Their Sights Are Set On High-Flying Falcons

THE BIG GREEN has its eyes on the high-flying Falcons and there'll be some aerial combat and fireworks when they tangle tomorrow night at Memorial Field House. The starting five, who have sparked Marshall to four wins in the last six

games, are (from left): Mickey Sydenstricker, Dick Wildt, Jody Sword, Captain Bob Burgess and Phil Carter. (See story, Page 5).

Vol. 61 HUNTINGTON, W. VA. FRIDAY, FEBRUARY 9, 1962

No. 41

MU Senior Enters May Primaries

By **BONNIE JEAN NELSON**
Staff Reporter

Elizabeth (Betsy) Woods Daniel, Huntington senior, is the first Marshall University student to file for a state elective office. When asked why she decided to run on the Republican ticket for the House of Delegates from Cabell County, Miss Daniel gave several reasons.

One of the reasons she said was that as a political science major she was more closely aware of the problems and responsibilities of state government than the average layman. Also her family has a political background. Her grandfather, Luther E. Woods Sr., Republican from McDowell County, served three terms in the State Senate. He resigned in 1929 when he moved to Cabell County.

"I agree with the idea that the future of West Virginia lies in the hands of our youth, and I wish to remain here and do my part.

"I feel that administrative economy is of great importance, and that better use should be made of the money available and that the taxpayers should get what they are paying for."

At Marshall University she has participated in student government as alternate senator of the junior class, and secretary of social affairs. She is president and rush chairman of Alpha Chi Omega sorority, and is a Panhellenic Council member. She has been active in Pi Sigma Alpha, political science honorary, and Pi Delta Phi, French honorary. She has been named in Who's Who in American Colleges and Universities and is a member of Buford Chapter, Daughters of the American Revolution. Her minors include Economics, French and English. She has worked for five years for her father, a local public accountant, and given horseback riding lessons for several years.

Topic Of Discussion? Politics!

PRACTICAL POLITICAL science course! Betsy Daniel, Huntington senior, has filed for a House of Delegates' seat and outlines her ambitions to Prof. Paul Alexander of the Political Science Department.

Life Planning Week Aide Tells Of Decisions Facing Students

By **DONNA DARBES**
Life Planning Week
Publicity Chairman

Stop, just one moment and think about yourself. What are your plans in life? An individual seeking his place in society, thinks, dreams and does the things which are important to him. What, in your life, is important to you? Is it the hectic life of the business world? Is it the world of knowledge through education and teaching? Is it the competitive field of politics, or is it the satisfaction of religion? Whatever your choice, wherever you turn, Life Planning Week is working for you!

During Life Planning Week

(Feb. 25-28), we hope to bring out something of interest to you through our speakers, publications, or conversations at our various functions. Life is what you make it. Your life can be as full as you want it to be, or as empty.

The world and lives are constantly and rapidly changing. An individual must adjust accordingly to face tomorrow and the promises it holds. All we can do is suggest and show the different paths. No matter which path you take, it is your turning and the present and future of your lives. We have each individual in our concern. How will you turn?

Probers Interview Members Of TKE

Inter-Fraternity Council Takes Stand In Favor Of Administration's Action

By **JIM CASTO**
Staff Reporter

Dean of Men David Kirk is now interviewing the members of Tau Kappa Epsilon social fraternity in an investigation of the two hazing accidents which resulted in the indefinite suspension of the group.

Dean Kirk said that he had no statement at this time but would announce his findings sometime next week after he had consulted with the other members of the investigating committee.

The committee consists of Prof. Howard L. Mills, chairman and faculty advisor to the fraternity; Dean A. E. McCaskey Jr., dean of the College of Applied Science, and Dean Kirk.

SUSPENSION ANNOUNCED

The suspension was announced Saturday by president Stewart H. Smith in a letter to John Andrews, Clendenin senior and fraternity president. In the letter President Smith said "Beginning now and until further notice, the Tau Kappa Epsilon fraternity at Marshall is suspended from the fraternity system at this institution.

"During this period of suspension your fraternity must refrain from pledging new members, from holding social functions, from participation in intramural activities, from representing Marshall University as an organization and from participation on the Inter-Fraternity Council."

IFC SUPPORTS ACTION

Dave Ballard, president of the Inter-Fraternity Council, stated: "In accordance with the policies set down in the Inter-Fraternity Council constitution which reads, 'Whereas the Inter-Fraternity Council believes and stands for the strongest possible constructive development of the individual fraternity man and is dedicated to the elimination of all forms of conduct which are inconsistent with this purpose, be it therefore RESOLVED that the Council reaffirm its condemnation of any activities of fraternity members

calculated to impose harassment, embarrassment, physical or mental indignities in connection with pledge training, initiation or pre-initiation procedures.'

