### Pikes Planning Weekend Use Of Fire Truck

By BRENDA FAULKNER  
Staff Reporter

Pi Kappa Alpha's newest addition, a 1921 LaFrance fire truck, will make its debut tomorrow night as it revs up its engines to take prospective rushers to the Bowery Ball.

The Pikes bought this fire truck, the national symbol of their fraternity, from the Burlington Volunteer Fire Department, for a bid of \$260. Jim Farley, Rock Creek senior and Pike president, reported that the pledge project last year was to raise funds for a truck. After the necessary money was raised, however, there was the small problem of locating a vehicle. It was only recently that this one was found.

Farley said that the brothers have been hard at work this week getting the truck ready for its new duties. As the truck originally was a pumper model, the tanks had to be cut off. And naturally it had to be given a new coat of fire-engine red paint.

There were some 200 feet of hose and five extra tires thrown in with the deal, Farley said. There are plans to equip the unit with antique bells and a hand-cranked siren as well as the required ladders.

The truck is big enough to carry 35 to 40 Pikes to all future ball games and fraternity functions.

**Pikes Ready For A Hot Time**

THE PIKES are ready for fire with their new fire truck. Jim Farley, Rock Creek senior, and Benny Williams, Huntington senior, are surrounded here by Ralph McBrayer, Williamson senior, Jim Hamilton, Williamson senior, Mike Chambers, Ravenswood sophomore, George Wardell, Tenafly, N. J. junior, and Bill Huffman, Gassaway sophomore.

### Panhellenic May Ask For House Decorations

By GARY KEARNS  
News Editor

Floats will probably return to Homecoming this fall. And the house decorations probably will, too.

The Interfraternity Council voted 8-2 Monday afternoon to bring back the colorful parade extravaganza to the 1964 Homecoming celebration. This was no surprise. It had been thought for several months that the council would act just as it acted Monday.

Now it is up to the Panhellenic Council to decide whether or not it is in favor of putting the house decorations back into the annual festivities. And this body is expected to follow the IFC in making the traditional Homecoming traditional, again.

But the IFC's ruling on the return of the floats isn't necessarily the last word on the subject.

John M. Sayre, the director of development and alumni affairs, said that the council's vote was only its own expressed opinion on the matter, and that it was really up to the Homecoming Commission to decide.

Mr. Sayre added that if any conflict develops within the Homecoming Commission concerning what will or what will not be included in the Homecoming celebration, the Student Government—the senate—would step in.

And if the problem could not be settled there, the university president would be called upon to resolve the matter.

But all of this is hypothetical. No problems are expected. Whatever IFC or Panhellenic say, usually goes.

The Interfraternity Council, which is the representative body of all campus social fraternal organizations, being made up of one representative from each group, plus the group's president, was responsible for abolishing the floats in last year's activities.

According to Ralph McBrayer, Williamson senior and a member of Pi Kappa Alpha social fraternity, the members of the council thought that Homecoming, 1963, "was fine," but that something very definitely was

missing, referring to the absence of the floats.

McBrayer also said that most of the council members believed that the idea of using the old cars in last year's program was a good one.

And last fall, when the first talk of bringing back the floats in 1964 was just beginning to filter throughout the campus, Tom Robinson, Gary senior, and a member of Kappa Alpha Psi social fraternity, said that some IFC members were so adamant in their desire to bring back the floats that they stated that they would have their own Homecoming parade this year, which would be composed of floats and which would follow the main Homecoming parade down Fourth Avenue. That is, if the floats had not been brought back this year.

Up until last year, when the only float in the parade was the queen's float, all the campus social fraternities entered floats for competition, and all the campus social sororities worked on the decorations of the sorority houses, which were also judged.

The winning fraternity in the float competition was always responsible for building the queen's float the following year. Thus, Sigma Alpha Epsilon won the best float award year before last, so it was commissioned to construct Miss Marshall's throne-on-wheels in last year's celebration.

In 1963's festivities, antique cars took the place of floats—and made up for the lack of house decorations, too.

The cars were assigned to any campus dormitory or organization which applied for one. A slogan was to have been composed to fit the year the car was made, and the car's occupants were to have been dressed appropriately to the era of the car, itself.

The cars, which were assigned to both fraternities and sororities, were judged, along with signs welcoming visiting alumni to the campus.

These particular signs were placed on the front lawns of the fraternity and sorority houses.

Other welcoming signs, being done by clubs and other groups, were placed on campus. Most of these were illuminated.

