Work underway on Hal Greer renovation project between Third Avenue and Washington Boulevard

FEBRUARY 22, 2023

The median, as well as one northbound and one southbound lane of Hal Greer Boulevard in Huntington, will be closed between 7 a.m. and 5 p.m. daily as work begins on the initial phases of the Hal Greer renovation project. There will be one lane open in either direction. Work includes digging out the median to build planter boxes between Third Avenue and Seventh Avenue, breaking up pavement for a new paving base from Seventh Avenue to Eighth Avenue, and digging out the median for planter boxes between Eighth Avenue and Washington Boulevard. Contractors will also install temporary traffic controls and temporary traffic signal.

Traffic traveling through the area should pay attention to posted signs and message boards for current traffic patterns.

Drivers should expect delays, adjust their commuting schedules and avoid the area if possible.

Please use caution when traveling through the area for flaggers, equipment and workers.

In November 2022, Triton Construction Inc. was awarded a contract for \$13,551,00 to renovate Hal Greer Boulevard all the way from Third Avenue to Washington Boulevard. The project will realign intersections at 10th Avenue and Charleston Avenue, widening sidewalks, adding bicycle lanes, installing new lighting, reconfiguring traffic lights and adding greenspace along the Hal Greer corridor, all to make the area more user-friendly for drivers, pedestrians and bicyclists and to make the corridor more attractive.

Center of Excellence awarded \$500,000 to provide mental health training to local communities

FEBRUARY 22, 2023

The Marshall University Center of Excellence for Recovery, housed in the Marshall University Research Corporation, was awarded \$1 million to examine the experiences of transitional-aged youth (TAY) from their own perspective, using both quantitative and qualitative methods to provide a comprehensive view of the diverse pathways that lead to independence.

A particular focus of this project will be to examine the resources, supports and infrastructure that are needed at critical transition points to reduce risky outcomes for youth who are transitioning out of foster care, juvenile detention or other placement facilities. The project will be developed to be inclusive of all youth, including those who have eloped from placements or left home prematurely, and youth with developmental and physical challenges.

The project was awarded through the Administration for Children and Families Congressional Funding. Kathy Paxton, M.S., was selected for the project director role of the Transitional Age Youth Project, working with Amy Saunders, managing director of the Center of Excellence for Recovery, and a highly qualified team of researchers and training specialists.

Paxton has experience in both private and nonprofit health care. She has held leadership positions at international health and human service organizations and as director of substance abuse services in West Virginia. Her experience as director of behavioral health and education at the Ohio State University Center of Excellence, as well as leadership as a national consultant on youth and families, perinatal substance abuse, and equity make her an ideal person to lead this project.

“I’m happy to be back in West Virginia to serve our most important assets—young people—and to work alongside a phenomenal team to discover what is important and what works to achieve positive outcomes,” Paxton said.

For more information on the Center of Excellence for Recovery, visit <https://www.marshall.edu/coefr/>.

New treatment available for patients with pulmonary hypertension

FEBRUARY 22, 2023

Pulmonologists at Marshall Health and Mountain Health Network are the first in West Virginia to treat patients with pulmonary hypertension using a subcutaneous treprostinil pump.

Much like an insulin pump, the treprostinil pump, under the brand name Remodulin®, delivers medication continuously under the skin, helping control the patient's symptoms and improve functional status and quality of life. Marshall Health Pulmonologist Amro Al-Astal, M.D., inserted the first treprostinil pump last month at Cabell Huntington Hospital (CHH), a member of Mountain Health Network. The first cases have shown excellent results and significantly improved patients' symptoms including shortness of breath, heart palpitations and dizziness.

Pulmonary hypertension is a serious condition caused by high pressure in the blood vessels leading from the heart to the lungs. While there is no cure for pulmonary hypertension, patients have access to advanced care close to home. In 2021, Marshall Health established a pulmonary hypertension clinic dedicated to evaluating and diagnosing pulmonary hypertension, as well as providing the specific level of care this condition requires.

