Data-driven Passion

What Academics and Activists Need to Know About Rural Healthcare

Brought by our partners at Southwest Virginia Graduate Medical Education

https://swvagmec.com/
Logistics

• Please silence your phones.
• When you speak, please state your name, organization and state.
• There will also be opportunities throughout the presentation for questions as well as a Q & A portion at the end of the panel discussions.
• Presenter contact information may be found on the last slide in the slide deck.
Today’s Presenters

Howard Chapman
Tammy Norville
Beth O’Connor
Dale Clark
Learning Objectives

Following this session participants will be able to:

- Understand differences in Urban and Rural, describe the benefits of the Rural Health Clinic (RHC) program and describe how to use the State Office of Rural Health (SORH) as your rural health subject matter experts (SMEs)

- Articulate the difference between a Federally Qualified Health Center (FQHC), a Community Health Clinic (CHC), and other rural provider types

- Describe the current rural hospital environment and the benefits of a Critical Access Hospital (CAH)

- Articulate the general principles of advocacy and education of policy makers and stakeholders
Today’s Agenda

- Tammy Norville, National Organization of State Offices of Rural Health, “Rural Health is Different from Urban Health Because…”
- Howard Chapman, Tri-Area Health, “Alphabet Soup Mixed with Numbers: Sorting the Realities of Rural Healthcare into Common Sense”
- Dale M. Clark; COO, Indian Path Hospital; “What You Don't Know About Your Local Hospital Could Kill You”
- Beth O'Connor, Virginia Rural Health Association, “Advocacy 101: How to Get a Meeting and Make a Point with Legislators and Policy Leaders”
Rural is Different from Urban Because...

Tammy Norville
Technical Assistance Director
Durham, NC
Definitions of Urban & Rural

“Numerous federal and state-level definitions of rural have been created over the years for various programs and regulatory needs. However, there are three federal government agencies whose definitions of what is rural are in widest use:

- the U.S. Census Bureau
- the Office of Management and Budget
- the Economic Research Service of the U.S. Department of Agriculture (USDA)”

Source: Rural Health Information Hub (RHI-Hub)
https://www.ruralhealthinfo.org/topics/what-is-rural
Definitions of Urban & Rural

“Census Bureau:

Urbanized Areas (UAs) are geographic areas of 50,000 or more people. Urban Clusters (UCs) are geographic areas of 2,500 to 50,000 people.

Office of Budget Management:

Metropolitan areas contain a core urban area population of 50,000 or more. Nonmetropolitan areas contain a population of less than 50,000.

Economic Research Service, U.S. Department of Agriculture

Rural Urban Commuting Areas (RUCAs) - Utilizes the U.S. Census Bureau’s UAs and UCs definitions with information on work commuting. Classification delineates metropolitan, micropolitan, small town and rural commuting areas...”

How to we ensure access to quality healthcare and other necessary services?
What is a Rural Health Clinic?

“An RHC is a clinic that is located in a rural area designated as a shortage area, is not a rehabilitation agency or a facility primarily for the care and treatment of mental diseases, and meets all other requirements of 42 CFR 405 and 491.”

CMS Rural Health Clinics Center web page
What is a Rural Health Clinic?

Wikipedia says...

**RHC Definition**

What is a Rural Health Clinic?

“A rural health clinic (RHC) is a clinic located in a rural, medically under-served area in the United States that has a separate reimbursement structure from the standard medical office under the Medicare and Medicaid programs. RHCs were established by the Rural Health Clinic Services Act of 1977 (P.L. 95-210), (Section 1905 of the Social Security Act). The RHC program increases access to health care in rural areas by

- creating special reimbursement mechanisms that allow clinicians to practice in rural, under-served areas
- increasing utilization of physician assistants (PA) and nurse practitioners (NP)
- As of 2018, there were approximately 4,300 RHCs across 44 states in the U.S. [1] RHCs facilitate 35.7 million visits per year and provide services for millions of people, including 8 million Medicare beneficiaries. [2]
- As primary care facilities, RHCs are essential to the health care safety net in rural America. [3] Unlike FQHCs, RHCs are not legally mandated to provide care to patients who cannot pay but many of their patients are uninsured. [4] Recent evidence shows that the presence of RHCs enables greater appointment availability for Medicaid patients. [5]”

What is a Rural Health Clinic?

“The Rural Health Clinic (RHC) program is intended to increase access to primary care services for patients in rural communities. RHCs can be public, nonprofit, or for-profit healthcare facilities. To receive certification, they must be located in rural, underserved areas. They are required to use a team approach of physicians working with non-physician providers such as nurse practitioners (NP), physician assistants (PA), and certified nurse midwives (CNM) to provide services. The clinic must be staffed at least 50% of the time with a NP, PA, or CNM. RHCs are required to provide outpatient primary care services and basic laboratory services.”