"The Inter-Fraternity Council of Marshall University supports the decision of the Administrative Cabinet to suspend all activities of Tau Kappa Epsilon fraternity for an indefinite period for the violation of the West Virginia Board of Education and Marshall University regulations in regard to hazing. Reconsideration will be made pending further investigation."

HAZING ACTIVITY CAUSE

According to Dean Kirk, two Tau Kappa Epsilon pledges received emergency treatment last week at the Cabell-Huntington Hospital.

The first man injured was treated for "abrasions to the lower left leg" and the second pledge was treated for "complete exhaustion."

Hazing, which was a part of the fraternity's pre-initiation activity, is a violation of a resolution from the West Virginia Board of Education passed on Jan. 15, 1959.

RUSH PARTIES RE-SET

The first rush party of Societas, women's independent sorority, has been re-scheduled for 7 p.m., Feb. 22 upstairs in the Student Union. The second party is scheduled for Feb. 27.

Pledging ceremonies will be conducted March 2.

History Of Hairstyles Short And Long

LINDA HAMRICK, (left), Huntington senior, wears an evening style fashioned by Mrs. Carol Lockwood of Martin's Hairstyling, 824 Fifth Avenue, Huntington. This hairstyle features simple line of fluidity and femininity. Sally Galbraith (center), South Charleston freshman, wears a modified version of the turned-up

Dutch look styled by Mrs. Martin. Fashion Editor Nancy Clay, Charleston senior, shows the high and smooth look dominant in this "Dutch Cap", which was styled by Mrs. Lockwood. (Staff Photos by Charlie Leith).

'High And Smooth' Termed Trend To Emphasize Vitality And Life

By NANCY CLAY
Fashion Editor

In today's world of fashion, hair is integrated into the overall airiness taking first place on college campuses as well as on the most chic avenues of the world.

Hairdressing, by definition, is the art of arranging the hair by combing, curling, cutting or other means. Women have experimented with styles since ancient times and the hair has usually been a victim of the fashion trend of the period. Hairstyles have even been known to indicate age or rank.

The ancient Egyptians wore their hair in many different ways and often used exotic wigs. In 500 B. C., Greek hairstyles became noticeable because of their elaborate design. The women of Rome adopted decorative hairstyles during the time of Augustus Caesar.

Hairdressing returned to simplicity in the Middle Ages. During the period from 1300 to 1600, more elaborate fashions developed and the women wore a broad cushion or coronet on top of their curls. The long curls of Louis XIV led to the style of wearing long curled wigs during the 1600s. Later in the same

century, women wore a tall head-dress of lace and stiffened muslin, called a "fontage".

During the reign of Louis XVI, the most extreme styles were adopted. Women displayed huge structures of powdered curls, supported by stiffening devices. By 1800, wigs and extreme styles were discarded.

Women piled huge masses of curls on top of their heads from 1830 to 1840. During the 1860s, the hair was parted in the center and arranged softly at the sides and back. A mass of curls, called a chignon, fell from the top of the head to the back of the neck in 1870.

In the 1900s, women began to bob their hair. Longer hair replaced the bob about 1928 and the pompadour came into fashion around 1940. Following this, the hair was swept to the top of the head and arranged in puffs, braids, coils, or curls.

Hair was short in 1953. The most notable style was the "Italian boy" haircut. The new bouffant hairstyles appeared in 1956. Hairdos followed the Empire line in 1958 with hair piled high and straggling wisps and waves fluttered across the face. Bangs often completed the "shaggy-in-front, sleek-in-back" look. Some

women added the headache band, worn low on the forehead or just above the hairline.

In early 1960, hair styles were cut short and coiffed close to the head. This gave way to the "Jackie look" when Mrs. Jacqueline Kennedy became a style setter in the world of fashion.

The head line for 1962 coiffures are all glamour lines. Fashionable hairstyles are fluid with a smooth and simple look. Whimsical and capricious coifs with flirty detail or an asymmetrical effect are high on the fashion list.

The newest trend is toward the fully covered ear. Another trend is the "high" coif with narrow sides fashioned close over the ears and an all-over up-do silhouette. The look most often seen and one that offers almost unlimited day-to-evening versatility is the sidesweep. Bows, bands, glitter and jewelry ornament the hair for any variety of occasions.

