BUS members, adviser clash on meeting purpose

By CHRISTY PERRY Reporter

Two members of the Black United Students organization and the director of the MU Human Relations Office have disagreed on the purpose of a meeting held between them Wednesday.

Leroy Thorpe, New York junior and Anthony Stradwick, Wheeling sophomore, said Sunday they were not attacking DeWayne Lyles' performance as Human Relations director in last week's meeting, but were criticizing his advisory function in BUS.

Lyles, however, said, "I disagree with Mr. Thorpe's viewpoint, because he was attacking at the time. I thought he wanted to talk about my role (as BUS adviser), but he did, in fact, attack."

Thorpe said Lyles has not been advising the BUS president as past Human Relations directors have. "I don't think he's doing a good job of being adviser of BUS and other minorities," Thorpe said.

Stradwick stressed, "We were not questioning his job." He said the meeting was supposed to have been a question and answer period, in which he and Thorpe could

find out what Lyle's job was and what his responsibilities were. "We found out a lot about his job," Stradwick added.

Lyles said he has scheduled another meeting with Thorpe, and said possibly when he talks to Thorpe again, "he(Thorpe) will be more rational and consistent." He said he "didn't get an understanding" from Thorpe at the first meeting Wedesday.

"I felt I was unable to answer Mr. Thorpe's questions rationally, because' of his frustrations and inconsistency," Lyles said. He said Thorpe was "vulgar and hostile" toward him at certain times during the meeting.

Regarding the productivity of the meeting, Thorpe said, "We got our message across." He said he has seen positive changes since the meeting, citing an offer of legal help from Ken Blue, associate deay of Student Development, as an example.

Stradwick said because of the meeting, he has found some weaknesses of BUS, and found ways to strengthen the organization.

Lyles would not comment on the productivity of the meeting.

Feasibility study proposed

Stradwick and Thorpe also said the main goal of BUS at this time is to have the group function on the same level as Student Government. "Everything Student Government has, we want for BUS," Thorpe said.

Thorpe added, "The administration seems to ignore BUS. I think they look at it as just a Black Awareness Week." He said BUS could be a major help to both blacks and whites, and to different ethnic groups as well.

"I think The Parthenon has its negative aspects, too," Thorpe said. He said The Parthenon has sometimes failed to recognize BUS, and while students always read about Student Government in the paper, he said he hasn't seen a reporter at a BUS meeting recently.

Parthenon editor Jody Jividen said, "A lot of things should be getting covered, but we don't have the body to do it." Jividen said The Parthenon has a reporter shortage because this semester's news writing class is the smallest the paper has ever had.

Jividen added that lack of BUS coverage by The Parthenon "has absolutely nothing to do with the fact they're black.'

Kimberly Knight, Bristol senior, and Heartsfield, and the Dixie Dreggs great opportunity for Marshall students

By CINDY GABLE Copy Chief

Contrary to a report in The Parthenon Thursday, there are no plans to submit a proposal for a four-year engineering program to the Board of Regents, according to President Robert B. Hayes and Thomas W. Olson, assistant professor of engineering.

Thursday's front-page story said Hayes, Dean of the College of Science E.S. Hanrahan and Vice President/Dean of Student Affairs Richard G. Fisher had plans to submit to the BOR in the future a plan for a four-year program in engineering. Hayes said Monday no such plan exists. In Marshall's five-year plan, a feasibility study for engineering was proposed; not a

program, he said.

Four-year engineering program not planned

Olson also said only a feasibility study was proposed. "In Marshall University's fiveyear plan submitted to the Board of Regents. there was a request for a feasibility study in engineering," he said.

Although the story reported Olson as saying Hayes, Hanrahan and Fisher had plans to submit the program, Olson said Monday, "I do not think a proposal is forthcoming from any of those gentlemen."

The story correctly stated Hanrahan and Fisher did not know of any such plan. Olson did say, however, he hoped the BOR would find a need for an engineering program at Marshall. "I think the Board of Regents would look favorably upon a fouryear degree proposal," he said. "I believe

they could now look at the job market and project the needs in the many technical programs.