- RHC services
- Medicare certification as an RHC
- RHC visits
- RHC payments
- Cost reports
- Annual reconciliation
- Resources
- Lists of helpful websites and Regional Office Rural Health Coordinators

**BACKGROUND**

The Rural Health Clinic Services Act of 1977 (Public Law 95-210) was enacted to address an inadequate supply of physicians serving Medicare patients in rural areas and to increase the use of non-physician practitioners, such as nurse practitioners (NPs) and physician assistants (PAs) in rural areas. RHCs are paid an all-inclusive rate (AIR) for medically-necessary primary health services and qualified preventive health services furnished by an RHC practitioner. Currently, about 4,100 RHCs nationwide furnish primary care and preventive health services in rural and underserved areas. For a State-by-State list of Medicare certified RHCs within each region, refer to the [Current Listing of Rural Health Clinics](#).
RHC SERVICES

RHCs furnish:

- Physician services
- Services and supplies “incident to” the services of a physician
- NP, PA, certified nurse-midwife (CNM), clinical psychologist (CP), and clinical social worker (CSW) services
- Services and supplies “incident to” the services of an NP, PA, CNM, and CP
- Medicare Part B-covered drugs furnished by and “incident to” services of an RHC practitioner and
- Visiting nurse services to the homebound in an area where the Centers for Medicare & Medicaid Services (CMS) has certified that there is a shortage of home health agencies

MEDICARE CERTIFICATION AS AN RHC

To qualify as an RHC, a clinic must be located in:

- A non-urbanized area, as defined by the U.S. Census Bureau
- An area currently designated within the previous 4 years by the Health Resources and Services Administration as one of these types of Federally designated or certified shortage areas:
  - Primary Care Geographic Health Professional Shortage Area (HPSA) under Section 332(a)(1)(A) of the Public Health Service (PHS) Act
  - Primary Care Population-Group HPSA under Section 332(a)(1)(B) of the PHS Act
  - Medically Underserved Area under Section 330(b)(3) of the PHS Act or
  - Governor-designated and Secretary-certified shortage area under Section 6213(c) of the Omnibus Budget Reconciliation Act of 1989

RHCs must:

- Employ an NP or PA (RHCs may contract with NPs, PAs, CNMs, CPs, and CSWs when at least one NP or PA is employed by the RHC)
- Have an NP, PA, or CNM working at the clinic at least 50 percent of the time the RHC operates
- Directly furnish routine diagnostic and laboratory services
- Have arrangements with one or more hospitals to furnish medically-necessary services that are not available at the RHC
- Have available drugs and biologicals necessary for treating emergencies
- Furnish all of these laboratory tests on site:
  - Chemical examination of urine by stick or tablet method or both
  - Hemoglobin or hematocrit
- Blood sugar
- Examination of stool specimens for occult blood
- Pregnancy tests and
- Primary culturing for transmittal to a certified laboratory
- Have a quality assessment and performance improvement program
- Post their days and hours of operation
- Not be a rehabilitation agency or a facility that is primarily for the treatment of mental disease
- Not be a Federally Qualified Health Center and
- Meet other applicable State and Federal requirements

**RHC VISITS**

RHC visits are medically-necessary face-to-face medical or mental health visits or qualified preventive visits between the patient and a physician, NP, PA, CNM, CP, or CSW during which a qualified RHC service is furnished. A Transitional Care Management (TCM) service can also be an RHC visit. In certain limited situations, RHC visits may also include a visit by a registered professional nurse or a licensed practical nurse to a homebound patient.

RHC visits may take place:
- In the RHC
- At the patient’s residence (including an assisted living facility)
- In a Medicare-covered Part A Skilled Nursing Facility or
- At the scene of an accident

RHC visits may not take place at:
- An inpatient or outpatient hospital (including a Critical Access Hospital) or
- A facility which has specific requirements that preclude RHC visits

Encounters with more than one RHC practitioner on the same day, regardless of the length or complexity of the visit, or multiple encounters with the same RHC practitioner on the same day, constitute a single visit, except when the patient has any of these:
- An illness or injury requiring additional diagnosis or treatment subsequent to the first encounter (for example, he or she sees the practitioner in the morning for a medical condition and later in the day has a fall and returns to the RHC)
- A qualified medical visit and a qualified mental health visit on the same day
- An Initial Preventive Physical Examination (IPPE) and a separate medical and/or mental health visit on the same day
RHC PAYMENTS

The AIR is subject to a maximum payment per visit that is established by Congress and updated annually based on the percentage change in the Medicare Economic Index and subject to annual reconciliation. The per-visit limit does not apply to RHCs determined to be an integral and subordinate part of a hospital with fewer than 50 beds. Laboratory tests (excluding venipuncture) and technical components of RHC services are paid separately.