“This disease places a significant burden on a patient's quality of life,” said Al-Astal, an associate professor of medicine at the Marshall University Joan C. Edwards School of Medicine. “Pump technology has made significant advances in the last few years. This pump is the most advanced on the market with an excellent safety profile. Through the collaboration of our team of physicians, pharmacists, and staff and the ICU nurses and staff at CHH, patients who have pulmonary hypertension now have access to state-of-art treatment without having to travel far from home.”

Patients must have a referral from a physician to receive care at the pulmonary hypertension clinic. For more information, visit marshallhealth.org/services/cardiology/pulmonary-hypertension-clinic or call 304-691-6841.

About Marshall Health

Marshall Health is the clinical enterprise of Marshall University and its Joan C. Edwards School of Medicine. Marshall Health brings together a comprehensive care team of 420 providers in 75 areas of primary and specialty care. As part of an academic health system, Marshall Health is committed to improving access to care throughout southern West Virginia, Ohio and Kentucky through advanced technologies and research that benefit its patients and the communities it serves. To learn more, visit marshallhealth.org.

About Mountain Health Network

Mountain Health Network is a West Virginia-based not-for-profit health delivery system comprised of Cabell Huntington Hospital, a 303-bed teaching hospital for Marshall University Schools of Medicine, Pharmacy and Nursing; St. Mary's Medical Center, a 393-bed teaching hospital that operates St. Mary's Schools of Nursing, Respiratory Care and Medical Imaging; Hoops Family Children's Hospital, a 72-bed pediatric specialty hospital within Cabell Huntington Hospital; HIMG, an 80-member multi-specialty physician group; and Pleasant Valley Hospital, a 101 acute-bed hospital. Mountain Health is committed to improving the health and well-being of over one million children and adults in 38 counties in West Virginia, southern Ohio and eastern Kentucky through understanding, respecting and meeting their needs. To learn more, visit www.mountainhealthnetwork.org.

Students participate in West Virginia Undergraduate Research Day

FEBRUARY 22, 2023

The 20th annual West Virginia Undergraduate Research Day at the Capitol (URDC) was held Feb. 10. Marshall University was represented by 25 selected undergraduate student researchers from the College of Science, College of Engineering and Computer Sciences and College of Health Professions, as well as some who worked with the Biomedical Sciences program and the Marshall University Institute for Interdisciplinary Research. During the event, all of the students presented their research in form of posters to members of the State Legislature and Executive branch.

Special thanks to the steering committee of the Undergraduate Research Day at the Capitol for their efforts to organize this event (Marshall representatives are Dr. Holly Cyphert, College of Science, and Dr. Sanghoon Lee, College of Engineering and Computer Sciences). The event was sponsored by the West Virginia Higher Education Policy Commission (Science, Technology and Research), West Virginia University, West Virginia State University, the University of Charleston, the Joan C. Edwards School of Medicine and Marshall's Office of Undergraduate Research.

Here are the 25 students who participated in this event:

Kate Perkins (Huntington, WV)

Faculty Advisor: Lydia Bogomolnaya

Generation of bioluminescent Serratia marcescens

Emma Barrett (Culloden, WV)

Faculty Advisor: Joon Shim

Effect of 1-min spin on human endothelial cells at the vertical spin tunnel

Joshua Conrad (Evans, WV)

Faculty Advisor: Nasim Nosoudi

Inducing Chondrogenesis of Mesenchymal Stem Cells Through Electrospraying

Smara Sigdel (Huntington, WV)

Faculty Advisor: Ji Bihl

The protective effects of exercise on cerebral ischemia injury in diabetes.

