Pre-engineering course accepted by WVU

By CINDY GABLE Copy Chief

Marshall's pre-engineering program was favorably considered Monday in the College of Science and the Community College.

Dr. E.S. Hanrahan, dean of the College of Science, said Marshall needs to offer some sort of engineering program. "I hope we can make people aware they can come to Marshall for two years (in the pre-engineering program) and transfer somewhere else (to finish

their degrees)," he said.
Dr. Paul D. Hines, vice president of the Community College, said the community requires a program such as this. "There will be a need for an engineering program - four years -

here," he said. Hines said all the two-year engineering technology programs in electrical, mechanical and civil engineering are being dropped.

The estimated 32 students currently in those programs will have the opportunity to complete their pro-

Hanrahan said Marshall had an accredited program in civil engineering in 1973 when the Board of Regents phased out the engineering programs. He said Marshall also offered degrees in electricial and mechanical engineering then, but they weren't accredited.

The BOR cut out the programs because they said there wasn't enough demand for them and they were too expensive, according to Hanrahan. The BOR said it couldn't afford to keep another engineering

program when there were already two other schools, West Virginia University and West Virginia Tech, which had accredited programs, he

Hanrahan said the program at Marshall then had grown so much it needed better facilities and equipment, which the BOR could not justify with the other engineering programs in the state.

Hanrahan said WVU welcomed the idea of pre-engineering at Marshall. "They were very cooperative, very helpful," he said.

The other state school with accredited engineering programs, West Virginia Tech, has yet to respond to his requests, Hanrahan said. He said he sent letters to the dean of the School of Engineering in mid-January and again in mid-March, but has not received replies.

Hanrahan said they are also trying to get similar agreements with out-of-state schools. "I'd like to get the same kind of understanding (as with WVU) with VPI (Virginia Tech) and the University of Cincinnati, two very good engineering schools.'

Hanrahan said he believes Marshall needs only certain engineering programs, such as civil, mechanical and possibly electrical. "Some of the special kinds (chemical and aero-nautical) aren't very practical for us," he said.

Hines said this change will better Marshall. "I think Marshall has a tradition in engineering and it will continue in the College of Science,"

Newsman sees decline of politics

The "proliferation of presidential primaries" is the main reason newsman Douglas Kiker believes the American political system is

The NBC-TV Washington news correspondent spoke Monday on "Politics and Other Crimes" as part of the Marshall Artists Series Forum.

The major factor in the political decline, according to Kiker, is the American system of presidential elections. It now takes two years of active campaigning to become President, Kiker stated, with candidates having to spend too much time traveling from state to state instead of concentrating on the issues.

This can be remedied, Kiker said, by having regional primaries. This would save money and time for the

The new campaign law and the Supreme Court's interpretation of it has given rise to candidates that are wealthy and can afford to spend their own money on expensive campaigning, Kiker noted.

The situation can be remedied by increasing the \$1,000 limit to at least \$5,000, Kiker suggested. This would get the candidates "out of TV and airplanes and into more public appearances.'

mission is phasing out all 10 watt educational stations, because it decided these stations do not provide adequate service to the entire community, according to station manager Keith Spears. The FCC could not be reached for comment.
Stations such as WMUL, Spears said, are faced with two alternatives:

either losing their license or increasing their power to 100 watts. To gain the additional wattage from

the FCC, Spears said he hopes to raise at least \$9,000 for a new transmitter and other technical equipment through "any available avenues." He did not go into specific details on funding sources.
However, WMUL must endure "a lot of red tape and paperwork,"

according to student manager Celia Kitchen, and she added that the FCC and the West Virginia Educational Broadcasting Association must approve all changes.

If the license is discontinued,

WMUL will no longer exist as a radio station, but Kitchen said it will continue to function as a common carrier and serve the university in a similar capacity as closed circuit television. However, Spears "doesn't entertain the idea of a common carrier, because it isn't real broad-

Should the additional wattage be obtained, Kitchen said WMUL will be able to do more for the entire

AAUP to elect chapter officers at meeting

The American Association of University Professors will meet Thursday at 3:15 p.m. in room 2W22 of Memorial Student Center.

The agenda will include a report on university promotion policies and practices, including discussion of a chapter resolution; reports from members of the executive committee on chapter membership, the treasury, Committee R and state conference activities; and nomination and election of chapter officers for the next academic year.

Volunteers will also be solicited to work on special interest groups or committee projects.

Wednesday

Requirements to be spelled out

Facility guidelines needed for precision

Staff Writer

The new policies being formulated for guidelines for the use of Marshall campus facilities by non-university organizations stem from the desire to spell out precise requirements, according to MU officials.

Policies for the use of MU facilities are being formulated for implementation by the 1979-80 school year under the request of the West Virginia Board of Regents. The university has always had policies concerning the use of campus facilities by non-university organizations, but the new policies will primarily specify the requirements in writing, according to Karl J. Egnatoff, vice president for admini-

Egnatoff had earlier said the controversy concerning Coach Stu Aberdeen's use of the university for a basketball camp was the probable catalyst in the policies-formation the BOR requested.

