Part of the Higher Education Commons, and the Higher Education Administration Commons
Faculty member tapped to lead National Youth Science Camp

Dr. Brian Kinghorn (center), assistant professor in the Marshall University College of Education and Professional Development, has been named the director of the 2020 National Youth Science Camp.

Marshall and the National Youth Science Foundation (NYSF) made the announcement Monday at Marshall’s South Charleston campus.

"We are extremely proud of Dr. Kinghorn and excited for him to lead this amazing STEM program," said Dr. Jerome A. Gilbert, president of Marshall University and a 1973 alumnus of the camp. "Every summer, teenagers from across the United States are introduced to the beautiful state of West Virginia and the exciting world of science. As a former science camper, I know just how life-changing this camp can be for aspiring young scientists and researchers."

Kinghorn completed his doctorate in educational psychology and educational technology from Michigan State University and joined Marshall in 2015.

According to Dr. Andrew Blackwood, executive director of the National Youth Science Foundation, Kinghorn’s appointment continues a long tradition of connections between higher education in West Virginia and the National Youth Science Camp. Previous directors have been professors at West Virginia University and the former West Virginia Institute of Technology; Kinghorn is the first director from Marshall University.

"We are excited to welcome Dr. Kinghorn to the National Youth Science Camp family," Blackwood said. "Dr. Kinghorn’s enthusiasm and extensive experience in STEM education have prepared him to lead the 57th NYS Camp."

The NYSF is headquartered in Charleston and operates the National Youth Science Center near Davis in Tucker County, West Virginia; the NYS Camp is held at Camp Pocahontas near...
Bartow. The camp attracts some of the nation’s most highly touted STEM students the summer after they graduate from high school. Each state, the District of Columbia, and eight other countries send two delegates each year to the all-expenses-paid program.

Kinghorn said he is excited to be on board and wishes he’d known about the camp when he was a youngster in Idaho.

"After learning about it, I immediately determined that I would find a way to be involved with the camp in some way," Kinghorn said. "I even reached out to a local NYS Camp alumnus to discuss the possibilities of presenting at the camp someday. At that time, I could never have imagined the series of events that led to my appointment as the director of the 2020 camp. I am honored to be a part of such a prestigious and long-standing program and am proud to represent our university."

Applications for the camp are available now at http://apply.nyscamp.org.

For more information about the NYSF or the NYS Camp, contact Blackwood or Kinghorn at 304-205-9724.

Marshall receives AAALAC International reaccreditation

Marshall’s Animal Care and Use Program has received full three-year accreditation from the Association for Assessment and Accreditation of Laboratory Animal Care (AAALAC) International.

AAALAC International is a private, nonprofit organization that promotes the humane care and use of animals in science by voluntary assessment, including an on-site inspection of research programs. AAALAC International accreditation indicates an institution’s commitment to responsible animal care and use for the advancement of medicine and science when there are no non-animal alternatives and done in an ethical and humane manner. Through an intensive review process, AAALAC evaluates policies, animal housing and management, veterinary care and conducted an onsite visit of the facilities earlier this year.

In its report, the AAALAC International Council on Accreditation commended Marshall for maintaining a quality program, committed staff and strong institutional support. The university’s Institutional Animal Care and Use Committee (IACUC) provides oversight for all of these activities and ensures the university complies with the Public Health Service Policy on Humane Care and Use of Laboratory Animals and the "Guide for the Care and Use of Laboratory Animals" outlined by the National Institutes of Health.

Marshall University and other research institutions volunteer to participate in AAALAC’s program. More than 1,000 universities, government agencies and commercial companies in 47 countries have earned AAALAC accreditation. AAALAC International-accredited institutions include Harvard University, the Karolinska Institute, Mayo Clinic and the National Institutes of Health.

The Marshall University program has maintained continuous ongoing accreditation from AAALAC since 1986. Reaccreditation occurs every three years. Marshall’s next site visit will be in 2022.
Marshall students become first-ever cohort of Stanford University Innovation Fellows in West Virginia

Three Marshall business students have been named University Innovation Fellows (UIF) by Stanford University’s Hasso Plattner Institute of Design.

These students are the first-ever UIF cohort from a West Virginia university and are among 360 students from 90 higher education institutions in 13 countries. The 2019 UIF Fellows from Marshall are Annika Behnke, a sophomore accounting major from Export, Pennsylvania; Kelly Leonard, a junior marketing major from Huntington; and McKenna Sunderland, a sophomore entrepreneurship major from Charleston, West Virginia.