According to Mrs. Carol Lockwood of Martin's Hairstyling, the styles of today are "high and smooth". They suit the personality of the wearer and their keynote is fluidity. The hairstyles of 1962 are the most casual ever and accentuate the vitality and life of the age in which we live.

THE ASYMETRICAL LOOK, shown by Kay Mathews, Huntington junior, is one of the fashion trends of the year. The styling was by Dorothy Lambert of Martin's.

MILITARY BALL PLANNED

Final plans for the annual R.O.T.C. Military Ball have been completed. The event is set for 9 p.m. March 9, at the Hotel Prichard Ball Room.

The entertainment for the dance will be supplied by Mel Gillespie and his orchestra. During the intermission the Battle Group Queen will be crowned. Scabbard and Blade, sponsor of the event, has requested that all cadets attend with or without dates.

Cavaliers, men's independent fraternity, has re-scheduled the smoker for 9 p.m. Feb. 13 in the men's lounge of the Science Hall. The date was changed due to a home basketball game.

WAA TO MEET

Members of the Women's Athletic Association will meet at 4 p.m. Monday in the Women's Gym.

Letters To Editor

Dear Editor:

Last week I read an article by Tom Ross in our newspaper. (The Parthenon). The letter he wrote seems to indicate that he was displeased with Marshall. It is a pity indeed that it took him three and one-half years to realize he was not utilizing his full intellectual capacity. He would have been better off had he quit after the first nine weeks. This is my University and I plan to graduate from it. I am proud to be a potential graduate of The University.

Recently I read an article selected from the writings of Max Ehrman, entitled "Dedsiderata." This particular writing is full of meaning and it is self-explaining in many aspects. Below are some of the passages which are of particular significance.

"Go placidly amid the noise and haste, and remember what peace there may be in silence. As far as possible, without surrender, be on good terms with all persons. Speak your truth quietly and clearly; and listen to others, even to the dull and ignorant; they too have their story . . . If you compare yourself with others, you may become bitter or vain, for always there will be greater and

lesser persons than yourself. Take kindly to council of the years, gracefully surrendering the things of youth. But do not distress yourself with dark imaginings. Many fears are born of fatigue and loneliness.

"You are a child of the universe, no less than the trees and stars; you have a right to be here. And whether it is clear to you or not, no doubt the universe is unfolding as it should. Therefore be at peace with God, whatever your labors and aspirations, in the noisy confusion of life, keep peace in your soul. With all its shams, drudgery and broken dreams, it is still a beautiful UNIVERSITY."

Signed:

Robert D. Bailey
Charleston, senior

A BALI DANCER
... Appears Wednesday Night

Dancers Of Bali Due For Wednesday Show

The Dancers of Bali will appear on the Artist Series at 8:30 p.m. Wednesday. The troupe is composed of 50 dancers and musicians, led by I Mario of Tabanan and the Tabanan Palace Gamelan conducted by I Wajan Begeg. Tickets will be distributed to students until 4 p.m. today.

These glittering and flawless performers portray the range of man's feelings, with each of their eloquent gestures and their subtle sophistication. These dancers are performing dances handed down to them by their ancestors. Rehearsed for centuries, the movements are kept fresh daily under the watchful eye of their teacher. Hours before each performance,

a ritual is conducted backstage by their Brahmin priest, before the Great Gong. They believe it to be as sacred as their instruments, which no one is allowed to touch except the musicians.

But to those in the audience the curtain will unfold on one of the most extraordinary, exotic and exciting evenings in the theater. The mystery and magic of the dances is preserved in the strictest sense.

The extensive repertoire of the dancers represents a composite art of gifted people. The scenery, masks, costumes, dances, and music are of immediate appeal to the audience, because of the beauty and pageantry.

Girl Watcher's Guide

Presented by Pall Mall Famous Cigarettes

First field trip

LESSON 7- Keep moving

One of the most important rules of girl watching is this: keep moving. In fact, it is always a good idea not only to move, but to appear to be going somewhere. (This is especially important on group field trips.) Beautiful girls, although they enjoy being watched, are instinctively suspicious of strollers and downright fearful of loiterers.

The man who is walking briskly, who looks like he's "going places," makes a better girl watcher. For one thing, he sees more total girls and in the end he enjoys his hobby more. (If you are planning an extended field trip—to Paris and Rome, for example—be sure to pack a couple of cartons of Pall Mall.)

