Managers react to WMUL-CCTV split

By SCOTT K. BLOUNT Reporter

WMUL-TV and the Closed Circuit Television operation at Marshall are operating on separate management this year, with each medium concentrating on im-

The split in management came five months ago in a West Virginia Board of Regents action.

William Haley, manager of WMUL-TV, has been here since Aug. 20, and he wants to see the station increase its local production capabilities. He also says he wants to get more public participation. "This winter we're going to the public to ask for membership for those who can afford it. Up until now, the state has carried the financial

Students conduct food fight

Students living in Twin Towers have been having food fights apparently in protest of the food and the service they receive.

Beth Aquino, St. Albans freshman said, "It just kind of built up, there were rumors going around that there was going to be a food fight. Then Tuesday it started with people throwing stuff across the table at each other and then spread until about 75 people were throwing food."

Temporary manager of the cafeteria, Ron Vang called it a terrible waste of money, and said he had never seen anything like it. "When something like this happens my people have to stay at least an hour later to clean up. I am sure if the students had to clean the mess up it would not happen,"

Vang did not want to blame all the students for the outburst and said that it was only a minority that started the fight. Vang said, "If the students have acomplaint about the food or anything this is no way to resolve anything. I would like the students to get together and form a food committee so they can express their complaints and maybe we can do something about it."

Aquino said the situation was very ridiculous and a terrible mess, but if the food was not so bad they would not have to throw

James Tennant, a cook at Marshall for 25 years said "I do not think it is my food or cooking, it is too early in the year for them to be sick of the food already. If it was later in

the year I might say yes.' Many of the cafeteria personnel said there are possibilities of another food fight in the future, but they do not think the food or service should be the cause. Vang said, "It may not be like mom's cooking but then again mom does not cook for 1200 people."

Wednesday

Fair

Another fair day is in store for us with only a 10 percent chance of rain today, and a zero percent chance tonight.

The National Weather Service predicts a high of 72 degrees, with a low tonight near

Where?

Where's Marco? See Page 4 for the

burden. One of the things we have to do in Huntington is look for strong volunteer support.'

Haley further stated a need to set goals. "One of the things we need to do at this station is set our goals, and try to decide what is down the road 10 years from now.

"Public broadcasting is dynamic...viewers are up...a lot of emphasis is going to be placed on fall programming, which begins in October. We are strong in sports for Marshall, we are broadcasting most of Marshall's football and basketball games, and we may try to get more competitive in

But it all boils down to the old notion of public broadcasting, Haley said. "An alternative...whether it takes buying good national programs or improving local programming.'

The Closed Circuit Television operation on campus is an instructional service, according to Dave Giomore, the general manager of CCTV. "Closed circuit, when it works at its best, is when the professor uses it as opposed to film."

Gilmore sees two basic needs for upgrading CCTV's operation. First is technical. "Things have to be replaced or they'll stop working." Secondly, "We've

been operating primarily as a library service. We need to develop our own production capabilities and increase motivation for professors to use our services."

Gilmore said most of the problems with CCTV stem from having one manager in charge of three operations, but since the split, there have been few problems. Both Gilmore and Haley stressed that they have professional and competent staffs.

WMUL-FM was caught somewhere in the middle of the management split, but manager H. Keith Spears sees many good things in store for the radio station. Over the

summer, the station applied for a wattage increase to 176 watts, which could be approved by March. The filing has been accepted but not yet approved by the Federal Communications Commission.

The wattage increase will expand the listening area, according to Spears, to cover the entire area of Huntington. The station now covers only the immediate campus area.

"This will give us suburbs we do not presently reach, and we feel this is important to us because the majority of the students are commuters."

As for programming, Spears said, "our format right now is staying basically as it was CCTV

last year. However, gradual changes with more specialty programs are being incorporated."

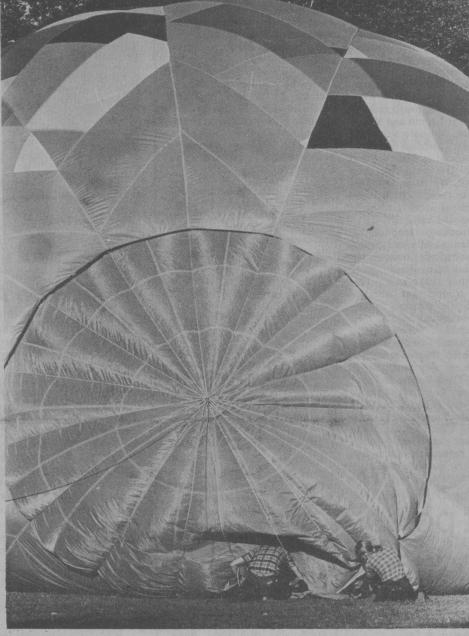

If the station wattage increases, Spears plans a more comprehensive programming schedule, with increased tempos in public and campus affairs, to make Huntington more aware of Marshall's actions and

Spears said the main problems the radio station is experiencing at this time are with technology. WMUL-FM is now in the employment process of finding an engineer, who will work for both the station and

Float, float on...

