# University Curriculum Committee RECOMMENDATION

## SR 20-21-37 CC

Recommends approval of the listed **UNDERGRADUATE COURSES CHANGES** in the following college and/or schools/programs:

### College of Engineering and Computer Science

#### **ENGR 240 Manufacturing Processes**

**Summary of Change:** Change in alpha designator from ENGR to ME

**Rationale:** This course is a required course for ME students only. So, its alpha designator should be changed to ME 240 instead of ENGR 240.

**Curriculum:**

#### **ENGR 245 Circuits and Instrumentation**

**Summary of Change:** Change in alpha designator from ENGR to ME

**Rationale:** This course is a required course for ME students only. So, its alpha designator should be changed to ME 245 instead of ENGR 245.

**Curriculum:**

#### **ENGR 452 Capstone Design I**

**Summary of Change:** Change in alpha designator from ENGR to ME and change in credit hours.

**Rationale:** This course is a required course for ME students only. So, its alpha designator should be changed to ME 452 instead of ENGR 452. Also the CH reduced from 2 to 1 as part of an effort to reduce the overall program CH from 132-125 (preparation for the FE exam is now covered in other courses).

**Curriculum:**

#### **ENGR 453 Capstone Design II**

**Summary of Change:** Change in alpha designator from ENGR to ME.

# University Curriculum Committee RECOMMENDATION

## SR 20-21-37 CC

**Rationale:** This course is a required course for ME students only. So, its alpha designator should be changed to ME 453 instead of ENGR 453.

## ME 360 Fluid Dynamics

**Summary of Change:** Change in credit hours from 3 to 4 and change in catalog description.

**Rationale:** (1) To prepare students in the Bachelor of Science Mechanical Engineering (BSME) program for the Fundamentals of Engineering (FE) exam with a focus on the Fluid Mechanics section. (2) To reduce the number of credit hours in the BSME program curriculum from 132 to 125 (as requested by Marshall University). Please note that the new ME 360 (4 credit hours), unlike the old version (3 credit hours), does not require ENGR 318 (Fluid Mechanics) as a prerequisite. While ENGR 318 (Fluid Mechanics) is not deleted, it will not be required for the BSME program and thus, will be removed from the BSME curriculum. The main topics of ENGR 318 (such as fluid kinematics, momentum analysis, and dimensional analysis) will be consolidated with the topics covered in ME 360 (offered as a comprehensive, four credit hour course); please see the catalog description on Page 2.

## SFT 465 Incident Investigation Tech

**Summary of Change:** Change in catalog description.

**Rationale:** Material from SFT 489 is being incorporated into this course in order to streamline the curriculum and to allow for an additional elective in another area.

## College of Health Professions

### CLS 472 Advanced Clinical Practicum I

**Summary of Change:** Change in credit hours.

**Rationale:** Originally the course was set with a credit hour range of 1 to 3 with initial plans of possibly counting previous work experience in the clinical laboratory field for partial credit for each course. Partial credit awarded for previous experience was not pursued, and it was decided that all students,

regardless of background and work experience, would be required to complete the same requirements and clinical tasks within the course, therefore, the credit hours need to be changed to 3 hours, and not be variable.

### CLS 473 Advanced Clinical Practicum II

**Summary of Change:** Change in credit hours.

**Rationale:** Originally the course was set with a credit hour range of 1 to 3 with initial plans of possibly counting previous work experience in the clinical laboratory field for partial credit for each course. Partial credit awarded for previous experience was not pursued, and it was decided that all students, regardless of background and work experience, would be required to complete the same requirements and clinical tasks within the course, therefore, the credit hours need to be changed to 3 hours, and not be variable.

### ESS 478 Energy Sources, Body Composition and Performance

**Summary of Change:** Change in course title.

**Rationale:** ESS 478 is offered as ESS 478/578. ESS 578 is titled “Exercise Metabolism”, which is more suitable to the course description and the contents instructed in ESS 478.

## College of Liberal Arts

### HST 407 History of Sexuality

**Summary of Change:** Change in course title and catalog description.

**Rationale:** The change is about clarification for students. Since “sexuality” is often used as code for LGBT, students sometimes sign up for the class thinking it is my LGBT history class. I hope this change will help clarify that this is a broader subject.

**HST 450 Baseball in the Americas**

**Summary of Change:** Change in course number.

**Rationale:** The class fits in with a 300 level history class much better than 400. The material and methods of teaching do not have to change much at all. I think it will be more appealing class for students.

**College of Science**

**BSC 491 Capstone Experience**

**Summary of Change:** Change in catalog description.

**Rationale:** The old description did not accurately reflect what we allow for Capstone (we do not have internships), or how the approval works. The requested change brings this in line with what we do.