**WHY BE AN AMATEUR?

Program For Mentally Retarded Outlined

Rehabilitation And Education Work Cited

By ALLEN BLUMBERG
Associate Professor of Education
And

MRS. BARBARA BLUMBERG

Within the last decade, society has shown a greater interest in the field of mental retardation than at any time in the history of our nation. Today every state has some type of legislation related to the education and rehabilitation of the mentally retarded. The stigma of mental retardation has certainly lessened.

In spite of this interest in the field of mental retardation there has developed an unexpected amount of confusion concerning the education and rehabilitation of the mentally retarded. A major cause of this confusion is the interchangeable use of the terminology in this field which has created a great deal of false hopes and expectations in the minds of the public.

It is the desire of the authors to clarify these misconceptions about mental retardation through this article. This article will not pertain to the medical or clinical aspects of mental retardation, but in terms of the ability of the mentally retarded individuals to adjust to the social, educational and vocational environment of the society in which they live.

3 GROUPS IN CATEGORY

The term mental retardation refers to a heterogeneous group of individuals who have the one characteristic of being subnormal in intelligence. Within this category lies three distinct groups, each with its own unique characteristics and problems that require distinct kinds of educational and rehabilitation programs. The line of differentiation between each group is not an absolute one. Thus there will always be borderline and marginal cases.

The classifications should be made by means of a thorough diagnosis of each individual in terms of intellectual, educational, social and emotional behavior. All of these examinations should be performed by individuals trained in the field of testing and presented to qualified personnel for proper placement.

The highest group is known in educational terminology as the educable mentally retarded. The members of this group have some degree of educability in the educational, social and occupational areas. The members of this group have the potential intellectual ability to acquire sufficient knowledge in the academic areas to become useful citizens in the community. The rate of learning for the members of this group for

Need A Gift? Try Workshop

"Students and student groups can help our work at the sheltered workshop by making gift purchases there," Allen Blumberg, associate professor of education, said.

"There are many gifts that are made by the mentally retarded," he said. "The sale of gifts helps our efforts to rehabilitate the retarded."

The workshop is located at the corner of Fourth Avenue and 16th Street.

academic subjects is one-half to one-fourth the rate of the average child.

2nd GROUP DEFINED

Just below this group is the trainable mentally retarded individual. The trainable mentally retarded individual is in a state of incomplete mental development of such a kind and degree that the individual is incapable of adapting himself to the normal environment of his fellows in such a way as to maintain existence independently of supervision, control or external support. The research during the 1950's with the trainable mentally retarded has shown that they are not capable of being educated in the sense that they can learn academic skills to any degree of competency.

The lowest group is referred to as the custodial mentally retarded. The members of this group are so deficient in any type of potentialities of learning that they are considered defective in any society. The members of this group usually must be cared for by the parents or be placed in specialized institutions.

The utopian educational plan for each group of retardates should be somewhat like the following:

NURSERY PROGRAM NEEDED

A nursery program for all types of retarded individuals. The emphasis in the nursery program should be based upon social experience, group activity, self-care and play.

Following the nursery program the educational program for each group takes on different aspects. For the educable mentally retarded individuals the educational program should emphasize social experiences, academic skills and improvement of general living skills. The highest achievers, according to our research, will be working on a third or fourth grade level. The final phase of the education of the educable mentally retarded individuals should be broken down into two programs. The junior high school program should be a consolidation of social and academic skills and a readiness for learning about jobs. The senior high school program should be developed around occupational experiences and community membership.

Now the education of the trainable mentally retarded is still of a different type. The educational program for this group should include self care, social adjustment, work habits, speech and language development and diversional activities. The younger trainable mentally retarded individuals should have a program that emphasizes the personal care and self-help experiences. Once they have mastered these skills they should be provided with greater opportunities for work skills so that they can be better prepared for the protective environment of a sheltered working experience.

Mr. and Mrs. Allen Blumberg

Allen Blumberg, associate professor of education, and his wife, the former Barbara Griffiths McWhorter, combined their talents to write this week's "Lyceum" on programs to aid the mentally retarded.

Mr. Blumberg has been at Marshall for three years. He met and later married Mrs. McWhorter when they jointly began a sheltered workshop for the retarded in 1960. The workshop is now located at the corner of Fourth Avenue and 16th Street.

Mr. Blumberg received his master's degree in education from Wayne State University in 1953, and his bachelor's degree from the University of Wisconsin in 1949.

He began his work with the mentally retarded at Wisconsin's Southern Colony in 1949, and afterwards organized classes for the retarded at Detroit and Cincinnati public schools.