The coinsurance for Medicare patients is 20 percent of total charges, except for certain preventive services. Patient cost-sharing requirements for most Medicare-covered preventive services are waived, and Medicare pays 100 percent of the costs for these services. No coinsurance or deductible is required for the IPPE, Annual Wellness Visit, and any covered preventive services recommended with a grade of A or B by the U.S. Preventive Services Task Force. For more information about preventive services, including coinsurance and deductible requirements, refer to the Rural Health Clinic (RHC) Preventive Services Chart.

The Part B deductible applies to RHC services and is based on total charges. Non-covered expenses do not count toward the deductible. After the deductible has been satisfied, RHCs are paid 80 percent of the AIR for each RHC visit, with the exception of any preventive services reimbursed by Medicare at 100 percent of cost.

Effective January 1, 2018, RHCs can receive payment for:

- Chronic Care Management (CCM) or general Behavioral Health Integration (BHI) services when 20 minutes or more of CCM or general BHI services are furnished and RHCs bill HCPCS code G0511 either alone or with other payable services. For CCM services furnished on or before December 31, 2017, RHCs bill CPT code 99490 alone or with other payable services on an RHC claim.
- Psychiatric Collaborative Care Model (CoCM) services when 70 minutes or more of initial psychiatric CoCM services or 60 minutes or more of subsequent psychiatric CoCM services are furnished and RHCs bill HCPCS code G0512 either alone or with other payable services on an RHC claim.

Influenza and Pneumococcal Vaccine Administration and Payment

The costs of the influenza and pneumococcal vaccines and their administration are separately reimbursed at annual cost settlement. There is a separate worksheet on the cost report to report the cost of these vaccines and their administration. These costs should not be reported on an RHC claim when billing for RHC services. The patient pays no Part B deductible or coinsurance for these services. When an RHC practitioner sees a patient for the sole purpose of administering these vaccinations, the RHC may not bill for a visit; however, the costs of the vaccines and their administration are included on the annual cost report and reimbursed at cost settlement.

CPT only copyright 2017 American Medical Association. All rights reserved.
**Hepatitis B Vaccine (HBV) Administration and Payment**

The cost of the HBV and its administration are covered under the RHC’s AIR. If other services that constitute a qualifying RHC visit are furnished on the same day as the HBV, the charges for the vaccine and its administration should be reported on a separate line item to ensure that the deductible and coinsurance are not applied. When an RHC practitioner sees a patient for the sole purpose of administering this vaccination, the RHC may not bill for a visit; however, the costs of the vaccine and its administration are included on the annual cost report. In this instance, the charges for the HBV may be included on a claim for the patient’s subsequent RHC visit.

**Payment for Telehealth Services**

RHCs are authorized to serve as an originating site for telehealth services if the RHC is located in a qualifying area. An originating site is the location of an eligible Medicare patient at the time the service being furnished via a telecommunications system occurs. RHCs that serve as an originating site for telehealth services are paid an originating site facility fee. Charges for the originating site facility fee may be included on a claim, but the originating site facility fee may not be included on the cost report.

RHCs are not authorized to serve as a distant site for telehealth consultations. A distant site is the location of the practitioner at the time the telehealth service is furnished.

**COST REPORTS**

RHCs must file a cost report annually to determine their payment rate and reconcile interim payments, including adjustments for graduate medical education payments, bad debt, and influenza and pneumococcal vaccines and their administration. Independent RHCs must complete Form CMS-222-92, Independent Rural Health Clinic and Freestanding Federally Qualified Health Center Cost Report.

Hospital-based RHCs must complete Worksheet M of Form CMS-2552-10, Hospital and Hospital Health Care Complex Cost Report. Other provider-based RHCs must complete the appropriate set of RHC worksheets on the cost report filed by the parent provider.

To find more information about cost reports and forms, refer to the Provider Reimbursement Manual – Part 2.

**ANNUAL RECONCILIATION**

At the end of the annual cost reporting period, the RHC submits a report to the Medicare Administrative Contractor (MAC) that includes total allowable costs and total visits for RHC services for the reporting period and any other information that may be required. After reviewing the report, the MAC divides allowable costs by the number of actual visits to determine a final rate for the period. The MAC determines the total payment due and the amount necessary to reconcile payments made during the period with the total payment due. Both the interim and final payment rate are reviewed for productivity, reasonableness, and payment limitations. Contact your MAC if you have questions about the Medicare Program.

What is the difference between a provider-based RHC and an independent RHC?

- **Provider-based RHCs** are owned and operated as an “essential” part of a hospital, nursing home, or home health agency participating in the Medicare program. RHCs operate under the license, governance, and professional supervision of that organization. Most are hospital-owned.

- **Independent RHCs** are free-standing clinics owned by a provider or a provider entity (for-profit or not-for-profit). They may be owned and/or operated by a larger healthcare system, but do not qualify for, or have not pursued, provider-based status. More than half of independent RHCs are owned by providers/clinicians.