Sayre said that he personally did not have a preference on floats one way or another, but he did say that one or two fraternities had quite a bit of difficulty financing them.

## Dr. Richard Hey Is Main Speaker For Life Planning Week Program

Main speaker for Life Planning, Feb. 23 and 24, will be Dr. Richard N. Hey, an educator and counselor in the field of marriage

**RICHARD N. HEY**  
... Guest Speaker

and family relations.

Dr. Hey will speak at a Feb. 23 dinner, beginning around 5:30 p.m. in University Dining Hall, on the topic "Love, Sex, Morality." Student Body President Ken Gainer will be master of ceremonies and Donna Sturgeon, Pt. Pleasant junior, will be banquet chairman. Tickets will cost \$1.

At a convocation Feb. 24 in Old Main Auditorium, beginning at either 6:30 or 7 p.m., Dr. Hey will discuss "Is Love Enough?"

After the convocation various "Fireside Chat" speakers will appear at dormitories and Greek houses to discuss topics related to Life Planning themes. These speakers have not been named yet.

Dr. Hey is an associate in Family Study for the Department of Psychiatry, School of Medicine, at the University of Pennsylvania and is supervisor of Education for

Marriage and Family Living for the Marriage Council of Philadelphia. He also teaches at Bryn Mawr and Swarthmore colleges and at Philadelphia Divinity School.

He received his Ph. D. in Education for Marriage and Family Life from Columbia University following graduation from Berea College and Andover Newton Theological School. He has served as a special consultant to Air Force chaplains in Europe and North Africa in leading workshops on Christian education and the family.

In 1957 he was leader of a marriage clinic for the U. S. Coast Guard Reception Center and also was consultant to the Pennsylvania Governor's Committee on Children and Youth.

Dr. Hey has published several articles on marriage and the family. He is a member of the

American Association of Marriage Counselors, the National Council of Family Relations, and the American Academy of Political and Social Sciences. He is married to a teacher and has three children.

The annual Life Planning program is being coordinated by Janet Trumbo, Charleston senior, while Dr. Harold E. Walker, vice president of academic affairs, is faculty adviser.

Committee members include: Carol Hubbard, Williamson freshman, secretary; Patricia Crans, Huntington freshman, publicity chairman; John Jones, Follansbee senior, Fireside Chat chairman; Mike Leckie, Huntington junior, Convocation chairman; Tom Ullum, Nitro junior, hospitality chairman; Rick Josephs, Butler-Pa., junior, financial secretary, and Miss Sturgeon, banquet chairman.

### Big Green Downed By Bobcats 98-82

Ohio University's Bobcats defeated the Big Green Wednesday night at Athens by a score of 98-82. Bill Francis was high scorer for Marshall with 29 points.

The victory gave OU Coach Jim Snyder his 200th victory.

Editorial Opinions

Stanley AND Sage  
Steamer Sayings

By KAY SAGE and SAM STANLEY

The trip to Germany is the talk of the campus. Many changes have taken place and we'll bet that more are to come.

The dates and location for take-off and landing have been altered. Students will leave New York June 1 en route to Frankfurt, Germany, and return to New York on Aug. 30. Graduating seniors are really in a dilemma with exam week followed by commencement on May 31 and leaving from New York the next morning.

First plans were to leave from Pittsburgh, Pa., but complications arose and the plane could not return there in August. So, an added expense of \$40 arose for those wishing to schedule a round-trip charter flight between Huntington and New York. However, students are not required to take the plane, only to be in New York three hours before tak-off.

As plans stand now, a 720B jet plane has ben secured which seats 130 persons. The initial plans were for a 707 jet which seated 148. A bigger plane may be scheduled at a later date for students on the 20-name waiting list which did contain 35 names.

So, the price has now been raised from \$250 to \$290 because of the smaller number of persons who will be able to take the plane. And, prices can go up if students drop out. . .

On the plus side of the ledger, extra jobs are now available in Austria and Switzerland and plans are progressing. Language groups are meeting for two hours a week, which will cost \$5 for the four-month term; passports are being processed, which will cost \$10; smallpox and typhoid shots are now being offered free at the health clinic; and students are receiving applications for jobs ranging from farm work to waitresses in resort areas.

This is a great opportunity for students who want to go abroad. Let's hope that the plane gets off the ground.

Here and There:

Fences put up around campus to prevent cowpaths were certainly needed. It's too bad that some people have torn a few down. . .