Chancellor defends BOR Accomplishments 'considerable' in ten-year period, Morton says'

Editor's note: Bob Smith, production supervisor for The Parthenon, has been studying the recent 407-page evaluation of the West Virginia Board of Regents, What follows is the second of his four-part series on the report and its recommendations.

In its ten years of existence, the accomplishments of the West Virginia State Board of Regents have been "considerable," according to Chancellor Ben L. Morton.

Among these have been: A steady increase in the amount of outside funding for state institutions which has reduced the share of the state budget for higher education from 16.8 percent to 13.5 percent in five years.

The authorization of \$206.8 million in capital improvements on state campuses, including 47 new structures.

—An increase from 37.1 percent to 48.1

percent of faculty holding doctorate degrees. These accomplishments, listed in a report prepared earlier this year entitled "Ten Year Accomplishments", have recently been used as defense against recently published "Support, Performance and Protection of Higher Education in West Virginia" document study in which a proposed replacement for

the Board of Regents is discussed

In response to this, Morton said that accomplishments in this area have been "demonstrably considerable" and that much has been done to induce specific improvements as well as smooth out differences between institutions.

In the report, the Board of Regents was criticized for its alleged lack of ability in supervision, management, and control of public institutions of higher education in this

The \$93,000 report, which was sponsored by the West Virginia Legislature, and prepared by the Academy for Educational Development of Washington, D.C., was put through its final stages by Dr. John D. Millet, executive vice president of the academy, and Andrew H. Lupton, senior vice president of the academy, according to

"The two men primarily responsible for this report, Lupton, who I am told wrote the study, and Millet, who reviewed it, are both biased against the governing board concept. Lupton has worked with coordinating boards in Indiana and New Jersey, and Millet has worked with coordinating boards in Ohio," Morton said.

"In the study they've gone farther than they needed to go, saying many things that are nothing more than undocumented statements of judgment. They've gone beyond the bottom line, and when you do that, you're just supporting your own prejudices." Morton said.

Governing boards, according to the report, are primarily responsive to the faculty, students, staff and alumni of the

schools they oversee, while coordinating boards lean more toward state education

Another criticism in the study involved state-wide comprehensive planning. It stated that the board had "an inadequate definition of state-wide higher educational needs involving all educational service sectors."

In response to this, Morton said, "It depends on what they're talking about. If they mean a big master plan detailed to the nth degree, we can't do that very well. We try to be flexible - more responsive to immediate problems.

"My feeling is that we've done an excellent job of planning. We try to be more responsive to the real facts of life. No one can predict with much certainty the future, the economy, the job situation."

members of faculty advisory committees were scared to speak against the administration, it was incorrectly written that committee members are chosen by the president, Morton said.

"As far as I know, they've always been elected by other faculty members," he said. Morton said what the Board needs most is better communication with the state

Past MU president lauds regents

A former president of Marshall University who played a major role in forming the Board of Regents now defends the governing board in light of questions raised in a recent study of the state's higher education system.

"Marshall is definitely benefiting from the BOR through allocation of funds," said Dr. Stewart Smith, president of Marshall from 1946-68. "The Board of Regents has done a very good job in my opinion."

"We felt on the Board of Higher Education," stated Smith, "that there should just be one governing board instead of the two:

The Board of Higher Education; the Board of Governors of West Virginia University."

Smith also said the reason why WVU received more funds was because there were graduates from WVU law school who were legislators. "Colleges just weren't as favored as WVU," Smith said.

Smith stated that most of the presidents of the Board of Higher Education felt the appropriations received from the legislature were inadequate. He also said, "The practice then was to give West Virginia University

half the money and the other nine institutions half."

Smith said the decision to form one state governing board was a matter discussed for many years among, college presidents. He said, "Finally, we came to the solution that if we had one board, all of the institutions would be recognized and receive appropriate allocation of funds.

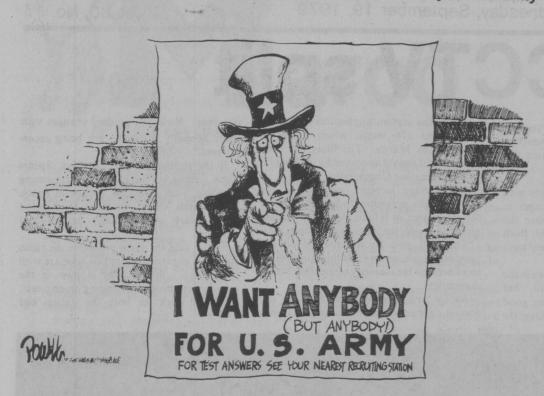

"The legislature allocated little money to Marshall," Smith said, "mainly because so many other agencies approached them for money." He also said the presidents of the

respected institutions would appear before the West Virginia House of Delegates and Legislature for money appropriations. 'Now only the chancellor approaches the legislature for funds for all the institutions,"

"When Marshall received university status in 1961, we did not immediately benefit from the status," Smith said. "As Marshall grows, it receives more financial help, and because of the university status it has developed more programs, such as the medical school and the college of business."