Source: Rural Health Information Hub (RHI-Hub)  
https://www.ruralhealthinfo.org/topics/rural-health-clinics#difference
What is the “enhanced reimbursement”? 

**MEDICARE** -

“RHCs receive an interim all-inclusive rate (AIR) payment per visit throughout the clinic's fiscal year, which is then reconciled through cost reporting at the end of the year. According to CMS's Medicare Benefit Policy Manual - Chapter 13 - Rural Health Clinic (RHC) and Federally Qualified Health Center (FQHC) Services, the interim payment rate is determined by taking the total allowable costs for RHC services divided by the total number of visits provided to RHC patients receiving core RHC services. In addition, RHCs are subject to productivity, payment limits, and other factors which can affect payment.

- RHCs staff must meet traditional Medicare regulations for coding and documentation, as well as unique RHC billing requirements.”

Source: Rural Health Information Hub (RHI-Hub)
https://www.ruralhealthinfo.org/topics/rural-health-clinics#medicare
What is the “enhanced reimbursement”?

**MEDICAID** -

“All state Medicaid programs are required to recognize RHC services. The states may reimburse RHCs under one of two different methodologies as outlined in a [2016 CMS letter to state health officials](https://www.ruralhealthinfo.org/topics/rural-health-clinics#medicare).

- The first is a prospective payment system (PPS). Under this methodology, the state calculates a per visit rate based on the reasonable costs for an RHC's first two years of operation.

- The second methodology is an alternative payment methodology. Under this methodology, there are only two requirements: 1) the clinic must agree to the methodology, and 2) the payment must at least equal the payment it would have received under the prospective payment system. State Medicaid agencies should be contacted to determine how RHC rates are determined in their state.

You can contact your state Medicaid Office or CMS Regional Office Rural Health Coordinator for information on how Medicaid pays for RHC services in your state.”

Source: Rural Health Information Hub (RHI-Hub)
[https://www.ruralhealthinfo.org/topics/rural-health-clinics#medicare](https://www.ruralhealthinfo.org/topics/rural-health-clinics#medicare)
What does it mean to have - or not - an RHC?

The main advantage of RHC status is enhanced reimbursement rates for providing Medicare and Medicaid services. (RHI-Hub)

Other Potential Benefits:

- **Financial Benefit**
  - If hospital is less than 50 beds Medicare reimbursement is not subject to the cap (2019 is $84.70)
  - Some hospital costs can be reallocated to the RHC
  - Increased volume for the hospital (lab, x-rays and in-patient volume)
What does it mean to have - or not - an RHC?

- Community Benefit
  - Hospital is not limited to in-patient care

- Caution!
  - CAHs can only expand RHCs within 35 miles of the hospital. If they expand out-patient services (non-RHC) there is potential risk to maintaining the CAH designation. Make sure the state regulatory agency as well as the State Office of Rural Health is aware there is pursuit of RHC development
What about Regulations and Administrative Burden?

Thanks to our friends at NARHC - CMS had Proposed Rules out for comment in the fall (comments were due by November 19, 2018) -

Some of the RHC-specific changes were:

- **Changing** the annual review of patient care policies and program evaluations to an every-other-year requirement.
- **Allowing** facilities to review their Emergency Preparedness program every other year instead of every year.
- **Eliminating** the requirement that RHCs must document their communication with emergency preparedness officials.
- **Allowing** facilities to train their staff on emergency preparedness every other year.
- **Reducing** the number of emergency preparedness exercises required per year to one.

Other Burdens and Barriers to Rural Healthcare Service

“In order for rural residents to have sufficient access, necessary and appropriate healthcare services must be available and obtainable in a timely manner. Even when an adequate supply of healthcare services exists in the community, there are other factors to consider in terms of healthcare access. For instance, to have good healthcare access, a rural resident must also have:

- Financial means to pay for services, such as health or dental insurance that is accepted by the provider
- Means to reach and use services, such as transportation to services that may be located at a distance, and the ability to take paid time off of work to use such services
- Confidence in their ability to communicate with healthcare providers, particularly if the patient is not fluent in English or has poor health literacy
- Trust that they can use services without compromising privacy
- Belief that they will receive quality care”

Rural Realities to Common Sense

Howard Chapman, Jr.
Director of Programs and Development
UNC Asheville
Asheville, NC

Tri-Area Community Health
Types of Primary Care Models (4 basic Models)

1. Private Practice, (solo or group) - Most common model of care, but no requirement for indigent care. (Hospital owned groups or networks)

2. Rural Health Clinic, (RHC) - Receive Cost Based Reimbursement for Medicare and Medicaid patients, but have no requirement for indigent care. They do require a NP or PA 20 hours per week.

3. Free Clinic, - Rely heavily on volunteer staffing and have limited hours of operation. Provide indigent care, but some require the patient or dependent be employed. Most do not serve those above 200% of the Federal Poverty Guidelines.