If the BOR found Marshall needed to offer a four-year engineering degree, Olson said MU would need a building, some furniture and some additional equipment. He said the program could be started with equipment the university still has from the late 60s and early 70s when there was an accredited civil engineering program here.

The building to house the program is the biggest need, according to Olson. "It should be central to campus," he said. "One of the things that hurt our program before was that we were, in effect, off campus." Olson was referring to the engineering building on 20th Street, almost four blocks from Old Main.

Tuesday

Mostly sunny

Skies today will be mostly sunny, with a high near 70. degrees, according to the National Weather Service at Tri-State Airport. Tonight's skies will be mostly clear, and the low will be in the low 40's.

There is a 10 per cent chance of precipitation throughout the forecast period. Outlook for Wednesday includes sunny skies, and a high of 75 degrees

to leadership banquet **By CHRISTY PERRY** Reporter

Student organization

presidents invited

The presidents of all recognized campus student organizations have been invited to a Leadership Banquet May 2 in the Memorial Student Center co-sponsored by the Student Senate and Student Life/Student Activities

Doug Mullineaux, Gallipolis, Ohio senior, said the leaders deserve the banquet "for the work they've put in for the students." Mullineaux added the leaders should be recognized because, "They've tried to improve things."

I don't think they should get it," Hinton sophomore Robin Ritter said of the banquet. "I think they could use it (the \$300 for the people who paid it," she said, adding she didn't feel her one dollar had been well spent.

Stu signs Florida's Charles Jones

By MIKE CHERRY Sports Editor

Marshall now has a Redwood in the forest of NCAA basketball bigmen.

The Herd announced Monday that it signed 6-8, 240-pound Charles Jones to a basketball grant-in-aid. Head coach Stu Aberdeen was in Stuart, Fla., Monday to be present when Florida's AAAA high school "Player of the Year" signed.

"Charles' decision to sign with Marshall represents a giant step for our basketball program towards respectability and the goals we have set," Aberdeen said. "He is a true low post player, the type of player who can give us strong inside scoring and rebounding, which is a critical need."

Jones averaged 20 points and 15 rebounds per game while leading Martin County High to a record of 34-2 last season and the state championship. In his three years as a starter, Jones scored 1,482 points and gathered 1,110 rebounds.

Sunday, Jones was named Florida's high school player of the year by the Florida

Sports Writers Association. Some additional honors this season include first team AAAA all-state, Converse Rubber Company's first team all-American and most valuable player in the Florida high school state tournament.

"I'm-very proud of Marshall's basketball program and our coaching staff because to sign Charles, we won a heckuva fight with some mighty fine basketball schools who were heavily involved." Besides his trip to Marshall April 20-22, Jones visited Auburn, Florida, Clemson, Vanderbilt and Penn State.

The acquisition of Jones brings the Herd's number of signings to four, having previously signed Huntington High's David Wade, Tennessee's Barry Kincaid and University of Baylor transfer Mike Fennell. The Herd is currently courting University of Minnesota transfer Leo Rautins, who has narrowed his choices to Marshall and Syracuse.

The signing of Jones not only gives Marshall a much needed bigman, but it gives Marshall's basketball program national recognition. Assistant coach Jim Kelly,

whom Aberdeen cited for his effort in the signing of the behemoth, said the signing makes Marshall recognizable, which will help in further recruiting.

"When compared to schools like Auburn and Florida, we were looked at like the little guys," Kelly said. "When you go to other places, Marshall is not well-known. Landing a player of his stature makes us more recognizable."

Kelly said the coaching staff has not made any conclusions as to where Jones will play and if he will start. "He will contribute a great deal," Kelly said. "We are not going after anyone if he cannot help us." Marshall's squad now consists of 10 returning players and the four recent signees.

The Herd coaching staff first became aware of the 17-year-old giant while he was attending a camp last summer in Georgia. Marshall's effort in signing the recruit was aided by Jody Soward, who was a former assistant basketball coach under Ellis Johnson here and at the time was a school principal in the Martin County school system.