Humera Fasihuddin, co-director of the UIF, said this global program trains student leaders to create new opportunities for their peers to engage with innovation, entrepreneurship, design thinking and creativity.

“These Marshall students worked tirelessly over the last six weeks to understand their campus ecosystem and spot real opportunities to stimulate the entrepreneurial ecosystem on and off-campus. They set a bold vision in their video of what the campus could look like in five years if some of these projects came to fruition. By completing the fellowship, they became not only Marshall’s first-ever cohort of University Innovation Fellows, they also became the first ever from the entire state of West Virginia. We know the power that students have in making things happen on campus and we’re excited to see this cohort join forces with their faculty champions to realize this vision,” Fasihuddin said.

iCenter executives Dr. Ben Eng, Olen York, and Tricia Ball served as the fellows’ UIF Faculty Champions during their training. Eng said, "The UIF Fellows presented their ideas to grow an entrepreneurial ecosystem in the Tri-State area on Oct. 11 to University President Dr. Jerry Gilbert, Lewis College of Business Dean Dr. Avi Mukherjee and the iCenter Board of Advisors. The fellows will next virtually present their ideas to Brad Smith, who will provide
them coaching on next steps. They will then further their ideas at Marshall’s iCenter until the end of the school year. If they make enough progress, the fellows will be invited to the UIF Silicon Valley Meet-Up in March where they’ll meet other UIF teams from around the world."

Mukerjee said, "We want to thank a member of our alumni, Mr. Richard Jackson, who established the Dick Jackson COB Student Success Fund to help our fellows with funding for the program. This wouldn’t have been possible without his support and generosity."

Sunderland is one of the three UIF Fellows recommended by Eng and York, who are members of Marshall’s business faculty. She said she is grateful for the opportunity to learn more about innovative business practices and work with leaders in education and industry.

"I’d say the most important thing I will take from it is that I can use entrepreneurship and innovation to help others," Sunderland said. "This program will impact my future because I have the tools and resources to help me make a difference on my campus and in my community."

With the addition of the new fellows, the UIF program has trained nearly 2,200 students since its creation. In Spring 2020, fellows will have the opportunity to participate in the program’s signature Silicon Valley Meetup in California. During this gathering, fellows take part in immersive experiences at Stanford University and Google, and participate in experiential workshops and exercises focused on topics including movement building, spaces for innovation, design of learning experiences and new models for change in higher education.

To learn more about the 2019 UIF Fellows, visit https://universityinnovationfellows.org/360-students-named-university-innovation-fellows-2019/. For more information on Marshall’s Lewis College of Business and its Brad D. Smith Schools of Business, visit www.marshall.edu/cob.

Retirement reception for Dr. Eldon Larsen to take place Nov. 21

Dr. Eldon Larsen, professor of engineering, is retiring at the end of December after 20 years of teaching at Marshall University. A retirement reception is planned for 2:30 p.m. Thursday, Nov. 21, in the J. Churchill Hodges Atrium of the Arthur Weisberg Family Applied Engineering Complex. All are welcome.

Those planning to attend are encouraged to send an RSVP to cholley@marshall.edu.

Congratulations, Dr. Larsen, and thank you for your service.
Lee to present lecture-recital on Korean folk music

The School of Music will present a lecture-recital: Korean Traditional Music Elements for Classical Music, given by Dr. Alexander Lee, an assistant professor of voice and director of opera at Marshall.

The lecture-recital will be at 6 p.m. Thursday, Nov. 21, in Studio 143 of Smith Music Hall. It is free and open to all.

Lee will discuss how to apply Korean folk music elements to Western classical music, a technique he learned while studying Korean traditional music. Also, music will be performed by Lee himself, a tenor, along with Dr. Wendell Dobbs, interim dean of the College of Arts and Media at Marshall, on flute and Marshall Professor Steven Hall on traditional Korean percussion.

Western countries have absorbed limited areas of Asian musical traditions, Lee said.

"As a dual citizen of South Korea and the United States, I have discovered interesting and unique musical elements from South Korea that the European countries and the United States have not touched on or used in classical music," he said. "Last summer, I visited South Korea and studied with a Korean traditional music professional, Mr. Byoung-O Kim, and learned traditional Korean folk music elements that have much potential that I can apply to Western classical music.