Seth Jude (Delbarton, WV)

Faculty Advisor: Mark Timmons

Medial Joint Space Width Can Be Reliably Measured During the Anterior Medial Rotation Test

Isabella Gharib (Charleston, WV)

Faculty Advisor: Frank Annie

The Effect of the COVID-19 Vaccines on Individuals Who Develop Incidences of Non traumatic Intracranial Hemorrhages

Tessa Gardner (St. Albans, WV)

Faculty Advisor: Masudur Rahman

Development of a Rapid, Portable, and Inexpensive Biosensor Device to Detect Sepsis

Kaitlyn Legg (Charleston, WV)

Faculty Advisor: Roozbeh (Ross) Salary

Design, Synthesis, and 3D-Biofabrication of Bone Tissue Scaffolds for the Treatment of Bone Pathology

Chloe Duckworth (Flat Top, WV)

Faculty Advisor: Nasim Nosoudi

Effect of Ellagic Acid and Retinoic Acid on Elastin and Collagen Production in HDFs

Raegan Halley (McLeansboro, IL)

Faculty Advisor: Joon Shim

Modeling Aortic Phantoms and Lynch Coils in 3-Dimensional Experimental and Computational Domain

Khaled El-Shazly (Huntington, WV)

Faculty Advisor: Laura McCunn

Characterization Of 4-Pyrone Thermal Decomposition Products Via Matrix-Isolation Ft-IR

Darshan Sangani (Charleston, WV)

Faculty Advisor: John Markiewicz

Preparation and physical properties of dyes based on 2H,10H-anthra[1,9,8-c,d,e,f]-2,7-naphthyridine-1,6,11-trione

Miranda Simpson (Lesage, WV)

Faculty Advisor: Sanghoon Lee

Predicting Timing and Location of HABs on the Ohio River using Machine Learning

Nicole Adkins (Barboursville, WV)

Faculty Advisor: Sanghoon Lee

Interactive multimodal cancer data integration on histopathology and radiology

Joshua Maddy (South Charleston, WV)

Faculty Advisor: Husnu Narman

Virtual Reality Museum Application for the Arts

Hannah Vitalos (Inwood, WV)

Faculty Advisor: Sanghoon Lee

A comprehensive survey of deep learning algorithms in digital pathology

Claire Fulks (Ona, WV)

Faculty Advisor: Sukjoon Na

A Parametric Study of 3D Printing for Recycled HDPE and Nanoclay Composite Filaments

Alexa Hoffman (Ona, WV)

Faculty Advisor: Jayanta Debnath

Design and implementation of a very low power and high voltage AC power supply for Biomedical applications

Andrew Ball (Huntington, WV)

Faculty Advisor: Sungmin Youn

Study on compressive strength of Portland cement concrete with activated carbon

Dustin Darnell (Huntington, WV)

Faculty Advisor: Mark Timmons

Medial Knee Joint Width Differs Between the Valgus Stress and Anterior Medial Rotation Tests

Raleigh Elk (Huntington, WV)

Faculty Advisor: Mark Timmons

A Bout of Throwing decreases Shoulder Strength and Subacromial Space Width in Inexperienced Throwers

Hunter Copley (Huntington, WV)

Faculty Advisor: Mark Timmons

Tibial Rotation Can be Measured Reliably Using a Digital Inclinator and Electromagnetic Tracking

Brettina Jeffers (Huntington, WV)

Faculty Advisor: Mark Timmons

Repeated Throwing decreases the Stability of the Medial Elbow of Novice Throwers

Alan Messinger (Huntington, WV)

Faculty Advisor: Sean McBride

Functionalization of Polycarbonate Membranes with Anionic Azo Dyes

Layne Assif (Hurricane, WV)

Faculty Advisor: Sandrine Pierre

Cardiac-specific Knockout of Na, K-ATPase $\alpha 1$ Blunts Cardiac Hypertrophy in the Mouse

Business students earn second place in international competition

FEBRUARY 22, 2023

Students from Marshall's Lewis College of Business, Brad D. Smith Schools of Business, earned second place in an international sustainability-themed case competition, hosted by Beta Gamma Sigma (BGS) with the Foundation for Environmental Stewardship (FES).

Marshall students Jamison Lewis and Erin Roberts were second-place winners in the Case Competition at the 2023 BGS x SDGs LAB Leadership Conference, which took place virtually Feb. 3-5. Marshall students Maddy Branham and Nick Smith participated as well in the conference, through which students learned about the United Nations' Sustainability Development Goals (SDGs), engaged with business professionals from across the globe and were empowered to become catalysts for change in their communities.