"We usually don't extend ourselves that far," Kelly said. "But the coach (Aberdeen) had a good visit with him and then we worked our tail off. I think we showed him the most interest of all schools involved.

"When a big high school player is recruited, after awhile all the promises begin to wear thin," Kelly said. "The big break for us was getting him to visit and see first hand the enthusiasm the town and students showed for the program. He met people from the community and liked the feeling in the town."

Kelly said Marshall is close to signing Rautens as well. "Leo is in the same category as Charles," Kelly said. "When you battle with the big schools, it is tough to win all the wars." Rautens, who has played for the Canadian National Team and will tryout for the Canadian Olympic team, visited Marshall's campus last week.

Rautens is the last player Marshall is involved with, according to assistant coach C.J. Woollum. Rautens is expected to make a decision within the next two weeks, Woollum said.

and Organizations offices.

Student Senate president Frank Black II, St. Albans junior, proposed Senate Bill No. 20, which allocates \$300 to the office of Student Life as co-sponsors for the banquet.

Black said the allocated money will cover the costs of food and certificates of acknowledgement for the campus leaders, which include all outgoing student senators. The money is taken from the one dollar Student Government fees paid by all students at registration, he said.

Black said, although only 14 leaders attended last year's banquet, invitations have been sent to 100 guests and approximately 60-70 are expected to attend. Black added that not all the R.S.V.P.'s have been returned.

If all the 100 invited leaders attend, Black said, the banquet's cost will increase to nearly \$600. Don E. Robertson, coordinator of Student Activities and Organizations, said his office would pay any costs in excess of \$300 with funds appropriated to his office by the Board of Regents.

In an unscientific Parthenon poll, on and off-campus students were asked what they thought of the use of their one dollar Student Government fee for the Leadership Banquet.

Point Pleasant sophomore Rocky Goodnite said, "I think it's a pretty good idea." Goodnite said the leaders deserve the recognition they will receive at the banquet and "it's only a dollar."

Lee Staley, Ironton, Ohio senior, felt differently. "I'm pretty sure it (the money) could be used for better things than a banquet," Staley said. He suggested the Student Government fee funds could be used instead to establish things for students on campus, such as better facilities in the Student Center or a Student Government hotline.

"I think it's nice," Charleston sophomore Lanette Lewis said of the banquet, "because if they (the leaders) put in time, they should be recognized." Lewis also said campus officers need incentive for holding •their offices and that her one dollar fee was being well spent.

Ronando Holland, Bluefield sophomore, also thinks the banquet is a good idea. "I think you need to do something to encourage students to participate and run for leadership positions," Holland said.

Listening key to dealing with bereaved **By DIANE SLAUGHTER**

Staff Writer

Listening. That is the key to dealing with terminal patients and with those who have recently lost someone close to them, such as a roommate, according to Dr. William A. McDowell, associate professor of counseling and rehabilitation.

Although listening is the key to dealing with these groups of people. McDowell said, there is a difference between the two. "We're dealing in a difference between anticipated loss and sudden death. They do have vastly different affects. In fact, terminal patients can even experience anticipatory grief," he explained.

Some of the grief patterns exhibited differ for sudden death and the death of a terminally ill patient. although many of the patterns overlap, McDowell said. He went on to describe several of the patterns.

In the case of a sudden death, the first reaction is often one of shock and disbelief. There is a refusal to comprehend the fact of the death, which can have some positive effects, McDowell said. "This denial serves a positive purpose because it is often a comforting partial amnesia. At that point we probably couldn't face the force of the full shock," he said.

"People begin asking why the doctor let that patient die, or why God allowed the life of such a good person to be taken," said Dr. William A. McDowell, associate professor of counseling and rehabilitation.

The next pattern, especially in the event of sudden death, is a developed awareness of various emotions. The emotions might include anger, rage, and a flood of tears, according to McDowell. Especially if the deceased was a younger person, the mourners will tend to resent other young people who are still alive. he added.