There are plenty of student directories left. Too many to be exact; and if they don't begin to sell, there will be no student directories next year. . . .

There are a few water fountains around school, especially the one on the third floor of Old Main, which just doesn't give enough water . . .

Results of the English Qualifying Exams are scheduled to be posted tomorrow in Old Main. The clinic for all those who weren't fortunate to pass the exam begins Monday. Lots of luck. Thank heavens they've finally announced the Book of the Year. You have four months to read it . . .

The word's circulating that there will be a two week break between semesters next year. Where the time will be made up is not known by our source.

It looks like floats at Homecoming next year . . . Hoorah.

Bob Puthoff, the chief of the New Men's Dorm, will become a papa later on this year. Bob's done a real good job in running the dorm this year. Congratulations "Papa" Puthoff.

Campus Inquirer

By CAROL FOX  
Staff Reporter

Question: Did you encounter any problems while registering?

Stan Witofsky, Brooklyn, N.Y., Junior:

"I thought the pre-registering process was excellent. I received all the classes I wanted at the right time when I registered. It could have been luck."

Sandy McBane, Columbiana, Ohio, graduate student:

"Four of my classes were closed but they opened them because I was classified as a special student. In comparing the registration here to Milligin College in Tenn., I felt for the number of students it was more efficient at Marshall."

Patti Johnson, Huntington freshman:

"Registration seemed very much improved. I had an early time card."

Art Fornari, Wellsburg senior:

"Since I switched colleges, I registered in Arts and Sciences

Witofsky

McBane

Fornari

Johnson

for the first time. It was a lot tougher than the College of Applied Science."

Forum Speaker Will Discuss Latin Affairs

Dr. Mario Amadeo, former minister of foreign affairs in Argentina, will speak at the Community Forum at 8 p.m. on Tuesday. His subject will be "What Next in Latin America?"

In April of last year, Dr. Amadeo resigned his post as permanent delegate to the United Nations because of what he regarded as the illegal seizure of his country's government by a military group. Dr. Amadeo served in the U.N. with great distinction.

He was chairman of the Commission of Human Rights, represented the U.N. as a member of the Conciliation Committee for the Congo in 1961, and was vice chairman of the Committee on Outer Space.

Dr. Amadeo graduated from the University of Buenos Aires and entered his country's foreign service in 1938. He has since served at the Vatican, in Chile and Brazil, and has been a delegate to various international and regional conferences. He has written several articles and books which have had wide circulation throughout the Spanish-speaking world.

Chemistry Seminar Set For Tuesday

The chemistry seminar will be held Tuesday at 4 p.m. in Room 320 of the Science Hall.

W. H. Rhodes will speak on "A Brief Discussion of Some of the Newer Organic Pigments" and Mr. B. C. Mays will speak on "The Role of the Analyst in Modern Pigment Technology."

Mr. Rhodes is manager of the Technical Service Dept. of Standard Ultramarine Co. Mr. Mays is supervisor of the Analytical Section of the same company.

The structures of several of the newer pigments and methods of examining for quality and quantity will be discussed.

A Slice Of West Virginia's History

AN HISTORICAL MARKER bearing the details of Marshall's history from its birth as an academy in 1837 to the present university status was erected last week on Route 60 at the intersection of Fifth Avenue and Sixteenth Street. University directional signs have also been placed on Fifth Avenue at Elm and at Eighteenth Streets.

YAF Movie Slated February 20; Group Planning Publication

The Young Americans for Freedom (YAF) will present a movie, "Operation Abolition," narrated by Fulton (Buddy) Lewis III, Feb. 20 at 7:30 p. m. in Science Hall Auditorium.

Mr. Lewis, formerly an investigator for the House Committee on UnAmerican Activities, is now a Young Americans for Freedom (YAF) field representative.

YAF President, Rick Diehl, Huntington junior, and YAF State Chairman, John L. Jones, Follansbee senior, are organizing "Mountaineer Freeman," designed expressly for Marshall students.

This politically conservative publication will contain articles dealing with both national and local YAF matters. Authors of the articles range from Sen. Barry Goldwater to Rich Diehl. The "Mountaineer Freeman," to be published monthly free of charge, will first appear sometime this month.

In the YAF attempt to combat communism, it emphasizes the need for installment of an objective study of communism in lower West Virginia schools.

YAF feels, however, that a Communist speaker on campus (unless in a debate) would be detrimental to Marshall students. At present the YAF is examining bills passed in Ohio and North Carolina prohibiting Communist speakers on campuses of state-supported institutions in order to see how these bills were written.