The Case Competition had 17 teams of two to five students, each submitting a written action plan strategy and B Impact Assessments for a fictional business, LAB Inc., to meet sustainability requirements and qualify for the B Corp Certification. An organization's B Impact Assessment is a measure of its social and environmental performance.

Lewis and Roberts were part of a team of five, including three students from another university.

"It was a great networking experience for me. Our five-person team worked very well together, and I'm extremely proud that we were able to earn this amazing win at the international level," Lewis said.

"I love seeing when our students make the most out of opportunities," said Dr. Ben Eng, faculty advisor of Marshall University's Beta Gamma Sigma chapter. "This particular opportunity is an especially important one because this conference is all about how the business leaders of tomorrow must be equipped with not only the ability to compete and succeed financially, but also to simultaneously make a real and positive difference in society. I'm proud that Marshall students are leading the way in high-impact leadership."

Beta Gamma Sigma is the official honor society of the Association to Advance Collegiate Schools of Business—the premier business school accrediting body in the world. Membership is by invitation only and is based on class rank. Marshall University's chapter of Beta Gamma Sigma has been recognized as a "high honors" chapter for the past five years.

To learn more about Marshall University's chapter of Beta Gamma Sigma, visit <https://www.marshall.edu/cob/beta-gamma-sigma-2/>.

Student passes highest proficiency test in Japanese

FEBRUARY 14, 2023

Senior Japanese student Ryan Green (pictured) has passed the Japanese Language Proficiency Test at the N1 level, the highest level, which is recognized all over the world. Green is currently enrolled in JPN 490 for his capstone project. He studied abroad at Kansai Gaidai in Osaka, Japan, during the fall 2022 semester.

While in Japan, Green took the JLPT N1 level test. The JLPT test has five levels, the easiest being N5 and the most difficult being N1. N4 and N5 measure the level of understanding of basic Japanese mainly learned in class. N1 and N2 measure the level of understanding of Japanese used in a broad range of scenes in actual everyday life.

At Marshall, Green has studied with Dr. Zelideth Rivas, Dr. Natsuki Anderson and former faculty member Ryan Lidster.

Minority Health Institute joins Cabell County Quick Response team to offer reactive, preventive care

FEBRUARY 22, 2023

The Marshall University Minority Health Institute is playing a role in a new effort to help the Cabell County Quick Response Team to provide not only reactive care for overdose victims, but also to provide preventive care. Community outreach events are being hosted outside the Huntington City Mission Chapel, at 624 10th St., the second and fourth Thursday of each month at 4 p.m. Services that are currently offered include testing, vaccinations and service referrals. For more on the program, view the article that appeared earlier this month in the [Herald-Dispatch](#).

Marshall Health expands dermatology services in Putnam County

FEBRUARY 22, 2023

Marshall Health unveils its newly renovated dermatology clinic and welcomes [Shane E. Cook, M.D.](#), and [Ashley Grimmert, PA-C](#), to its multispecialty clinic at 300 Corporate Center Drive in Scott Depot.

Dedicated clinic space for dermatology on the third floor that includes new exam rooms, a procedure room and dermatology lab is the latest expansion by Marshall Health in Putnam County.

Cook, a board-certified dermatologist who was named associate professor and chair of dermatology at the Marshall University Joan C. Edwards School of Medicine in 2022, practices comprehensive dermatology. He specializes in skin cancers, acne, psoriasis, eczema and rosacea. Cook is certified by the American Board of Dermatology, a fellow of the American Academy of Dermatology and vice president of the West Virginia Dermatologic Society.

Grimmett, a board-certified physician assistant, joins Marshall Health with more than 16 years of experience in general dermatology. She is experienced in the diagnosis, treatment and management of a wide array of dermatological conditions including acne, warts, psoriasis, eczema as well as skin cancers and preventive screenings. She has a special interest in pediatric and adolescent dermatology. Grimmert earned both her undergraduate and master's degrees from Alderson-Broaddus College in Philippi, West Virginia. She is certified by the National Commission on Certification of Physician Assistants.