4. Community Health Centers, - Receive federal funding to serve the indigent and uninsured and accept self pay and insured patients as well. (Access to all patients). Receive Cost Based Reimbursement as an FQHC for Medicare and Medicaid patients.

Other sources of Primary Care

- Emergency Rooms
- Health Departments
- Urgent Care Clinics
Bureau of Primary Health Care (BPHC) Section 330 Community Health Center Program

- Part of President Johnson’s War on Poverty effort
- Public/Private Partnerships
- Governed by volunteer non-profit Board of Directors (51% must be users of the services by law)
- Addresses the health care needs of the local community
- Serve all regardless of the ability to pay
- Federal grant is used to underwrite the indigent care provided to qualified patients
- About 27% of our Total Budget comes from the Federal Grant and the other 73% we generate through Fee-for-Service and insurance contracts
- FQHC Provider status allows cost-based PPS reimbursement for CHCs for Medicare Patients
- Medicaid pays on a Perspective Payment System Rate (Based on established cost with annual 3.5% increase)
HRSA Program Requirements

1. Needs Assessment (Annual)
2. Required and Additional Health Services (Scope of Service)
3. Clinical Staffing
4. Accessible Locations and Hours of Operation
5. Coverage for Medical Emergencies During and After Hours
6. Continuity Of Care and Hospital Admitting
7. Sliding Fee Program
8. Quality Improvement/Assurance

- UVA Telemedicine Link (access to 24 specialties)
August 2006

Laurel Fork Health Commission began student health services in the existing Student Health Center at Ferrum College.

Construction was underway for the new 5,000 sq. ft. Ferrum Community Health Center on the lower level of Vaughn Chapel on the Ferrum College Campus.

New HRSA Funding - $1 million grant for construction of 16,300 sq. ft. facility.
Ferrum College Chapel

Tri-Area Community Health

January 2007
Ferrum Community Health Center Opens

- 7 Exam Rooms
- Treatment Room for Emergencies
- Lab Services
- Administrative Offices
- Meeting Room
- Waiting Room
- Full Service Pharmacy
- 22 employees
Ferrum Site

Medication Assistance Program

- Virginia Health Care Foundation Grant - $54,665
- October 2017 - September 2018
- Tri-Area Community Health helped a total of 714 patients
- receive 2,978 free prescriptions.

- Total Retail Value of Medication:
  $4.4 million

*Return on State Investment - $80.64 per every $1 invested

Tri-Area Community Health
Integrated Behavioral Health

- New Program at Laurel Fork (March 2012)
- Virginia Health Care Foundation Grant $98,250
- **HRSA Behavioral Health Integration (BHI) Grant** - $485,000/year
- Brief counseling on problem solving and coping skills
- Coordination with the Primary Care Provider (Use the same medical record)
- Improved Outcomes
  - Local Radford Study of 251 patients noted 49.8% improved their PHQ-9 depression scores by 50% and 94.8% showed some improvement in their PHQ-9 scores
  - Patients continue to work and function with better control
  - Patients avoid long-term medications
  - 70% of behavioral health patients can be served in this model and 30% still need traditional mental health counseling
Collaboration

SPECIALTY CARE

University of Virginia Telemedicine Program

- 24 separate specialties available to our patients
- They have a Sliding Fee Scale for qualified patients
- Digital Mammography Van for screenings at our sites
- Digital Retinopathy Screenings for diabetic patients
  * Goal of reading within 20 minutes
- Provide Patient Education through telemedicine
- Provider and staff CME
Franklin Memorial Hospital

- HENI Program (Health Efficiency Navigation Initiative)
  - 62% of uncompensated care was through Emergency Services
  - 20% of a person’s well-being is affected by access to care
- Focus on established Patient Medical Home and reduced ER visits
- Carilion has an Accountable Care Community Designation

Ballad Health’s Accountable Care Community Development

- Tri-Area Community Health is one of 150 community partners working the Ballad Health ACC Strategic Plan
- VA Choice Program for Outpatient Veteran’s Care (Tri-Area was one of four FQHCs Nationwide in the “Pilot” for this program

- Diabetes Quality Improvement Program
  - Endocrinologist to follow uncontrolled diabetic patients with a HbA1c of 8% or higher
  - Tied to the Certified Diabetes Education Classes through the UVA Office of Telemedicine and the digital retinopathy screenings
  - The use of “Home Monitoring” to collect daily measures on the patient and assure compliance with self-management goals

- CMS Grant with Radford University - Training Clinical Psychologist in rural areas (post graduate Fellowships)
Other Issues

- Medicaid Managed Care Expansion - July 1, 2012 into southwest Virginia
  - traditionally paid on a fee-for-service basis (Medicaid patients doubled)
  - not enough primary care physicians to cover southwest Virginia in the past
  - Six (6) MCOs currently contracting in the southwest market

- Patient Centered Medical Home - will provide an overall change in how medical care is delivered in this country (pay for performance by 2018)
  - Focus on prevention and treating the whole patient
  - Coordination of Care among all providers treating the patient
  - Primary care driven
  - Potential for pay for performance through improved outcomes and shared savings

- Fiscal Cliff and a possible 70% cut in FQHC Funding by October 1, 2019
Other Needs in Our Service Area:

- **Transportation** - No mass transportation and only limited taxi service.