Depression is a pattern common to both

groups of survivors. They may feel washed out and isolated for several weeks or even months, McDowell said. "You can't dislodge the mourner's investment in the deceased. If this is done too early, the therapeutic value

to be gained from talking with them will be lost," he explained.

McDowell described the two types of depression mourners may feel following a death. The first, preparatory depression, is most common in the case of a terminal illness. The survivor has a future orientation to the depression and is often quiet and reflective.

The second type of depression, reactive depression, focuses attention on the past and the mourner is likely to be mournful and regretful, thinking, "If only things had been different," McDowell said. Both types of depression may be characterized by sleeplessness, headaches, and nervous conditions, he added.

Another pattern of grief shown by both types of mourners is that of anxiety or even panic concerning the future. He said people wonder if they will always feel the way they are feeling now concerning the deceased. They may begin to look back over their relationship with the deceased and feel a sense of guilt over things that were done or not done, McDowell said.

Intense feelings of anger and hostility may also be shown, usually directed against any professional personnel or against God, McDowell explained. "People begin asking why the doctor let that patient die, or why God allowed the life of such a good person to be taken," he continued.

He added that it usually takes alomst a full year before a death is accepted and the person once again becomes a complete and functioning human being.

Many people do not know what to say in the face of death or dying. McDowell suggests that people should be straightforward with those who have recently suffered a death near them.

"It's not up to us to make the person feel better. We should help the person deal with their loss and their feelings, instead of hiding them," he said. "If you're having grief, have it. Our responsibility is to acknowledge the reality of the death and then let them know we are there to help them deal with it and to listen to them," he continued.

McDowell's advice continued, "We must

be able to hear and accept people's feelings, fears and concerns. If you haven't come to terms with your own feelings, you can't help them with theirs. If you're uncertain or afraid, don't hide your feelings. Your struggle with these feelings can be the best show of help a person can have."

He also stressed that listening is a key to helping and understanding someone's grief. He added that the listener should help the mourner accept the death, pain, sorrow, and loneliness as real, and in this way help legitimize the mourning.

McDowell listed five blocks to communicating with a terminally ill patient. "If you want to stop communication with a terminal patient. there are five ways to do it. First, you can change the subject when they start discussing their impending death. Second, you can give your own opinion too quickly and start sounding moralistic. Third, you can give the patient inappropriate reassurance about their condition. Fourth, you can jump to conclusions or premature solutions, and fifth, you can use facts about their condition inappropriately."

These five blocks are a way to close off communication, something that should not be done, McDowell said. Once again, the key is listening and understanding.

In dealing with a terminal patient, McDowell said, the listener should want to be there to help the patient. "One of the major concerns of the terminal patient is that they will be forgotten and that they will die alone. You should assure the person that they will not be alone and that there grief is normal," McDowell explained.

He continued, "Also, don't pretend things haven't changed. They have. In many cases, the terminal patient can even help the survivor deal with their feelings." He also stressed that needs should be met as they are seen, instead of waiting for the patient to request help.

Another important aspect of dealing with a terminal patient. McDowell said, is for people to take care of themselves. "To help the patient most effectively, you must also take care of yourself. You need to get away from time to time, so that you can be fresh to help them deal with the important issues they need to take care of," McDowell added.

Reduced gas allocations could result in long lines

- The long lines and "closed" signs at gas stations that plagued many motorists at the end of April are likely to be worse in May because many oil companies have further reduced the quantity of gasoline they selli to service stations.

The companies say the cutbacks are due to tight supplies of crude oil and the government's request that they emphasize production of heating oil at the expense of gasoline production.

Oil companies have been limiting the allocations of gasoline to dealers for several months, generally to about 95 percent of the amount of gas the stations got a year ago. Demand

Gas rationing plan sought by Carter

Carter, saying "we must be prepared for the worst," urged Congress on Monday to approve his standby gasoline rationing plan

The president told a news conference that a key House committee vote on the plan is scheduled for Tuesday and he said, "I urge the members of the House Commerce Committee to place responsibility for the nation's welfare above other concerns.