Contributions from industrial concerns and other private interests in this area support the MU-Huntington YAF.

Annual membership dues of \$3 are sent to National Headquarters in Washington, D. C., which provides services for the MU-Huntington chapter. Such services include newsletters, films, dinners and national conventions.

Twenty Marshall students are members of the YAF chapter here.

Scabbard And Blade Tapping Ceremonies

EIGHT PLEDGES of Scabbard and Blade, national military honorary, are shown at tapping ceremonies symbolizing their acceptance into the organization. Cadet Col. Ted Booth, Huntington senior conducts the activity as Col. Patrick Morgan, professor of military science, looks on. The pledges are: (from left) Tom Milton, Huntingtonn junior; Charles Mosser, Huntington junior; James Lichtenstein, Huntington junior; Ron Gainer, Bridgeport junior; Charles Chapman, Huntington junior; John Fisher, Chesapeake junior; and Charles Ross, Huntington junior.

Roaming The Green

By BRENDA FAULKNER  
Staff Reporter

Ye olde social whirl is under-way once again. Tomorrow night will find Alpha Sigma Phi and Kappa Alpha combining forces for a very British "Beatle Blast." The bi-fraternity informal will be at Riverside Country Club from 8 p. m. to midnight. In addition to the conventional music of the Parliaments, there may also be some special entertainment in the form of the "Los

Beatoles," a group which claims to sing Spanish ballads, such as "Let Me Hold Your Hand." The Alpha Sig's and KA men will wear conventional Beatle attire and their dates will dress as Britishy as possible. We will then travel from merry olde England to the ruins of Rome for Lambda Chi Alpha's "Roman Holiday" informal at the fraternity house tonight from 8:15 p. m. until 12:15 a. m. A Roman Emperor and Empress will be crowned.

Pi Kappa Alpha will board its fire truck to go to the Bowery Ball tomorrow night at Stark's Floortown. The brothers and dates will be dressed in true Bowery fashion. The informal is scheduled for 9 p. m. to 1 a. m. Victory or not, the Sig Eps will be at Zips on Route 52 for a victory party after the game tomorrow night. One of the Sig Ep brothers, David Groves, Huntington junior, was recently married to Christy Copeland, Huntington junior.

## Campus Briefs

### BOWLING ANYONE

Bowling has become a part of the intramural program on campus, and with it the chance for anyone interested, whether amateur or professional, to join the new league being formed, and destined to begin in two weeks. To become a part of this program, sign your name on the bulletin board in the Student Union, or on the board in the lounge of the New Men's Dorm. There will be seven members on each team. Five of these members will be regulars and each team will have two substitutes. The location of the league is undetermined, but a definite establishment will soon be chosen.

### AUDITIONS SET

Auditions for "The Stephen Foster Story," a summer musical, will be held next Tuesday at 8 p. m. in the Huntington Room of the Hotel Prichard.

The outdoor musical will play the entire summer in Bardstown, Ky. A company of 50 will be needed. Salaries will range from \$50 to \$150 per week for the performers. Producers are seeking a new singing talent to play the title role. Four other individual singing positions are available. Also needed are tenors and altos for the chorus.

### RESEARCH PROJECT

Neil L. Gibbins, associate professor of Education, published "Selecting a Research Project" in "West Virginia School Journal," February, 1964. He discussed points to be considered when selecting a research topic: topic selection, preparing the project proposal and research references.

### Number Of Men In Dorm Climbs

The Men's Residence Hall has fewer vacancies this semester than last, a condition termed "unusual" by Stanley Shaw, dean of men.

This upswing in occupancy can be attributed mainly to the improved study program in the dormitory. A lounge area has been erected in the basement supplementing the main lounge on the ground floor. The result is that the upper floors are now quieter and more conducive to studying.

There are other improvements being considered. Carpeting and acoustical ceilings may be added in the hallways. More vending machines will certainly be installed if they continue to be popular with the residents, and an improved inter-mural participation program is being discussed and may go into effect soon.

### Kappa Pi Meets Friday At 3 P. M.

Kappa Pi art honorary will hold a meeting in Room 209, Northcott Hall, at 3 p.m. Friday according to Mr. Jack Smith, Art Department instructor. All members are urged to attend in order to discuss and plan activities for the remainder of the semester.

Officers elected for this semester are: president, Paige Estlar, Fort Lauderdale, Florida, Junior; vice-president, Pat Parker, Huntington Junior; secretary, Connie Rees, South Point, Ohio, Sophomore, and treasurer, Catherine Stanley Wagner, St. Albans Junior.