- **Dental/Oral Health** - A PEW Charities Report noted 48% of Medicaid covered children in Virginia in 2011 did not have a dental visit.

**Possible Cause:**

- Shortage of dental providers in rural areas
- Lack of Virginia dentists who participate in Medicaid due to low reimbursement
National Health Service Corps

NHSC Programs provide funding to primary health care providers in exchange for service.

- Students pursuing primary care careers: The Scholarship Program pays for tuition and fees of future primary care providers, including physicians, dentists, nurse practitioners, certified nurse midwives, and physician assistants.
- Primary care providers interested in serving communities in need: The Loan Repayment Program provides up to $50,000 for loans in primary care—medical, dental, or mental/behavioral health.
- Students in the final year of medical or dental school pursuing primary care careers: The Students to Service Program provides up to $120,000 to students pursuing degrees in primary care and are in their final year of medical or dental school.

State-by-state breakdown of 93 rural hospital closures

Ayla Ellison (Twitter | Google+) - Tuesday, December 18, 2018 Print | Email

Of the 26 states that have seen at least one rural hospital close since 2010, those with the most closures are located in the South, according to research from the North Carolina Rural Health Research Program.

Seventeen hospitals in Texas have closed since 2010, the most of any state. Tennessee has seen the second-most closures, with nine hospitals closing since 2010. In third place is Georgia with seven closures.

Listed below are the 93 rural hospitals that closed between Jan. 1, 2010, and Dec. 17, 2018, as tracked by the NCRHPRP. For the purposes of its analysis, the NCRHPRP defined a hospital closure as the cessation in the provision of inpatient services. As of Dec. 17, 2018, all of the facilities listed below had stopped providing inpatient care. However, some of them still offered other services, including outpatient care, emergency care, urgent care or primary care.

Wellmont Health System closing Lee County hospital

Reasons cited include low use and cuts in Medicare reimbursements

BRISTOL HERALD COURIER | Sep 11, 2013

Lee Regional Medical Center, a 79-bed hospital in Pennington Gap, Va., will close Oct. 1.

Financial Management

1 in 5 rural hospitals at high risk of closing, analysis finds

Kelly Gooch - Wednesday, February 20th, 2019 Print | Email

Twenty-one percent of U.S. rural hospitals are at high risk of closing unless their finances improve, according to an analysis from management consultancy firm Navigant.

The study also found 64 percent, or 277, of high financial risk rural hospitals are considered essential to their communities.

'The hospital was a force holding the community together. Without it, I think this community probably will disintegrate'

By Shelby Livingston

Rural Tennessee town feels the downstream effects of its only community provider shutting its doors.

Rebuilding a Community

When Terry Fulmer’s 90-year-old aunt fell and tore her shoulder ligaments, she had surgery in Albany, a two-hour drive from her home in rural upstate New York.

Rural Hospitals Closing at an Alarming Rate

‘The hospital was a force holding the community together. Without it, I think this community probably will disintegrate’
What’s happening . . .

- Reimbursement
  - Medicare
  - Medicaid
  - Commercial
  - Uninsured
- Rural Economy
- Rural Demographics
- Healthcare delivery

Note: FFS (fee-for-service). "Physician fee schedule" includes spending on services provided by physicians and other health professionals such as nurse practitioners, physician assistants, and physical therapists. Dollar amounts are Medicare spending only and do not include beneficiary cost sharing. Spending for Medicare Advantage enrollees is also not included. Spending per beneficiary for inpatient hospital services equals spending for the sector (see Chart 1-3) divided by FFS enrollment in Part A. Spending per beneficiary for physician fee schedule services and outpatient hospital services equals spending for the sector (see Chart 1-3) divided by FFS enrollment in Part B. Spending per beneficiary for skilled nursing facilities and home health agencies equals spending for those sectors (see Chart 1-3) divided by total FFS enrollment.

Rural Economy . . .

Rural America Still Seeking Recovery

Rural America encompasses 72 percent of the country’s land and is home to 46 million residents. But the quality of life in rural areas is not keeping pace with that in urban communities. While most urban areas, with highly educated workforces, have recovered from the Great Recession, rural, small-town America has not.

Rural America has been in recession since a period of growth in the 1990s—far longer than the nation as a whole, according to a report on rural poverty released in December by the Casey School of Public Policy at the University of New Hampshire.