Cook and Grimmert are accepting new patients; for appointments and referrals, call Marshall Dermatology at 304-691-1833.

Photo: [Ashley Grimmert, PA-C](#) (left), and [Shane E. Cook, M.D.](#), provide skin care for all ages at Marshall Dermatology's expanded clinical space at Marshall Health-Teays Valley located at 300 Corporate Center Drive in Scott Depot.

New medical student scholarship established for Wood County students

FEBRUARY 22, 2023

Alumnus J. Jeffrey McElroy, M.D., and his wife, Lori, have created a new scholarship at the Marshall University Joan C. Edwards School of Medicine for students from Wood County, West Virginia, and surrounding areas.

Jeffrey McElroy, originally from Lexington, Kentucky, was recruited to Marshall University on a football scholarship. He graduated from Marshall in 1987 with a Bachelor of Science in chemistry, followed by his M.D. from the Joan C. Edwards School of Medicine in 1992. He went on to complete his orthopaedic residency at Mount Carmel Medical Center in Columbus, Ohio. He has been practicing in Parkersburg, West Virginia, at Parkersburg Orthopedic Associates Inc. for the past 22 years.

Now, following in his father's footsteps is their son, Ian, who will graduate with his Doctor of Medicine from the Joan C. Edwards School of Medicine in 2023.

"Marshall has been a significant part of my life, first as an undergraduate student and then offering me the opportunity to become a physician," Jeffrey McElroy said. "We feel honored to support the School of Medicine and help future physicians with their debt. Not only have I been part of the Marshall family, two of our children, Ian and Abigael, have had an equally rewarding experience."

The *McElroy Family Scholarship* is designated for an entering first-year medical student from Wood County, and is renewable for up to three years. Second preference will be given to a student from Pleasants, Ritchie, Wirt and Jackson counties in West Virginia. The scholarship is renewable for three additional years, pending normal academic progress.

For more information or to make a gift to the Joan C. Edwards School of Medicine, please contact Linda Holmes, director of development and alumni affairs, by phone at 304-691-1711 or by e-mail at holmes@marshall.edu. For news and information about the Joan C. Edwards School of Medicine, follow us on Twitter [@MUSOMWV](https://twitter.com/MUSOMWV), like us on [Facebook](https://www.facebook.com/jcesom) or visit jcesom.marshall.edu.

Photo: Dr. Jeffrey McElroy (left), and his son, Ian, at the latter's white coat ceremony in 2019.

Faculty receive grants from West Virginia Department of Arts, Culture and History

FEBRUARY 22, 2023

Two faculty members from the School of Art and Design, Associate Professor Hanna Kozlowski and Professor Sandra Reed, received grants from the West Virginia Department of Arts, Culture and History to support creative work and promote lifelong learning and healthy aging.

Kozlowski received funds to support her research into wycinanki, a Polish cut-paper folk art. Through the “Living Traditions: Folk Art Project Support for Artists,” Kozlowski’s research builds upon work begun last fall while she was in residence at Sala752 in Rzeszow, Poland. Like Appalachian folk art, wycinanki depicts scenes and figures from nature, agriculture and the home. As a second-generation Polish American, she continues to incorporate wycinanki in her creative work and is particularly interested in its connection to the laboring class.