### NEW DEGREE OFFERED

The new forestry program at Marshall has prompted inquiries pertaining to its curriculum from both students and outsiders, says James C. Shires, assistant director of admissions.

The program includes three years of study at Marshall University and two years at Duke University. At the end of the fourth year a bachelor of science degree in botany will be given by Marshall, and at the end of the fifth year Duke will award the master of forestry degree.

### HONORARY MEETS

Gamma Theta Upsilon, geography honorary is holding a meeting on Tuesday at 11 a.m. in room 120 of the Science Building. Mr. Robert Chilcote who is an Industrial Analyst for the C & O Railroad will be the guest speaker.

### FACULTY TO MEET

The next general faculty meeting will be held in Old Main Auditorium at 4 p. m. Feb. 18. President Stewart H. Smith announced that the purpose of the meeting was to present information on the proposal for a doctoral program in chemistry.

### VETERANS' PROGRAM

All students with six months or more active duty in military service are urged to contact John Hill, Mallory sophomore, at 1706 Sixth Ave., or call his home after 5 p. m. (525-5257). The membership and social committees of the Veterans' Club would like to have a list of all veterans on campus in order to keep them posted on veterans' affairs.

### And Here's Another Book

DR. CHARLES MOFFAT, professor of history and chairman of the Honors Commission, looks on as Ann Lenning, president of Pi Delta Phi, national French honorary, presents Vicki Smith, Nitro senior and chairman of the Fagus book drive, with another book for the Honors House library. Dr. Rollins, assistant professor of English and co-ordinator of the Interdisciplinary Honors Seminar, is pictured at right.

## Letter To The Editor

Dear Editor:

Since I'm just a small insignificant student, I expect to be stepped on by the administration from time to time. These times are usually spontaneous and unplanned as far as who will receive the force of a policy enacted by our administration, or leaders in the state capital. There is one time though when

all students get the short end of the stick; that is when we are forced to pay the prices for books that in many instances are bordering on the ridiculous; i.e., a pamphlet for shorthand transcript which goes for \$1.75.

It seems to me that a little more competitive shopping on the part of the bookstore, and possibly an organization to take an active interest in combating

the inflationary situation that exists by setting up a student book store (which could operate the first couple of weeks of a semester), would at least put a competitive light on a monopolistic situation in the so-called competitive economy we're so proud of.

# The Sports Corner

By JERRY REED  
Sports Editor

Rebuilding is the key to athletic fortunes at MU concerning the future and recruiting is the big step in this rebuilding program.

Currently the Athletic Department is in the process of attempting to attract the top names in basketball and football to the Big Green campus in hopes of latching on to some outstanding talent for the coming years. When you take a look a few years back, when the football team was having its ups and downs, things sort of looked doubtful when considering the upcoming seasons. But now Coach Charlie Snyder has himself a winner and this has certainly paid off in the recruiting program. It can be seen that these two factors go hand in hand. With a winner you get the top prospects and with the top talent you get the winner. That is including some hard work.

Already this season Coach Snyder has lured some of the state's top players to the Big Green huddle and along with the present good fortunes, things should be looking up in the coming gridiron wars.

Basketball is the main attraction at the present and the basketball coaching staff is now in the process of going after some of the most sought after players in the state. Two of West Virginia's biggest name hoopsters attended the Western Michigan game last Saturday.

Weirton's Ron Williams, All-State and All-American who led his team to the Class AAA championship last year, and 6-6 All-Stater David Reaser from St. Albans were guests of the Athletic Department. It is well known that MU would like to have these two players along with quite a few other colleges and universities. Coach George King of West Virginia University said he could put "three dogs out on the floor with those two and still have a great team."

The win over Western the other night didn't hurt matters in the recruiting business either. The enthusiasm and friendliness of the students does more for the visitors than anything the recruiters could ever say or do. And Saturday night was the perfect time to display the strong support, such as hasn't been seen here in many years. A lot of people say that top-notch players can get plenty of scholarship help from other schools because they are so good. Well, in many players' cases, such as Williams who reportedly has offers from 70 schools, a different approach can win them.

The reception that these players get at basketball games could pay off and, with football prospects, it has paid off. Coach Snyder has already inked some of the top gridders in the area and, with a little help from everyone concerned, this situation shouldn't end now.