Since 2000, the economies of rural regions with less than 20,000 workers have grown by an average of 1.6 percent, compared with 9.1 percent in cities with workforces larger than 1 million. As jobs have dried up, especially in manufacturing (down 20 percent since 2000) and mining, rural residents have migrated to cities. Since 2010, the rural population has decreased by more than 462,000 people.

Reasons for the job losses include automation of blue-collar jobs, giant online retailers undercutting mom-and-pop businesses and an over-reliance on a single industry or business. With the loss of jobs comes a spike in poverty. The portion of rural counties with a poverty rate greater than 20 percent jumped from one-fifth in 2000 to one-third in 2015. Since 2007, however, the median income of rural Americans has remained around 25 percent less than the urban median—$45,295 compared with $60,542 in 2016.

STATELEGISLATURES 29 FEBRUARY 2018
MEASURING AMERICA

Our Changing Landscape

Over the past century, the urban landscape of the United States has changed, and with it, so have rural areas. As urban areas and the criteria used to define them have evolved, the share of the total population living in rural areas has decreased. In the 1910 Census, more than half of the total population (54.4 percent) lived in rural areas. In the 2010 Census, only 1 in 5 of the total population (19.3 percent) lived in rural areas.

The American Community Survey is part of the decennial census program and uses the same definition of rural geographies. It allows us to provide rich detailed statistics about the rural and urban populations in America each year, not just every 10 years.

Change in Rural and Urban Population Size: 1910–2010

Rural Demographics...

**DATA SNAPSHOT**

**APPALACHIA’S POPULATION**

- **The percentage of adults age 65+ in Appalachia is higher than the national average.**
  - 16.3% vs. 14.1%

- **Appalachia’s household income is 80% of the U.S. average.**
  - APPALACHIA: $60,525 vs. U.S.: $75,558

- **Per capita income is $24,302 in Appalachia.**
  - This is 84% of the U.S. average of $28,930

- **17.1% of Appalachians live below the poverty level.**
  - The U.S. average is 15.5%.

- **UNEMPLOYMENT RATE BY SUBREGION**
  - The unemployment rate for working-age adults is lowest in Northern Appalachia and highest in Central Appalachia.
  - Northern Appalachia: 6.1% vs. Central Appalachia: 8.6%

- **LABOR FORCE PARTICIPATION BY SUBREGION**
  - Labor force participation is highest in Northern Appalachia at 75.5%. It's lowest in Central Appalachia, at 59.5%.
  - Northern Appalachia: 75.5% vs. Central Appalachia: 59.5%
Healthcare Delivery . . .

Hospital Admissions per 1,000 Population by Ownership Type | The Henry J. Kaiser Family Foundation

Timeframe: 1999 - 2016
Critical Access Hospital . . .
Critical Access Hospital . . .

- Eligible hospitals must meet the following conditions to obtain CAH designation:
  - Have 25 or fewer acute care inpatient beds
  - Be located more than 35 miles from another hospital (exceptions may apply)
  - Maintain an annual average length of stay of 96 hours or less for acute care patients
  - Provide 24/7 emergency care services
Critical Access Hospital . . .

- CAH status includes the following benefits:
  - Cost-based reimbursement from Medicare. As of January 1, 2004, CAHs are eligible for allowable cost plus 1% reimbursement. In some states CAHs may also receive cost-based reimbursement from Medicaid.
  - Flexible staffing and services, to the extent permitted under state licensure laws.
  - Capital improvement costs included in allowable costs for determining Medicare reimbursement.
  - Access to Flex Program educational resources, technical assistance, and/or grants.
Rural healthcare . . .

I'm sorry... your local rural hospital closed and you didn't make it to the next one.
Policy & Rural Health Advocacy

Beth O’Connor, M. Ed.
So what do we do??

ADVOCATE!
What is advocacy?

Advocacy is the tool citizens use in our democracy to bring about improvements. But really more than that – you advocate daily.
If you can’t advocate...

▸ Educate

▸ You’ll hear lobby - think advocacy or go further and think educate

▸ All you are doing is asking elected officials and their staff to understand your situation - they can do the rest

▸ First Amendment rights
Why advocate?

- You care about your community
- You have a need
- You're in the state capitol or DC anyway

www.CartoonStock.com
Lots of Issues

What types of issues do elected officials discuss?

- Pacific Command
- Palau
- Pardon Attorney, Office of
- Parole Commission
- Peace Corps
- Pennsylvania
- Political Affairs
- Pacific Northwest Electric Power and Conservation Planning Council
- Pension Benefit Guaranty Corporation
- Pentagon Force Protection Agency
- Pipeline and Hazardous Materials Safety Administration
- Policy Development and Research
- President's Council on Fitness, Sports and Nutrition
- Prisoner of War/Missing in Action Accounting Agency
- Privacy and Civil Liberties Oversight Board
- Public Diplomacy and Public Affairs
- Postal Regulatory Commission
- Postal Service
- Power Administrations
- Presidio Trust
- Public and Indian Housing
- Puerto Rico
Lots of issues!