Mrs. Blumberg graduated from Stratford Junior College, Danville, Va., in 1940. She majored in journalism there. She graduated from Marshall's Teacher College in 1959 and is now doing graduate work at Marshall in mental retardation—a course taught by her husband.

From 1950 to 1958, she conducted an art school at Daytona Beach, Fla., and worked with the handicapped who were outpatients. In the summer of 1960 she studied at the Jewish Vocational Service in Milwaukee.

The team of Mr. and Mrs. Blumberg is now preparing an article for the U. S. Office of Vocational Rehabilitation on the work being done at the sheltered workshop.

The education of the custodial mentally retarded individual is usually carried on in state or private institutions. Little, if any, real education takes place other than self-care training.

Upon the completion of the educational program comes the vocational placement of the mentally retarded. A recent study has shown that the educable mentally retarded individuals who have completed the special education program of the previously stated utopian type are able to work at semi-skilled jobs and become well adjusted in society. This study also proved that these individuals become so well adjusted in society that their identity as members of the educable mentally retarded classification is soon lost and they are considered as worthwhile members of society.

During the past 10 years we have been confronted with educable mentally retarded individuals and trainable mentally retarded individuals who could not make the adjustment to society to the extent that those mentioned in the previous paragraph could adjust. The parents of these individuals did not wish to place their children in institutions but rather wanted to retain them at home.

It became necessary to develop community work opportunities under protective environment for the employment of the mentally retarded who need such types of protection. Thus developed the idea of the sheltered workshop. The sheltered workshop is defined as a rehabilitation program for the physically, mentally or socially handicapped individuals that will provide them with remunerative employment under protective working conditions.

U. S. ENCOURAGES WORK

The idea of the sheltered workshop program became so ideal that the United States Office of Vocational Rehabilitation has recently appropriated funds for the establishment of research demonstration sheltered workshops throughout the country. In March, 1960, the federal agency approved a three-year research demonstration project for the establishment of a sheltered workshop known as the Cabell County Sheltered Workshop in Huntington. The local sponsoring board is the Cabell County Council for the Mentally Retarded. The title of this research demonstration project is "The Rehabilitation of the Mentally Retarded Through a Personal Adjustment Program and a Sheltered Workshop."

The workshop has at present two definite avenues of operation. One is for those mentally retarded individuals who will always work under supervision—thus the development of an industry within our workshop and also as a training period in work habits and social skills for those mentally retarded individuals who are not adjusted enough but can be rehabilitated back to the community.

Prior to being accepted into the workshop, each prospective candidate must undergo a series of tasks. Throughout these tasks the supervisor observes the candidate's attitudes toward work, ability to follow simple instructions, longevity of work, level of frustrations and the quality of the candidate's work. At the end of two or three weeks a staff meeting is held related to the candidate and a decision is reached as to the merits of keeping him for a longer period in the evaluation phase, moving him into the workshop or rejecting the candidate as a member of our program.

CREATIVITY IS GOAL

The work activity in the sheltered workshop is centered around a creative approach of making self-made products of ceramics, mosaics and wood. The quality of these self-made products are such that they have proven worthy of sale on the competitive market based upon workmanship and not on charity. During the past six months we have been able to obtain many sizable contracts from local industrial firms for these self-made products. These contracts are not of the charity type, but were obtained because we have been able to develop a product that meets specifications and represents quality workmanship. In addition to filling orders for industrial firms, we have found that the public has shown an exceptional interest in purchasing the self-made manufactured products. This has forced us to open a gift shop in our establishment to handle this type of sales.

In addition to the training in the workshop each mentally retarded participant goes through a personal adjustment program.

'INNER STATUS' IMPORTANT

The entire program is based upon giving the mentally retarded individuals a feeling of "INNER STATUS" as well as economic remuneration. By "inner status," we simply mean the feeling of accomplishment with one's own abilities.

Since this sheltered workshop is still in the beginning stages of development, it is impossible to formulate at this time ready made answers to be used in the rehabilitation of the mentally retarded in this community.

However, to those of us who have been associated with this program, the noticeable improvement in the "inner status" of the mentally retarded individuals within this program and in their work leads to the speculation that perhaps other variables than subnormal intelligence are responsible for the quality of their performance. These variables need to be investigated through research and may become the key factors in developing programs for the education and rehabilitation of the mentally retarded.

The educational and rehabilitation programs discussed in this report are not the final solutions toward handling the mentally retarded, but must be considered as workable phases towards making these individuals acceptable within our community.