**Winning Formula Been Found?**

With the Big Green's win over Western last Saturday, the first Mid-American Conference victory in nine games and only the second in 17 tilts, the question can be raised, "has Coach Johnson found the winning formula?"

The answer would most probably be "wait and see." In the last few games the MU squad has won two out of three (not counting the Ohio University game last Wednesday) and the team seems to be getting an enjoyment out of the games. For the first time the players seem like they are actually having fun instead of being hard pressed for that all-important basket. Of course the last two wins haven't been easy ones, but Coach Johnson pointed out that they could have been if the players had taken advantage of different situations instead of letting our opponents getting the upper hand.

Tom Langfitt continues to lead the team in scoring and the trouble with his knee seems to be less acute. The opponents can start to worry a little more now. Bruce Belcher has been burning the nets from the corner with the insertion of Larry Williams into the pivot position. And you can't overlook the improved play of Walt Smittle when he got the chance against the Broncos.

And let's not forget the little guy with the sped and dribbling ability that has wowed the home crowd here of late. Paul "Butch" Clark is his name and bringing the house down seems to be his game. Ever since he got his starting chance back in the Eastern Kentucky game, the Huntington performer has played outstanding ball with the exception of some bad spots. His shooting has improved, but one thing that he's going to find hard to improve upon is the skill with which he leads the famed Marshall fast break. This is one of the big factors in the last few victories and could be the key to the upcoming wins. That is if the players maintain the obvious confidence that they are showing at the present.

Coach Johnson said the other day: "I made up my mind at the beginning of the season that I wasn't going to worry myself to death about the team and I'm not." This is the big reason why the players are playing with a more relaxed attitude and you can count on seeing some more of this in the upcoming games.

**Notes And Quotes . . .**

Ritchie Simmons, former frosh cager, has been red-shirted until next season. The coaches decided it would be better for him to sit out a semester rather than lose part of a year's eligibility . . . The first call for the baseball and track teams have been issued by Coaches Alvis Brown and Charlie Kautz. The first meeting will be on Feb. 17 and all interested should report to the coaches of the respective teams in Gullickson Hall.

# Big Green Faces Maroons In Non-Conference Contest

Assistant Sports Editor

The top team of the Ohio Valley Conference meets the cellar dwellers of the Mid-American Conference tomorrow as the OVC cagers from Eastern Kentucky clash with the Big Green at 8:15 p. m. at Memorial Field House.

This is the second meeting this season between the Ohio Valley power and the greenies. The previous encounter on Dec. 11 ended in a 85-73 win for EK.

An important factor in this game, as in all other MU games, will be rebounding. According to Don Feltner of the publicity department at EK, rebounding is the main factor in the steady rise of the Kentucky cagers to the honored spot of a tie for first place in the OVC.

Eastern Kentucky has been averaging 54.7 rebounds per game this season. On the other hand, MU boasts of a 48.7 average.

And that isn't the only column in which EK out-averages the Big Green squad. Eastern Kentucky has been averaging better

than ten points per game more than MU. EK has an average of 88 points per game compared to 77.3 for the Green squad.

One way — the only way — to describe the cagers from EK is big. The average height of the first squad is 6-5. This compares to MU's average of about 6-3. Although the height is spread around, two players, Eddie Bodkin, 6-7, and Bob Tolan, 6-8, lead in scoring and rebounds respectively. It was these two players that gave the greenies fits in the first meeting this season. Bodkin is averaging 16.3 points a game while Tolan is averaging 13 rebounds per tilt.

Coach Ellis Johnson of the Big Green said he was fully aware of the height and therefore the rebounding advantage of the team from Kentucky. "We know it's going to be hard to get the ball," he said, "and we know its going to be hard to keep it. Eastern Kentucky has had their biggest team ever this year, and all in all they have a very fine ball club and a very fine season going for them."

MU's last encounter wasn't only heartbreaking at the end of

the game. For instance, EK lead the greenies 21-3 about ten minutes in the first period. At the half, EK lead 49-25, but MU came back in the second half to cut the lead to five at one point.

Eastern Kentucky has averaged 41.8 successful shots from the field so far this season compared to a 41.4 average for MU. In the free throw column, EK is averaging 73 per cent while MU trails slightly with 69.

According to Feltner, the lineup for Kentucky will be the same one that whipped MU the first time. Eastern will most likely go with 6-8 pivotman Bob Tolan; 6-7 Eddie Bodkin; and 6-5 Dennis Bradley at forwards; and 6-3 Herman Smith and 6-3 Lee Lemos at the guard positions.