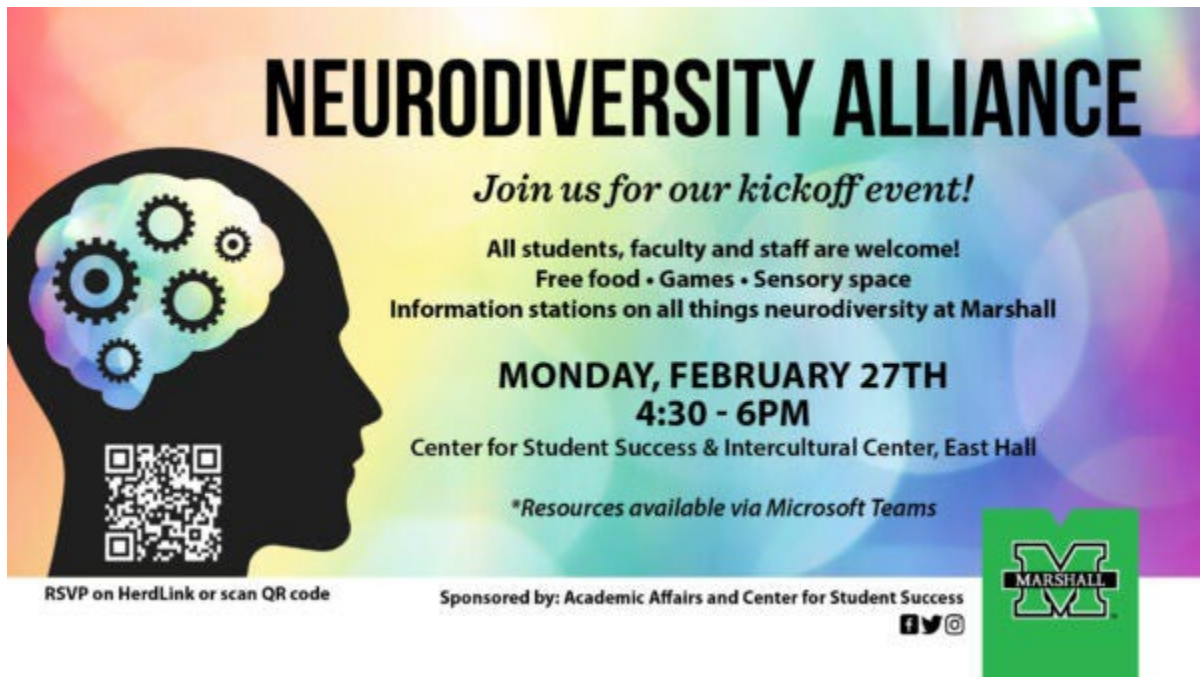

Reed received funding under the Creative Aging for Lifelong Learning (CALL) program and will use funds to employ Marshall art alumni to provide art instruction for adults ages 55 and older in four area senior centers. Alumni include Barb Lavalley Benton (Class of 2022), Shyanna Ashcraft (Class of 2021), Sophia Celdran (Class of 2021) and Karen Fry (Class of 2019). The Creative Aging for Lifelong Learning grant focuses on teaching new artistic skills over multiple sessions, social engagement, mental stimulation and self-expression. This grant funds activity during Spring 2023 and culminates in showcasing participants’ work at each participating center.

At the Marie Redd Senior Enrichment Center in Huntington, a needle felting workshop has been offered, which continues through March 13, and other weekly workshops begin Wednesday at the Ceredo Senior Wellness Center and the Wayne Nursing and Rehabilitation Center and go on Feb. 22-March 29. A fourth workshop will be offered as well.

Two of the participating senior centers are in Wayne County, a county where there are more residents who are 65 and older than those younger than 18, Reed said.

“By 2034, it is estimated that more than 30% of the American population will be 65 and older,” she said. “Motivated by its mission and statistics such as these, Marshall began a healthy-aging initiative in 2021, beginning with the formation of an interdisciplinary committee. What I’ve learned as a member of this committee inspired me to write a CALL program grant not for myself, but as a pilot training program for our art alumni. Many visual art majors are interested in giving back to their communities.

“I designed my CALL grant to build capacity for our art alumni to work as Teaching Artists in their hometown communities through the creation of relationships and familiarity with how arts workshops might be implemented,” Reed continued. “Ideally, either the art alumni or the senior centers will independently apply for CALL program or other grant funding in the future to continue what they have begun. Working as a community Teaching Artist is just one of many forms of employment for a visual art major. This grant draws upon my experience as a teacher and practicing artist, my knowledge of community needs and values, what I have learned about facets of well-being in the older-adult community and ongoing relationships with our alumni who are engaged citizens.”