High-Flying Green, Falcons Will Collide

By **GEORGE ARNOLD**
Sports Editor

Marshall's revitalized basketball team faces both a stiff challenge and an opportunity to gain a great deal of prestige tomorrow night when it engages Mid-American Conference leader Bowling Green at Memorial Field House.

The potent Falcons currently boast a sparkling 7-0 conference record, and have been toppled only once in 16 outings. The Big Green jumped to fifth in the MAC Tuesday night with a 67-59 triumph over Miami which ended Marshall's 23-year drought against the Redskins on their home court in Oxford, Ohio. Marshall's record is now 3-4 in the conference and 6-7 overall.

(Records do not include last night's game between Marshall and Morris Harvey and an MAC contest Wednesday night between

Bowling Green and Toledo, both of which were played after The Parthenon's press time).

FALCON IS DROPPED

The Falcons, ranked eighth in the nation by the Associated Press, will enter the game without the services of their third leading scorer. Wavy Junior, a 6-1 junior forward who has been averaging 11.5 points per game and 6.4 rebounds, was declared scholastically ineligible Tuesday for the remainder of the season.

The loss, however, isn't expected to be too strongly felt by Coach Harold Anderson's team as it still has two top scorers in Howard Komives and big Nate Thurmond and a strong bench.

Komives is Bowling Green's top scorer with an average of 19 points per outing and a total of 304 points in 16 games. Thurmond, the BeeGee's center, is hitting at a 14.4 clip and carries a rebound average of 14.8.

Bowling Green is the best defensive team in the MAC, yielding only 60 points per game to its opponents while scoring 72.3 — an output which is good enough for second in the conference.

The Falcons defeated Coach Jule Rivlin's Big Green 68-55 earlier this season, and own impressive victories over such powers as Wichita, Bradley and Canisius. MU stopped the Falcons twice last season and holds a commanding 9-3 victory margin in all games between the two schools.

Marshall will probably floor the same starting five tomorrow night that faced Miami Tuesday. The lineup includes Phil Carter and Dick Wildt at forwards, Captain Bob Burgess at center, and Jody Sword and high-scoring Mickey Sydenstricker at guards.

WIN 4 OF 6

The victory over Miami gave Marshall its fourth triumph in its last six games and the Big Green could possibly jump over the .500 mark for the first time by next Wednesday.

Marshall entered the Morris Harvey contest needing but one win to pull its record to an even 7-7 and a victory over Bowling Green would even the Big Green's conference log at 4-4.

Coach Rivlin's cagers face Ohio University at Athens, Ohio, in another MAC battle next Tuesday. OU downed Marshall 68-57 in their only meeting thus far this season.

Coach Sonny Allen's fine freshman cage team, winner in nine of 13 games, played Morris Harvey's JVs last night and will meet Rio Grande, Ohio, College Saturday at 6:15 p.m. in a preliminary tussle prior to the varsity game at 8:15 p.m. The Little Green walloped Rio Grande 107-78 two weeks ago.

PHIL CARTER
... Scalps Redskins

Big Green's Composure Termed Key To Victory

By **LARRY MULLINS**
Sports Writer

Coach Jule Rivlin credits his team's composure in the late stages of the Miami game for Marshall's surprise 67-59 victory Tuesday night at Oxford, Ohio. The triumph was the Big Green's first over the Redskins on their home court since Rivlin was a standout performer on the 1938-39 MU quintet.

"The overall play of Jody Sword and the ball handling by the team proved to be the difference in the late minutes," Coach Rivlin said. Sword, an out-

standing ball-handler and floor general, scored 11 points as Marshall captured its fourth triumph in its last six games to advance to fifth place in the Mid-American Conference.

Forward Phil Carter paved the way by leading both teams in scoring with 22 points and helping Captain Bob Burgess tremendously in controlling the rebounds.

"It was Carter's best performance of the year," Rivlin commented. "He did a real fine job."

Carter turned the tide late in the first half when he hit on three straight fielders to pull the Big Green from six points behind to a 29-29 tie. Butch Clark added a two-pointer to give Marshall a 31-29 lead and the Big Green was never headed thereafter.

MU dominated the boards, picking off 41 rebounds to 27 for Miami. Burgess was tops in this department with 16, and also was second in scoring for Marshall with 14 points. Carter had nine rebounds.

Cage Action, Swimming Meet Highlight Intramural Activity

By **JERRY REED**
Sports Writer

Intramural basketball is still in the spotlight as the teams are battling it out for the right to play in the championship game.

