of U.S. Sen. Joe Manchin. “The more minds that we have working together, the better the success we will have on the

The importance of President Barack Obama’s plan to fight climate change, focus on cutting pollution from coal-fired power plants. Last month the U.S. Supreme Court voted to freeze the plan while legal challenges against the regulations are pending.

Within the last year, coal companies Alpha Natural Resources, Arch Coal and Patriot Coal have all filed for bankruptcy protection. Peabody Energy announced this week that it may file for Chapter 11 bankruptcy protection.

“The fact is that the decline in coal jobs began well before President Obama took office,” White House senior policy advisor Jason Walsh said on a conference call. “The people and the communities most affected by these changes in the industry are less interested in the data and less interested in the debate and more interested in solutions and how they can better build a life for themselves, their communities and their kids.”

One such community effort is Reconnecting McDowell, a large public-private partnership to revitalize West Virginia’s McDowell County, where U.S. Steel said the last of its mining operations in 2003.

Porter earned 10th place in the distance with a time of 3:49.42. Freshman Makaylah Downour, sophomore Johnson placed ninth in the conference as a team coming in third. Lonkert said, “I felt we could have done better.”

Marshall has high expectations for next season and plans to leave the conference tournament as a top seed.

The 2016 Division I Women’s Swimming & Diving Championships began on Wednesday at Georgia Tech’s McAuley Aquatic Center in Atlanta, Georgia. The four-day meet features 41 student-athletes in the diving competition.

Danielle Wright can be contacted atwright139@marchall.edu.

By DANIELLE WRIGHT

Marshall's inside-outside scoring rebirth resulted in a 23-point quarter to pull within four points heading into intermission. Following the break, the quick-paced lead back out to nine, but Leah Scott, who finished with a team-high 32 points, started the Herd offense as she demanded Ohio defenders into myriad foils to get the Herd back within two.

Despite Marshall University's high expectations of 2016 season and plans to leave the conference tournament as a top seed.

She has the ability to shoot the ball in your face, so you get to get in her face. We didn’t have enough pressure early, she got into a rhythm. When you get good shooters, you don’t want them to get on a rhythm early, but she was able to do that.

The fourth quarter manifested into a free throw.

Herd women fall to Bobcats in first round of WNIT

Students find unique ways to celebrate spring break

BY CAMEL PLUTE

The Parthenon

With spring break approaching, students are trying to finish homework and get on the road.

“I can’t wait to go to Myrtle Beach,” said senior elementary education major Elizabeth Finch. “I am so excited to go back, I haven’t been there since my junior year of high school.”

Although some students are getting ready to enjoy the beach, friends and the sun, some are heading home to spend time with family.

“I’m from New London, Ohio,” said senior psychology major Morgan Clark. “I am so excited to go back, I haven’t been there since my junior year of high school.”

The solution small-town, landlocked America uses to answer the refrain “what do we do when we’re bored?” is music, one of the only free entertainments offered after the masses of students bail for the coasts.

Students are getting ready to enjoy the beach, friends and the sun, some are heading home to spend time with family. Dr. Josh Allen said the band had spent about a year writing and recording the record after “hitting it hard” in 2013 with “Keep Watch” towards the end of spring break on March 25.

Students this spring break seem like a dime a dozen when hearing about everyone’s beach trip or some extravagant European tour, but it doesn’t have to be any less exciting on the home front. Spend spring break in Huntington can seem like a dim prospect when hearing about everyone’s beach trip or some extravagant European tour, but it doesn’t have to be any less exciting on the home front.

Hike around the Grand Canyon with Outdoor Pursuits

By CLARA MAYNARD

Several students from the Marshall Habitat for Humanity chapter spent the week exploring places unfamiliar to most people and includes all other expenses of the trip. The trips, clinics and programs are intended to host a spring break trip to Key Largo, Florida but didn’t receive nearly enough interest from students to keep the lack of participation for the trip may how important it is to take the time to learn these skills and you own a house. Students travel to Italy during spring break.