Egnatoff said the policies which Marshall presently operates under are not "approved" policies, but follow the guidelines of the BOR.

Egnatoff said there are not any problems with the present policies, but formulating a new policy will

"And I think the Board is trying-as is correct-to bring some uniformity to the entire system instead of letting each institution go its own way," he

Dr. Howard L. Mills, chairman of the Physical Facilities and Planning Committee, said the new policy would eliminate any possible mis-

With clear specifications, no one can question why certain organizations were not allowed the use of the facilities, Mills said.

"We always have problems in dealing with outside groups because we have to go into it and say, 'Okay, this kind of group can use the facilities and this kind of group can't,' "Mills explained. "We must have some way to differentiate. The problems come about in the interpretations."

Egnatoff said the policies being formulated will coordinate guidelines set up by both the Physical Facilities and Planning Committee and the BOR. The guidelines are almost identical, Egnatoff said, with a

possible differentiation in opinions on which non-university organizations may be granted the right to use campus facilities.

Mills said the committee will be checking present policies to insure that they are up-to-date and need no changes.

Policies which govern the use of facilities are administered in three areas, Mills said. Bruce Greenwood, technical director for Administrative Services, administers the use of MU's four auditoriumns. Dr. Robert L. Case, chairman of the Health, Physical Education and Recreation

Department, administers the use of the physical education facilities, and Registrar Robert H. Eddins administers the use of academic facilities. Mills said policies will also be

formulated for any areas not previously covered.

The guidelines will govern the use of facilities by non-university organizations only. Egnatoff said policies concerning the use of the facilities by non—university organizations sponsored by university departments follow a policy outlined in The Green Book, which details university

Stu's camp moves to Kentucky

By CLARA FIELDS Reporter

A combination of bad publicity given the camp by the media last year and the construction of the new multi-purpose facility is the reason given for the Stu Aberdeen Basketball Camp's move to Kentucky Christian College, according to C.J. Woollum, assistant basketball coach. Kentucky Christian College is located in Grayson, Ky., a small town

of about 2,300 population 32 miles west of Huntington.

The camp will run for three weeks, July 15-Aug. 4, two weeks for boys and one week for girls. Young men and women between the ages of 10 and 18 will be accepted. Campers will live in dorms adjacent to camp facilities, and eat all meals in the college dining room.

Woollum stated they were expecting about 250 to 300 pupils per week at Donald Reid Damron, KCC coach, said "The camp will be good for KCC in that it will be good exposure for the school.

KCC is a Bible college, dedicated to the education of young men and young women for specialized Christian service. The college has a faculty and staff of over 40 persons, a student body in excess of 400 and an annual graduating class of about 60.

Damron said, "We are a Christian

School. Sports is part of our

curriculum, but is secondary as far as character building is concerned. Woollum said the basketball staff at Marshall has an outstanding program planned and they are looking forward

to the camp. The coaching staff at the camp will include some of the top West Virginia high school coaches as well as top high school and college coaches from surrounding states. College basketball players will serve

Death and dying Class to deal with acceptance of inevitable

By DIANE SLAUGHTER Staff Writer

Death and dying are subjects people rarely discuss. They are denied in our culture and are often replaced by the quest for youth and attempts to prolong life with machinery.

"We must realize that we are a Dr. William A. McDowell, associate professor of counseling and rehabili-

College students are also joining the search for youth and vigor, McDowell said. "Staying young and looking young are becoming more than a matter of good health," he said. 'We deny not only death, but the same as everyone else's, and we

aging process also. College kids see it at graduation, but maybe it's more a question of transitions.

McDowell said people should put their emphasis on living and living "When we discover what dying means, we can discover what "We must realize that we are a living means. People are searching death-denying culture," according to for meanings," he explained. He added that if people can learn to face death instead of ignoring it, many of the taboos and negative elements associated with death may disappear. Sensitivity to other's feelings is also something stressed by McDowell. "Each person thinks about death differently. Our ideas are not the

explained that we should learn to be more sensitive to another person's loss, and try to deal with the feelings of others more appropriately.

McDowell also talked about the care of a dying patient. "Since most deaths do occur in an institutional setting, some revision needs to be made in the training of our health care specialists," he said.

McDowell, who is teaching a fall seminar on death and dying, said many nurses take the course. Few take courses dealing with those clear evidence for these stages. subjects.

need to realize this," he said. He transmitted to the terminal patient, "The assumptions and however. values of the physician are often brought to the bedside of the terminal patient, and these can say something to both the family and the patient," McDowell explained.