'Soccer defeat deceiving'

The Marshall University first year varsity soccer team dropped its record to 0-4 Monday with a 3-I loss to the Catamounts of Western Carolina at Fairfield Stadium.

Ed Saad, MU soccer coach, said that Marshall's losing record is a bit deceiving. "We have played three games in three days with only 12 men, and it takes 11 to play. The other teams we have played have had anywhere from 20-25 players." Saad said that without being able to substitute the players will tire, and other teams can bring in fresh players.

Marshall will have 20-25 players, he said, but most of the players are foreign students and are ineligible to play now because their transcripts have not been sent to Marshall yet.

When the players become eligible to play Saad said he is not expecting a miracle, but thinks the team will definitely improve. "We have much individual talent on the team. The players are very

Where, oh where has the buffalo gone? Some veteran Herd football fans may be asking themselves just that question. Where is Marco?

According to Edward M. Starling, Associate Athletic Director, Marco is the buffalo that served as Marshall's mascot since 1970, when he was purchased by Dr. A.C. Proctor and Dr. Ray Hagley to be the official mascot at the Thundering Herd football games.

Starling said Marshall was never the owner of Marco. When Proctor and Hagley died in the tragic 1970 plane crash with the football team, Marco was put into limbo while the estates were settled. Marshall continued to exhibit Marco at every home game as the physical symbol of the Thundering Herd, and then returned to his home at were settled. Marco was officially given to no one has come to get him. Camden Park, Starling said.

time. He was a welcome sight until this year. over.

Marco missed the first game against Toledo at Fairfield Stadium and when he missed the second home game against Western Carolina fans began to miss Marco.

According to Bob Burley, of Camden Park, Marco still lives at the park just as he has done for the past ten years only now he doesn't have his Saturday football games to look forward too.

During the 1978 football season Marco was the center of debate because of alleged mistreatment on the part of Camden Park Officials. However, Starling said he feels Marco wasn't being mistreated because he was being well fed and as well kept as possible by the attendants at Camden Park.

Burley said that Camden Park has been feeding and taking care of Marco for the full ten years and that the only reason he hasn't Camden Park after the game until the estates attended any of the home games is because

Starling said that it would just be too Marco became a familiar sight to all much of a hassle to find someone to go out regular football fans and a unique sight to and pick Marco up, load him into the truck anyone who might be seeing him for the first and then take him back after the game was

lub fair promotes intrig

Student groups ranging from Greeks to honorary organizations will be making themselves available for students' questions and giving out information about their specific groups in a fair this week at the Memorial Student Center Plaza.

The fair's purpose is to stimulate student interest in the many groups on campus, according to Don Robertson, director

of Student Activities. Professional clubs began Monday, followed by Greeks on Tuesday. Today is special interest day and Thursday honorary and religious organizations will be represented,

according to Robertson. About 20 groups will set up information stands from 11 a.m. to 1 p.m. each day on the Plaza. Group members will be on hand to recruit students and familiarize

them with their activities and any expenses involved.

The fair will include a performance on the plaza Wednesday at noon by the Marshall Dance Club, according to Robertson, outdoor movie,"Woodstock," Friday at 7:30 p.m.

Monday at noon the Locomotion Circus will feature gymnistsclowns, also on the plaza.

Hayes to review faculty evaluation

A new plan for faculty evaluation may be sent to the president in the next few weeks, according to Dr. Harold Murphy, head of the Faculty Personnel Committee.

The plan, developed by the former President of Academic Affairs, Dr. Noel J. Richards, allows students to evaluate faculty as well as faculty to examine their peers.

"This plan provides data for a more effective evaluation as to whether a faculty member deserves a promotion or salary increase," according to Dr. Paul D. Stewart, chairman of the task force.

This process is not new, Stewart said. The only difference between the evaluation process and the task force plan is data provided by students and faculty that goes into the evaluation, he said. "Through this process, figures will be used to evaluate every

Stewart, associate vice president for Academic Affairs and dean of graduate school, said, "It may take a year for this plan to be put into effect. It took a year to devise it."

"Critics of this plan say that we don't have much of an evaluation because a raise is given by the Board of Regents whether the instructor is good or not," said Stewart. "Raises are not given on merit but on rank and degrees." Another criticism is that the evaluation's are good if they help the instructor improve his teaching, but not if done only for a pay raise, Stewart said.

According to William E. Coffey, president of the American Association of University Professors, "The soul means of any evaluation is judging the professors worth." "Feedback is very important to professors," he said.
