**University Curriculum Committee
RECOMMENDATION**

SR 21-22-52 UCC

Recommends that the University Catalog Editor may make catalog edits related to the mass course changes splitting lectures and labs that were made by the College of Science. The recommendation allows for the catalog edits without each individual program submitting curricular program change documents to the University Curriculum Committee.

RATIONALE:

The BSC lab courses are being separated from one course that contained the course and lab, into two unique course numbers, with the course being BSC 104 and the lab being BSC 104L, for example. Since these course changes affect programs in many colleges, the paperwork and number of approvals required would be immense.

MEMORANDUM

FROM: Sonja G. Cantrell-Johnson, University Registrar 

DATE: February 21, 2022

TO: Zachary Garrett, University Curriculum Committee Chair

RE: BSC Lab Course Changes

This memo is in support of the University Curriculum Committee and their decision to not require each program to provide separate curriculum change forms due to the change in the BSC lab courses. The BSC lab courses are being separated from one course that contained the course and lab, into two unique course numbers, with the course being BSC 104 and the lab being BSC 104L, for example.

Since these course changes affect programs in many colleges if major changes or program changes were required, then the amount of paperwork could be immense and the volume of approvals of this change could hold up other approvals that are time sensitive.