The lineup for the Big Green will probably be the same, barring any unforeseen incidents in the Ohio University game Wednesday. Tom Langfitt and Butch Clark will handle the guard duties while 6-7 Larry Williams will be in the pivot. The cornermen for MU will possibly be Bruce Belcher and Walt Smittle. Guard Bill Francis might get a shot at the starting position also.

EK has a 10-5 overall record for the season while it is 4-2 in the OVC. Its last attempt at a conference attempt ended in disaster for the Kentucky team when Morehead State scored a mild upset over the first place team 77-73. This game threw EK from undisputed first place into a tie for the honored position.

Feltner commented that though a win over MU would not help EK in the OVC, the cagers are wanting the win over MU as much as over any team in the OVC.

## Coach Allen Optimistic On Future Frosh Action

"Things should start happening pretty fast, as far as victories are concerned for the Little Green," says Coach Sonny Allen, the freshman basketball mentor.

The reason for Allen's statement is due to the addition of Bob Redd, a 6-3 sensation from Louisville, Ky.

Allen says, "With Redd in there we have a well balanced attack; we have added scoring—Redd should average from 25 to 30 points per game; and most of all we have an excellent rebounder that can take the ball off the boards and bring it up court."

"But most important, Bob will take a lot of the pressure off of our leading scorer, Bill Whetsell. All season. Bill has been double teamed and sometimes triple teamed; the reason for this was simply because we did not have another big scoring threat on the team," added Allen.

The players are beginning to believe that they have a good team—now that Redd is with them. Whetsell says, "Redd will be the big differences this semester, we should win more often."

Bill Pheilsticker, the 6-7 center, says, "Bob is a good rebounder and he knows what to do with the ball when he gets it."

Jim Madison, the 5-9 playmaker, says of Redd, "Bob is a good passer and he makes the good play when it is needed; he will really help the team."

The freshman have eight games left on their schedule and as of now they have a won-lost record of 3-7; if they can win five of the remaining games, Allen will be well pleased, "I feel that with the addition of Redd to the lineup we should be able to win at least six or seven of the games left, but I would settle for five; that is five wins against conference foes," remarked Allen.

The starting lineup for the frosh is: Jim Madison and Keith

Blankenship at guards; Bill Pheilsticker at center; and Bill Whetsell and Bob Redd at the forward post.

The Little Green will get a chance to make coach Allen's prediction of something happening soon, come true at the field house Saturday, when they face Eastern Kentucky.

### Positions with Potential

## ENGINEERS • CHEMISTS • PHYSICISTS

Ceramic • Chemical • Civil  
Electrical • Industrial • Mechanical  
Metallurgical

America's leading manufacturer of carbon and graphite products offers positions to qualified B.S. and M.S. graduates in the fields listed above.

Our products include graphite anodes, electrodes, motor and generator brushes, arc carbons and special graphite shapes used in nuclear, missile, and a wide variety of industrial applications.

We serve such key industries as aerospace, aluminum, automotive, chemical, mining, motion pictures, nuclear, steel, transportation, and the electrical manufacturers.

Positions are available at 12 plants and laboratories located in Ohio, New York, West Virginia and Tennessee and also in our Marketing organization which covers the 50 states from seven key cities.

Interesting, rewarding careers are offered in research, process and product development, production and methods engineering, product and process control, machine development, plant engineering, marketing, technical sales and technical service.

A representative will be on campus:

## Ten Foreign Students May Visit Next Winter

By **BOB ROGERS**  
Staff Reporter

Eleven foreign visitors participating in the Experimental Project in International Living are expected to visit Marshall for two weeks, probably sometime next winter, University officials and Lars T. Carlson, experiment representative, announced today.

The group, consisting of ten college age members and an older group leader, will probably be from South America, Carlson said.

"The only thing definite now," Carlson added, "is that a group will visit Marshall." He said that details would be worked out by experiment headquarters in Putney, Vermont.

Carlson said that Marshall would be the second school in the state to host an experiment group. A similar group visited West Virginia Wesleyan College last year.

The visit will be one of many conducted by the Experimental Project in International Living, an exchange organization founded in 1932 as a non-profit, educational venture. It now has offices in 45 countries.

Programs are based on the belief that people of other countries and their cultures can best be understood by living among them as a member of a family.

### Branch Enrollment Falls, 294 Register

Branch colleges at Logan and Williamson now have some 294 students, full and part time.