Acceptance of death is a universally desired outcome, he said, but this is not very realistic. Five stages of death have commonly been accepted by the health care profession and other professionals concerned with the care of the dying patient, schools, though, require doctors to although McDowell said there is no

After the patient has been told of The feelings of the physician can be the situation, the first stage of death

is often denial, McDowell said. "The until this event happens and then I'll reaction is fairly typical, and the patient keeps thinking 'It can't be me; there must be a mistake," he explained. The second stage the terminal

patient often encounters is one of anger, he explained. The anger can be directed toward the physician, the patient's family, or most often toward the nursing staff. "The patient has a feeling that their time to die is not yet here and that the angels can wait," he said.

Bargaining is the third stage in the acceptance of death. "IN THE BARGAINING STAGE* THE PA-TIENT TRIES TO SAY 'Let me live

do something in return," McDowell explained.

The fourth stage is often one of depression during which the patient may lose interest in most everything around him/her, he explained.

The fifth and final stage, according to McDowell is one of acceptance, in which the patient acknowledges the impending death with some sense of

McDowell stressed that these stages are not necessarily univeral and that all patients go through all five stages in this or any order. He also added that few patients ever lose all sense

[Editor's note: The follow- idea as being unworkable Katy's same solution was used. A nine pocket apron was purchased and each member of the student court was assigned a pocket by his appointer, the chief executive. They were told to show up for court and Smile. The court was then to make a unanimous decision in favor of the election commissioners.

> At this point, let us turn back to the original story of Katy No-pocket. Here the apron solution worked per-Katy and her fectly. children lived happily ever after. Also, each second grade student was taught his first lesson in overcoming functional fixedness-substituting an apron for a

However, the executive branch was not quite so fortunate in success with its solution. Though the court did, indeed, arrange to remove the candidates' names from the ballot prior to the election, the decision was overturned by an administration board just hours before the election. (The Constitution of Marshall University gives the administration board this

Thus ends my story of both Katy No-pocket and inside affairs of student government. The lesson to be remembered here is not that the president wears an apron, nor that aprons with more than five thousand pockets are hard to find. Instead, this incident has shown that there is no place for a kangaroo court at Marshall University.

To conclude my commen-

authority.)

tary, I wish to appeal to each representative of the student senate to closely examine the division in the three branches of student government. In doing so, I think that you will find a very thin line between our executive and judicial branches. I urge you to untie these apron strings and return the student government system to the three distinct branches that the constitution calls for. Moreover, I'urge that in the future vou will carefully select competent and impartial students to conduct our election; and also approve only those recommended student court members who are knowledgeable and sincere enough to judge cases in a fair and unbiased manner.

Distance runner calls it quits; player/coach disagreement cited

By SCOTT BARTON Sports writer

Marshall distance runner Brian Jonard, Caldwell, Ohio, sophomore, has left the team and says he will-not return to school next

"As far as I'm concerned (Coach) O'Donnell kicked me off. Later he told the captains I could come back to the team if I wanted to," Jonard said.

There were many problems which led to his decision not to return to school, he said, but an incident following the Appalachian State meet, which Marshall lost by one point on April 13 was the

BRIAN JONARD

"During the race he (O'Donnell) said to me, run like a man, not a child,"
Jonard said. "After that I
just didn't feel like running. I guess that was no way to race at that point, it was just no way for him to act."

After the meet, during a team meeting Jonard said O'Donnell yelled at the team, cutting it down, and

to sit back down he wanted to talk to me later, and I said I don't have to talk to you," Jonard said.

In an article in the April 14, 1979 edition of the Herald-Dispatch, O'Donnell cited three people, including Jonard as being causes for the one-point loss to Appalachian State.

"I thought it was very unprofessional on his part,"

scholarship money.

Jonard said O'Donnell used the money like the carrot on the end of the pole in front of the donkey.

"When I was running well act, but I was still in the he was all behind me, ready to give me anything wanted. When I started to have problems, he started talking about money," Jonard said.

the loss.

'I kind of smiled, a smirk, and O'Donnell told me to get out. So, I left. He said

Jonard said part of the problem stemmed from Christmas break that enabled him to run only three to four days per week.

He said he returned out-ofshape, and later hurt his foot. "I never got in the swing of things.

indoor season, and ran in His father and two brothers only two outdoor meets this have graduated from there, Another problem Jonard season. He said his and he has one brother said he has had with attitude was poor at the currently enrolled there.

O'Donnell has been over start, but he felt it had improved greatly during the time between indoor season and the Appalachian State

meet.

"I regret having done so much for him (O'Donnell) and him giving so little in return," Jonard said.

Jonard has run for O'Donnell in two different circumstances, once as a high school runner, and now in

O'Donnell said, "Brian hasn't spoken to me about leaving the team or school. run cross country next year Until he talks to me his if I had to," according to status on the team is status on the team is unknown.'

In two years of college personal problems over running, Jonard was selected All-Southern Conference in cross country two years in a row. Marshall won the Southern Conference championship in 1977 and finished second in 1978.

He sat out during the attend Ohio State next year.