"We face the possibility of gasoline shortages even as early as this summer," Carter told the nationally broadcast meeting with reporters. "Common sense tells us we must be ready.' The rationing plan suffered a

doing all we want though. We are most spots.' Randle said he expects to add a

wide receiver from North Carolina and a lineman soon with scholarships. Randle has signed 24 thus far.

"Things will be a lot tougher in the fall," Randle said. "I'm afraid "What role the freshman play we'll lose a few more people. The remains to be seen," Randle said. fall will take its toll early."

Crowd control discussed

Crowd control, tootball games and basketball play-offs were the main topics of discussion in last week's Southern Conference meeting at Saphire Valley, N.C., according to Interim Athletic Director Edward Starling.

Starling said a committee was formed to make recommendations at the June meeting on how to improve crowd control at games.

A suggestion that Starling supports was to give a trophy to the school with the best crowd control. Starling said the committee would have to establish criteria and give enough weight to the trophy so it would be considered a championship by the students of the winning school.

In other action, the athletic directors and were only eight teams in the presidents decided to keep the same basketball play-off format as last year. Starling said that with the addition of East Tennessee State to the basketball race next year, it could change the play-off schedule.

Only the top eight teams will make the playoffs, with the last place team sitting out the tournament.

Discussion was held on the possibilities of establishing a football bowl game with a predominately black school to be held in Charleston, S.C. Starling said the bowl game would be a good drawing card for the conference and might dispell any prejudices anyone might have. Among the schools mentioned were Grambling, Jacksonville and Florida A&M.

Starling said the meetings did contain a humorous sidelight. According to Starling, Western Carolina received a conference check for television rights. No one knew what to do with the check at WCU, so they put it in a bank in a 90 day holding deposit. When the check was withdrawn; it had accumulated \$6,500 in interest. It was decided at the meeting to split the interest money between the conference schools.

Green Gals divide two with Shepherd

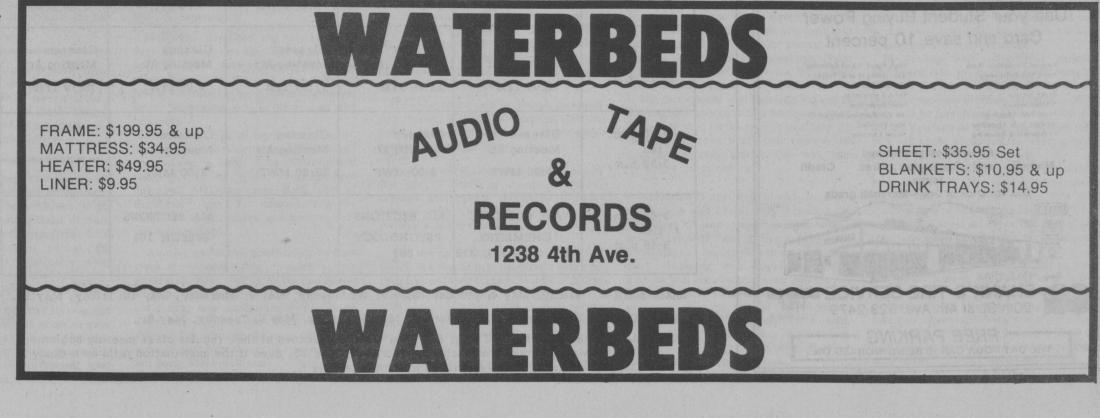

The Green Gals fast-pitch softball team split a doubleheader against Shepherd College on Saturday to give the team an 8-8 record overall. The make-up game against West Virginia University was canceled due to rain.

Shepherd defeated the Green Gals 5-3 in the opening contest. It took the Green Gals ten innings to defeat Shepherd 8-7 in the second game.

"The team played good defensive ball," Holmes said. "The team was disappointed with the loss (the first game)." Holmes said the team "played good ball both offensively and defensively."

"The psychological edge is with the team in preparation for the state tournaments this weekend," Holmes said.

The Green Gals will host Eastern Kentucky at 1:00 today and West Virginia Tech at 11:00 on Wednesday. Both games are doubleheaders and both games will be played at St. Clouds Commons