Twenty-nine regular University staff members commute to Logan and Williamson once each week where they offer a regular freshman curriculum.

Next year a sophomore curriculum also will be offered. After completing one or both curriculums, a student may transfer to the main campus. Approximately 15 students transferred from a branch college this semester, and a few students transferred from the main campus to a branch.

### Professor Janssen Publishes Textbook

A new textbook written by Dr. Raymond E. Janssen, professor of geology, will come off the presses around May 15 and go into use in public schools next fall.

Professor Janssen wrote the book on special commission from the State Department of Education in Charleston. It consists of 350 pages and 200 illustrations and is designed to fill the void of knowledge concerning the geology of West Virginia.

The book is entitled "Earth Science—A Handbook on the Geology of West Virginia." It was prepared under the direction of Rex M. Smith, state superintendent of schools, who wrote a foreward for the book.

Professor Janssen began the book in August and finished it in January.

### Dance Is Planned By Faculty Wives

Faculty Wives Club is sponsoring a dance and buffet for faculty and administration beginning at 9 p.m. Feb. 22 at the Melody T Farm.

Co-chairman are Mrs. Charles S. Szekely and Mrs. Clayton R. Page. Reservations should be made with Mrs. Leon A. Sears (525-7232) no later than Feb. 15.

Accordingly, participants spend two months living in a foreign land, one of these with a family.

Carlson explained that a city, club, or organization can host a visiting group, and that families often invite individual experimenters to their homes.

The only cost to host a group or individual is the room and board.

For visitors to the United States, the first two weeks of the second month are spent at a college or university. On campus the visitors live with American students, attend classes and go to social functions.

The final two weeks are spent in Washington and New York learning about our government and seeing points of interest.

American experimenters abroad spend the final month touring the country, ending with a four or five day visit to a major city.

The cost to participate in the experiment varies according to the country visited. Financial assistance is usually available for the experiment.

The experiment is open to men and women between 16 and 30 years of age.

Carlson said the experiment is recruiting faculty members and other qualified leaders for trips abroad. All expenses are paid by the experiment.

Details about the experiment are available from experiment headquarters in Putney, Vermont.

### Greek Council Officers Move In

NOW IN AN office of their own, these members of Panhellenic and Inter-Fraternity Councils meet in their office in the Honors House. From left are Fred Charles, Huntington senior, president of IFC; Tom Robinson, Gary senior; Sharon Smith, Chesapeake junior; Lily Wray Naylor, president of Panhellenic; and Nancy Harmon, Huntington sophomore.

## IFC And Panhellenic Have Office Quarters

On the second floor of the Honors House is an office which has recently become the headquarters for the Inter-Fraternity and Panhellenic Councils.

The IFC met for the first time Monday afternoon in the meeting room, adjacent to the office. Previously the men gathered in a classroom in Old Main to conduct their business.

Fred Charles, Huntington junior and IFC president, described the main advantage of the office

as being that of communications. It will give the organizations a home base and ease the management of their activities, some of which are joint efforts, such as Greek Week and Mothers Day Sing.

There are plans for the IFC and Panhellenic to jointly hire a secretary whose duties will include taking minutes of the meetings, duplicating them, and having them ready for the Greek active meetings, according to Charles.

### MUSIC TICKETS

Today is the last day students will be able to obtain tickets for the Vienna Symphony Orchestra. Tickets may be obtained in the hall of Old Main.

*here is a book  
that is  
teaching us  
how to reach out  
for intelligent  
ideas*

Like most of us, you probably feel pressured at times with the demands made on you for original thinking, — for fresh ideas that will lift your work above the commonplace. Through the study of this book, Science and Health with Key to the Scriptures by Mary Baker Eddy, we are learning how to turn to God for the intelligent ideas we need. You can do this, too.

We invite you to come to our meetings and to hear how we are working out our problems through applying the truths of Christian Science.

### CHRISTIAN SCIENCE ORGANIZATION

Marshall University  
17th Street at 5th Avenue  
Huntington

Meeting time: 6:30 p.m.

2nd and 4th Wednesday

Meeting place: Campus Christian Center  
Science and Health is available at all  
Christian Science Reading Rooms and at many  
college bookstores. Paperback Edition \$1.95.

*When Spring is ready...*

You know that airy feeling of freedom and sleekness when you first put on Spring clothes after a long winter? Well, this is it. Cotton-and-Arnel triacetate gingham. Weightless. Bouncy. Unsquashable. Very hurray Yellow & Orange, or very suave Blue & Green.