On Feb. 1: PKA No. 3 won over SPE No. 3, 40-32; Jokers No. 5 lost to the Beavers, 81-38, with Danny Martley tallying 33 for the winners; R.O.T.C. No. 2 defaulted to Jokers No. 3; KayVees defeated R.O.T.C. No. 1, 101-49; The faculty lost in overtime to Frosh No. 1, 65-63; Jokers No. 1 beat VM, 58-45; Ma's boys won over PKA No. 4, 66-44; KA No. 1 lost to ASP, 47-33.

Last Tuesday: SAE No. 3 defeated Jokers No. 5, 60-48; Frosh No. 2 lost to Jokers No. 3, 77-27; Jo-

kers No. 2 beat the KayVees, 63-60; PKA No. 4 defaulted to SAE No. 4; Jokers defeated Minigos, 60-39; John Quintier led PKA No. 1 to a 68-50 triumph over SAE No. 1; SPE No. 1 defeated KA No. 1, 83-68.

In Intramural swimming, Leroy's Swimmers won the meet with 31 points. PKA was second with 21 points, while SPE, SAE, and KA were third, fourth and fifth, respectively.

Leroy's Swimmers were led by Pete Hanway with 12½ points. Hanway broke records in the 50-yard freestyle and the 50-yard breaststroke events. His times were 26.7 seconds in the freestyle, and 36.4 seconds in the breaststroke.

Fleming Signs Canadian Pro Football Pact

Millard Fleming, star halfback on last season's Big Green squad, announced that he has signed a contract with the Ottawa Rough Riders of the Canadian pro league.

Fleming, contacted at his Leslie, W. Va., home, said he will join the team early in July. With him will be another former Marshall gridders, Dixon Edwards, hard-charging fullback.

Fleming, who was declared ineligible for academic reasons, left school at the end of last semester. He will be trying out for the position of left halfback.

"I'm very pleased with the contract," Fleming said. In addition to the salary, a bonus provision has been written into the contract.

The speedy halfback was the only unanimous choice for the MAC all-conference team last season, selected by MAC coaches.

He carried the ball 145 times, gained a net yardage of 463, and averaged 3.2 yards per carry. Fleming, like his counterpart Jasper Wright, scored three touchdowns and caught 15 passes for 113 yards.

The National Football League and the American Football League could not sign Fleming because he left school before graduating. He would not be eligible for a contract until the time he would have graduated.

Matmen To Meet Miami Tomorrow

The University wrestling team will travel to Oxford, Ohio, tomorrow for an afternoon Mid-American Conference match with Miami University at 2 p.m.

The Big Green met Ohio University Wednesday night in another conference match in an effort to run its victory string to three. The team jumped over the .500 mark last weekend by downing West Liberty 20-10, and Findlay, Ohio, College, 23-13.

Tapa Prints

The bark cloth prints of the Hawaiian Islands inspired us to design a new collection of shirts completely different in coloring and pattern. We are sure you will want to add one or more of these fine shirts to your casual wardrobe. Tailored so well it looks personally measured. Button-down collar-tapered waistline.

Long sleeves **\$5.00**
Short sleeves **\$4.00**

QUESTION: Do you think that the library should remain open on Sunday and lengthen their weekday and Saturday hours?

Sue Anne Hughes, Portsmouth, Ohio, sophomore:

Yes, I do. The best day in the week to study is Sunday. Whenever it is necessary to study the library should be open and available for the student's use.

Glenn Fulks, Kitts Hill, Ohio, senior:

I commute and it would certainly be valuable in my case to have the library open for longer hours and particularly on Sunday.

Linda Moore, Ripley sophomore:

I definitely feel that the library should extend their hours. Many students who go home on weekends want to study on Sunday. The noise in the dormitories is another reason for the necessity of additional hours.

Hughes

Fulks

Moore

Vance

June Vance, Charleston freshman:

I don't think that the library should be open on Sunday. It should be a day reserved for church. I feel that the present library hours are sufficient and adequate.

New Shows Featured

WMUL Changes Format And Hours

By **KEITH MARKINS**
Feature Writer

Marshall University's new educational radio station, WMUL, now has sounds that are even newer, according to Roy Lee Collins, Huntington junior and program director.

With the coming of February, WMUL began a new format. The major step taken by the station is the expansion of broadcasting hours. WMUL is now on the air from 3:30 p.m. until 10 p.m. Monday through Friday.