- You will know more about the issue you want to discuss than they do
- They will pretend they know what you are talking about
- You MUST explain acronyms & concepts
Time crunch

- You will not be the only meeting they have that day (or even that hour)
- Meetings are usually scheduled in 15-minute time slots and back to back
- Be concise
- Be flexible
- Be early
Pick a core topic!

I think you need to be more focussed.

Save the whale and the rainforests.
Free the Cheltenham one.
Legalise cannabis.
Save the clone layer.

© Original Artist
Advocacy formats

- Office visit
- Phone calls
- Fax
- E-mail
- Social media
- Greet at public events
- Invite to facility or event

NO LETTERS!!
6 Rules

1) Have an “ask”
2) Contact decision maker
3) Note importance to official’s area
4) Know who you are speaking to
5) Be concise
6) Follow up
1) Have an ask

- They like to say ‘yes’

- Will avoid saying ‘no’ - and are good at it

- Will talk about topics of interest to you, but won’t ask how they can help

- **YOU** must be specific about what you want from them!
Frame Your Message

- I’m here to talk about...
- No more than 3 ‘asks’ per contact
  - Short term
  - Intermediate
  - Long term
- Use anecdotes and stories
- Imbed data when possible
- Stay on message
2) Contact Decision Maker

- Go to an event where elected official is and ask in person
- Get an e-mail or phone call to correct staff person
  - (DON’T leave a message with whoever answers the phone)
- For Congressional staffers:
  - john.doe@mail.house.gov
  - jane_doe @senator.senate.gov
3) Importance to Area

- How is your ask important to the official’s state or district?
- Personalize it
- Give your experience
- They want to help!
4) Know who you are speaking to

- Most Congressional staffers are under 30
- They are making important decisions
- Be polite - they hear demands all day
- Where is the bill? What committee has it?
- Is the staffer new or experienced? Are they from your area? State?
- Don’t assume anything!
How would I know all that?

- Advocacy Organization
  - National Rural Health Association
  - American Osteopathic Association
  - Society for Public Health Education
  - American Nurses Association
  - Association for Community Health Improvement
- Coordinate visits
- Action Alerts
- The more responses, the more likely Congress is to act!
5) Be Concise

- First impressions are important
- Have your ask condensed into a fact sheet
  - 1 page max per ask
- Walk through materials
- Don’t pretend you know more than you do
- Understand time constraints
- Be yourself
6) Follow up

- Send e-mail (along with information you promised to get for them) no more than a week after a face to face meeting.

- If they act on your request, make sure you let them know how much it is appreciated!
What if?

- You know the politician will vote AGAINST what you want anyway?

- You know the politician will vote FOR what you want anyway?
The Phone Call

- Often will leave message
  - Don’t leave it with receptionist
- Introduce yourself and explain your organization
- Keep it simple and brief
- Offer more info by e-mail
- Thank them
Meet & Greet

- No more than one ask
- Hand over information with the handshake
- Introduce self and explain organization
- Thank them
- Total encounter should last less than 30 seconds
The Office Visit

- Concise
- Factual
- Polite
- Punctual
- Understand their time constraint
- Give your experience!
Hollywood vs Reality

- Space
- Attention (yours & theirs)
- Knowledge
To Avoid

- Take their whole day
- Make up things - if you don’t know, tell them you’ll get back to them
- Be really late
- Threaten to not vote for them
Other tips

- Develop relationships
  - Send newsletters, event announcements, etc. Don’t wait for a problem to arise before making contact
- Invite to your organization
  - They LOVE photo ops (ribbon cuttings, scholarship announcements, etc.)
  - They want to learn about your situation
  - They want to be seen doing good things
- Friends in high places
  - Low-level staffers won’t be there for long
  - Find a way to connect with them
Indirect Advocacy

- Public gatherings
  - Media attention is key

- Letters to the Editor

- OpEd
  - Make sure you understand the newspaper guidelines
You - yes, YOU - can change DC

- Don’t underestimate what you can do
- Realize that relationships you develop now will matter in the future
- Spending 5 minutes to send an e-mail or make a phone call can do a lot
“Senator, the American people, whom you often mention in your speeches, would like a word with you.”
Wrap Up & Conclusions
What are our take-aways?

- Name some general principles of advocacy and education of policy makers and stakeholders.
- Name a benefit of a Critical Access Hospital (CAH).
- What’s the difference between a Federally Qualified Health Center (FQHC), a Community Health Clinic (CHC), and other rural provider types?
- Name a benefit of the Rural Health Clinic (RHC) program.
- How might you work with the State Office of Rural Health (SORH) in your state?
Questions?
Thanks so much!
We appreciate your participation!