"In this lecture recital, I will introduce the Korean traditional music’s music notation, system and instruments. I hope this lecture-recital opens the door to the musician in the United States to combine and synthesize the music in U. S. and Korea."

This lecture-recital is supported by the Summer Research Award from Marshall University.
Marshall nominee receives award for quality assurance in online education

Dr. Roxann Humbert was awarded the 2019 Ron Legon Award for Quality Assurance in Online Education at the annual Quality Matters Conference held at the Texas Gaylord Resort in Grapevine, Texas. The award recognizes individuals whose leadership efforts have changed the online education quality assurance paradigm for the betterment of students. She was nominated for the award by Dr. Monica Brooks, associate vice president for online learning at Marshall.

In 2012, Humbert launched a statewide initiative for the HEPC titled West Virginia Remote Online Collaborative Knowledge System (WVROCKS), providing accelerated online courses for students seeking degree completion options at their respective institutions in the Regents Bachelor of Arts (RBA) program. Several public institutions in West Virginia collaborate to provide an educational portal from which RBA students at their institutions can register for 8-week courses needed to graduate with a multidisciplinary Bachelor of Arts degree.

Humbert has been a champion for quality online education in West Virginia, regionally and nationally for more than twenty years, holding leadership positions at college and state levels including the West Virginia Educational Cooperative representative to the Southern Regional Education Board (SREB).

Humbert has been an invited speaker, presenter and panel participant statewide, regionally and nationally having made more than fifty presentations and published several articles related to online learning.

Humbert is responsible for bringing the Quality Matters (QM) program to West Virginia’s online learning community through her efforts as the statewide director of higher education e-learning. In this capacity, she organized and managed the WV Virtual Learning Network (WVVLN)—a representative group of distance learning personnel from each of the public institutions in the
state on behalf of the WV Higher Education Policy Commission (HEPC) and WV Network (WVNET).

"It's no surprise that Dr. Humbert was selected for the prestigious Ron Legon award," Brooks, who serves on the WVROCKS faculty, said. "Her tireless dedication to distance learning in West Virginia is evidenced by the overwhelming success of the QM program in the state in addition to the rapid growth of WVROCKS. On our own campus, QM has elevated the over-all quality of our online courses and programs."

Currently boasting over 1200 enrollments, Humbert has ensured the WVROCKS program and faculty meet national Quality Matters essential standards and best practices for development and delivery of quality online courses. Its retention rate is consistently in the 90th percentile and more than 20,000 credit hours have been earned by hundreds of students who have already taken advantage of an affordable option that meets their busy adult-learner lives.

Humbert is a graduate of West Virginia University and obtained her Master Online Teacher Graduate Certificate from the University of Illinois at Chicago through the Illinois Online Network. Recently retired from her positions as tenured associate professor of Education from Fairmont State University and executive director of WVROCKS, Humbert is the first female recipient of this award.

Marshall Artists Series to present cirque experience for the holidays at the Keith-Albee Dec. 9

Cabell Huntington Hospital and Student Activities at Marshall University will present “Cirque Musica presents Holiday Wishes” at the Keith-Albee Performing Arts Center Monday, Dec. 9 at 7:30 p.m.

The show brings a holiday story to life in a full theatrical cirque event for the entire family, featuring the world-renowned cast of Cirque Musica with favorite holiday hits all performed live by a symphony orchestra.

Audiences will be amazed by the acrobats, aerialists, hilarious hijinks and holiday cheer. The show blends the spellbinding grace and daredevil athleticism of today’s greatest circus performers with the sensory majesty of a symphony orchestra.

Cirque Musica presents Holiday Wishes is the perfect opportunity for the entire family to experience great holiday music while enjoying an edge-of-your-seat circus experience. Holiday Wishes really do come true with Cirque Musica!

Cirque Musica is also sponsored by First State Bank, Marshall Health, the Touma Foundation, Dr. Chris & Mrs. Tammy Hugh, Toy Train WV, Anonymous, The Chirico Family, the Marshall University Society of Black Scholars, iHeart Radio, the Herald-Dispatch and WSAZ.

Ticket prices are $98.42/$81.97/$71/$64.42. The Marshall Artists Series accepts all major credit cards. To order tickets, call 304-696-6656 or order online at ticketmaster.com. You may also purchase tickets at the box office located in the Joan C. Edwards Performing Arts Center on the Huntington campus. The box office hours are Monday-Friday from noon to 4 pm.