The poster features a colorful background with a rainbow gradient. On the left, there is a black silhouette of a human head in profile, facing right. Inside the head, several gears of various sizes and colors (blue, green, yellow) are visible. Below the head is a QR code. The text is centered and right-aligned. At the bottom, there are logos for social media and the Marshall University logo.

Tedeschi Trucks Band comes to the Keith-Albee Feb. 28

FEBRUARY 22, 2023

Tedeschi Trucks Band, America’s premier rock-and-roll big band, touring in support of their new album, *I Am The Moon*, will rock the Keith-Albee Performing Arts Center Tuesday, Feb. 28 at 7:30 p.m. This Grammy Award-winning, 12-piece rock and soul powerhouse holds a well-deserved reputation as one of the best live acts touring today. Tedeschi Trucks Band will be joined by special guest Jack Broadbent.

Led by the husband/wife duo of guitarist Derek Trucks and singer/guitarist Susan Tedeschi,

“two of the best roots rock musicians of their generation” (*NPR*), TTB is known for its world-class musicianship and contemporary blend of a wide range of American musical influences that also define their extensive catalog.

I Am The Moon, TTB’s acclaimed fifth studio release “explodes with joyful, powerful and positive music (*Guitar Player*).” Written while off the road during the pandemic, *I Am The Moon* finds them “at their finest and most adventurous” (*NPR*) and captures a prolific and collaborative songwriting period for TTB that was inspired by an ancient poem of star-crossed lovers. *I Am the Moon*, released in 2022, includes four albums, *I. Crescent, II. Ascension, III. The Fall, IV. Farewell* and four companion films – delivering more than two hours of music that unfold across a robust tapestry of soul, rock, blues, funk, roots and Eastern explorations that propel the treasured American ensemble into new and thrilling creative territory.

Since forming in 2010, TTB’s caravan has traveled countless miles to bring their music to audiences around the world. From sold-out multi-night residencies across America to barnstorming tours through Europe and Japan to their flagship *Wheels of Soul* annual summer tour, the band’s shows are an eagerly anticipated highlight of the live music calendar and “nothing short of exhilarating” (*Salon*). Whether on stage or in the studio, when these supremely talented artists get together, it’s a musical experience of profound quality.

Tedeschi Trucks Band is Susan Tedeschi (guitar, vocals), Derek Trucks (guitar), Gabe Dixon (keyboards, vocals), Brandon Boone (bass), Tyler “Falcon” Greenwell (drums), Isaac Eady (drums), Mike Mattison (vocals), Mark Rivers (vocals), Alecia Chakour (vocals), Kebbi Williams (saxophone), Ephraim Owens (trumpet) and Elizabeth Lea (trombone).

Sponsors for the TTB concert include ZMM Architects, Radiology Inc., David and Kim Robinson, Wilmlink Smith Cline, The Chirico Family, Ransbottom Law Office, Reger Funeral Home, Serucell, Dr. Chris Jensen, Dr. Karim and Mrs. Josi Boukhemis, Dr. Tom and Maureen Jung, and Simms Investment Management, along with, iHeart Radio, WSAZ and the Herald Dispatch.

Tickets for Tedeschi Trucks Band are \$109.39/98.42/87.45/76.49. To purchase tickets, call the Marshall Artist Series at 304-696-6656, or order tickets online at [ticketmaster.com](https://www.ticketmaster.com). You may also visit the series’ box office location in the Joan C. Edwards Playhouse on the Huntington campus anytime Monday through Friday from noon to 4 p.m.

AppsAnywhere allows access to software from any device

FEBRUARY 22, 2023

Software streaming service AppsAnywhere combines Marshall's vision with the 21st-century student's expectations – access to any app on any device, at any time from anywhere. This service transforms the technology and learning experience and allows the university to take advantage of a true BYOD (bring your own device) mindset.

This unique service allows users to access software from their own devices as well as campus computers, while reducing the operating costs and maintenance associated with traditional solutions. AppsAnywhere is easy to use, is web-based and provides access to the software applications required for courses without the need to download or purchase them. AppsAnywhere works with Windows, MacOS, iOS, iPadOS and Android.