Many new shows have been added to the WMUL programming schedule. There are two women's shows: "Around Town," which gives news of club meetings and happenings in the Huntington area, and "The American Woman in Fact and Fashion."

There are four new dramatic programs: "Storyland Special" is a program of children's stories narrated by Betsy Rucker, Clarksburg senior. "I Can Hear It Now" is the recorded series of famous people and events narrated by Edward R. Murrow and is featured on WMUL.

Also featured is the program "Great Americans," with recordings of famous Americans, past and present. Another program in the field of drama is "Dramatic Playhouse" with short plays or

dramatic works done by Marshall students.

Other new sounds to be heard on WMUL are "Know Your Faculty," with interviews with Marshall faculty members; "Tops in Sports" with campus and national coverage along with recorded interviews with top sports personalities furnished by the Air Force.

There are record shows ranging from up-tempo popular tunes on such shows as "Campus Caravan," and "Nice and Easy," to the classics on "Night Class," which has now been expanded to four hours each evening. For music somewhere in between these two, "Dinner DJ" fills the bill.

On Campus with Max Shulman

(Author of "Rally Round The Flag, Boys", "The Many Loves of Dobie Gillis", etc.)

IS STUDYING NECESSARY?

Once there were three roommates and their names were Walter Pellucid, Casimir Fing, and LeRoy Holocaust and they were all taking English lit. and they were all happy, friendly, outgoing types and they all smoked Marlboro Cigarettes as you would expect from such a gregarious trio, for Marlboro is the very essence of sociability, the very spirit of amity, and very soul of concord, with its tobacco so mild and flavorful, its pack so king-size and flip-top, its filter so pure and white, and you will find when you smoke Marlboros that the world is filled with the song of birds and no man's hand is raised against you.

Each night after dinner Walter and Casimir and LeRoy went to their room and studied English lit. For three hours they sat in sombre silence and pored over their books and then, squinty and spent, they toppled onto their pallets and sobbed themselves to sleep.

This joyless situation obtained all through the first semester. Then one night they were all simultaneously struck by a marvelous idea. "We are all studying the same thing," they cried. "Why, then, should each of us study for three hours? Why not each study for one hour? It is true we will only learn one-third as much that way, but it does not matter because there are three of us and next June before the exams, we can get together and pool our knowledge!"

Oh, what rapture then fell on Walter and Casimir and LeRoy!

The wax in their ears got melted

They flung their beanies into the air and danced a gavotte and lit thirty or forty Marlboros and ran out to pursue the pleasure which had so long, so bitterly, been missing from their lives.

Alas, they found instead a series of grisly misfortunes. Walter, alas, went searching for love and was soon going steady with a coed named Invicta Breadstuff, a handsome lass, but, alas, hopelessly addicted to bowling. Each night she bowled five hundred lines, some nights a thousand. Poor Walter's thumb was a shambles and his purse was empty, but Invicta just kept on bowling and in the end, alas, she left Walter for a pin-setter, which was a terrible thing to do to Walter, especially in this case, because the pin-setter was automatic.

Walter, of course, was far too distraught to study his English lit, but he took some comfort from the fact that his roommates were studying and they would help him before the exams. But Walter, alas, was wrong. His roommates, Casimir and LeRoy, were nature lovers and they used their free time to go for long tramps in the woods and one night, alas, they were treed by two bears, Casimir by a brown bear and LeRoy by a kodiak, and they were kept in the trees until spring set in and the bears went to Yellowstone for the tourist season.

So when the three roommates met before exams to pool their knowledge, they found they had none to pool! Well sir, they had a good long laugh about that and then rushed to the kitchen and stuck their heads in the oven. It was, however, an electric oven and the effects were, on the whole, beneficial. The wax in their ears got melted and they acquired a healthy tan and today they are married to a lovely young heiress named Gangulia Bran and live in the Canal Zone, where there are many nice boats to wave at.

© 1962 Max Shulman

* * *

In case you worry about such things, their wife is a Marlboro smoker, too, which adds to the general merriment. Marlboro is ubiquitous, as well as flavorful, and you can buy them in all 50 states as well as the Canal Zone.

NAVAL OFFICER TEST SET

The Naval Officer Procurement Team from Ashland, Ky., will be on campus from 9:30 to 4:30 Monday to administer the Officer Qualification Test to senior men and women for Officer's Candidate School.

Although only seniors are eligible to take the test, the team will be pleased to talk to men and women of all grade levels, pointing out the advantages the Navy has to offer regarding all officer programs and on the academic majors that can be put to practical use in the Navy.