With AppsAnywhere, Information Technology can offer a wider range of software across the university and even on personal devices. Software will no longer be constrained to specific labs or classrooms.

“AppsAnywhere is a powerful tool that can be tremendously beneficial to university students,” Jody Perry, Marshall’s Information Technology senior director of client services, said. “Imagine being a commuter student who drives 45 minutes to campus just to complete a minor task using a piece of software only available in a campus computer lab.”

“If faculty members want to utilize a particular piece of software, we can help,” said Perry. “We’re adding additional software titles to the library all the time. Contact the IT department, and we can assist with installing any properly licensed software.”

First-time users can learn more and follow the getting started guide available at www.marshall.edu/it/appsanywhere or go directly to appsanywhere.marshall.edu to use the service.

*Remembering loved ones

Marshall to host Career Expo, Educator Expo March 8

FEBRUARY 11, 2023

Marshall University's Office of Career Education will host two job fairs — a Career Expo and an Educator Expo — from 3 to 6 p.m. Wednesday, March 8, in Marshall's Memorial Student Center.

The Career Expo is bringing over 140 companies across all fields to the Huntington campus to hire for jobs and internships, including Toyota Motor

Manufacturing West Virginia; Cabell Huntington Hospital; the FBI; FDIC; the Greater Huntington Park and Recreation District; J.H. Fletcher & Co.; Kelley Galloway Smith Goolsby; Marathon Petroleum Corporation; Mountain Care Network; Pepsi; and Nucor. A complete list of employers who will be on hand can be found at <https://www.marshall.edu/careereducation/career-expo/>.

The Educator Expo will take place in Room BE5, in the lower level of the Memorial Student Center. It will include representatives from 27 school districts in this region and beyond looking to hire teachers, speech pathologists, school counselors, nurses and wellness employees.

“I encourage those who are coming to the events to be dressed professionally, have their resumes, and be prepared with a 30-second ‘commercial’ about themselves,” said Jennifer Brown, assistant director for Student Engagement and Marketing in the Office of Career Education. “Even when standing in line, it’s important to talk with others and be open. Networking is an important aspect to finding a career.”

To help Marshall students prepare, the Office of Career Education is teaming up with JCPenney at the Huntington Mall to offer JCPenney Suit Up from 3-6 p.m. Sunday, March 5, at the Huntington Mall. The JCPenney Suit Up event provides Marshall students, faculty and staff with a 30% discount on business attire purchased during the event, including an additional 30% off discount on sale-priced professional wear. Staff members from the Office of Career Education and store employees will be on hand to offer insights into the latest career fashion trends, as well as the basics of appropriate business dress.

Both expos are open to all, with sponsorship from Marshall's Office of Career Education. For further information, visit career@marshall.edu or visit www.marshall.edu/careereducation.

WEDNESDAY, MARCH 8TH

3:00 – 6:00 P.M.
MSC, DON MORRIS ROOM

Over 140 companies will be on campus to hire for internships and full-time positions.

- Networking
- Research Companies
- Internship Opportunities
- Full-Time and Part-Time Jobs Available

#MUUCareerExpo

ARE YOU WORKING ON A MAJOR RESEARCH PROJECT?

Such as:

- Annotated Bibliography
- Analytical or Comparative Essay
- Argumentative, Persuasive, or Informative Speeches
- Capstone
- Thesis or Dissertation

YOU DON'T HAVE TO DO IT ALONE!

Librarians can help, even during Spring Break*, with any step of the research process, such as:

- choosing a good topic
- finding credible, scholarly sources
- crafting citations and reference lists

*Spring Break hours differ from regular semester hours

Discover all the ways to connect with a librarian:
www.marshall.edu/library/ask

View our hours on the library homepage:
www.marshall.edu/library

www.marshall.edu/library

The next regular issue of *We Are...Marshall* will be distributed March 1, 2023. Please send items for consideration to WAMnewsletter@marshall.edu by 5 p.m. Monday, Feb. 27, 2023.

To read the content of this newsletter online, please click on the following link: www.marshall.edu/wamnewsletter/February-22-2023.
