MU discloses consumer information online

By JESSICA PATTerson
The Consumer Information and Disclosure for Marshall University has been released online.

Michael McGuffey, director of institutional research and planning, said the disclosure includes information the university is required to provide to students, faculty and the public and information the university feels students and faculty need to know to make an informed decision about certain aspects of their time at Marshall.

“What we’ve done is gathered all of these individual pieces of information into a single webpage where you can get to any of the information we’re required to provide to students,” McGuffey said.

McGuffey’s office sent an email about the Consumer Information and Disclosure to students and faculty this past week.

Kathy Blake, director of student financial assistance at Marshall, said the disclosure is required of all institutions that participate in Title IV federal student aid programs.

“The idea is that you’re giving specifically all financial aid, that you’re giving information about institutional aid—what you have to offer, and what you’re offering for every student over every single award,” Blake said.

The information in the disclosure includes financial aid, retention rates, student body diversity, textbook requirements, crime statistics, completion and graduation rates, and transfer out rates and several other reports.

Blake said she thinks the website is a lot of information, but it is the Higher Education Opportunity Act required.

“We have to put it all on there to make sure we don’t miss something that people might be interested it,” Blake said. “The information is really just to help the student and the student might not even care about it, and we do not have a choice in the matter. We’re required to do this piece of information.”

McGuffey said the university does not always have to add the current amount of information.

“We’ve always had to put it in originally,” McGuffey said. “We have the discretion to put the information up, but the department is lead in by the Secretary of State.”

The SRC staff wants students to be aware of their financial aid.

Sarah Craig, resources specialist, said the event is discussion based with some activities based on student interests.

“I usually ask the group of students that attends these events what they are most interested in learning about and then focus my presentation on that topic,” Craig said.

“Some topics include creating a spending plan, understanding credit and credit cards, savings and loans and understanding student loans.”

The SRC staff wants students to attend their finance sessions.

Craig said the SRC realized students make decisions without knowing why they make the choices.

“We want students to have the knowledge they need to make the right choices about their financial aid even beyond the time they are at Marshall University,” Craig said.

The SRC can be contacted at parthenon@marshall.edu.

SRC sponsors ‘Money, Money, Money’ event

THE PARTHENON

It is a stereotype that college students tend to not have a lot of money. Therefore, it is important for them to learn how to manage the money they do have.

“Money, Money, Money,” an event focused on providing Marshall University students with financial instruction, is sponsored by the Marshall University Student Resource Center. Located on the second floor of the Memorial Student Center, the event will offer two sessions Wednesday at noon and 2 p.m.

Sarah Craig, resource specialist, said the event is discussion based with some activities based on student interests.

“I usually ask the group of students that attend what they are most interested in learning about and then focus my presentation on that topic area,” Craig said.

“Some topic areas include creating a spending plan, understanding credit and credit cards, savings and loans and understanding student loans.”

The SRC staff wants students to attend their finance sessions.

Craig said the SRC realized students make decisions without knowing why they make the choices.

“We want students to have the knowledge they need to make the right choices about their financial aid even beyond the time they are at Marshall University,” Craig said.

The SRC can be contacted at parthenon@marshall.edu.

US, Afghan officials at odds over fate of military bases

By SHAHIN BAHRAIMI

TEHRAN WASHINGTON BUREAU [AP]

Late last year, before leaving Washington to lead the NATO coalition against the Taliban, Assistant Secretary of Defense for International Security Affairs Ariel Goldsmith said that coalition forces were too hasty to tear down facilities in Afghanistan.

"It’s the American symbol of the peace dividend," he said. "It’s symbol of the American war in Afghanistan.

The American withdrawal and the Taliban’s resistance to the coalition forces have been too challenging to sustain given Afghanistan’s political instability and the Afghans’ “instinct was, and it is, to keep these bases or to at least keep the structures,” he said. "The challenge will be to hand them over.

The Afghans’ "instinct was, and it is, to keep these bases or to at least keep the structures," he said. "The challenge will be to hand them over, but that is not easy."

The United States has spent more than $5 billion on training, housing and equipping a force of Afghan soldiers and police that’s expected to reach a combined strength of 352,000. It was expected to transfer 11,000 troops to Afghan control by the end of 2014.

For some Afghan politicians, the logistics they will leave the Taliban with far fewer forces and far less frequent American soldiers and police and with problems often has been disunited, so do not hesitate at all.

"Even if these bases are not a symbol of the American war, it will be a hard task to hand them over," he said.

"They can continue to serve a security benefit," said Ameen Raza, a security official involved in the talks. "Even if these bases are redeveloped, they can be a security benefit for others to be converted to other purposes.

The conclusion was that coalition forces should be determined to hand over a joint NATO-Afghan commission on bases closure. The group was established last year after Afghan officials said that coalition forces had distrusted an unknown number of military personnel from the United States.

"We hope, as we go forward, to make sure that no American bases are destroyed at all," he said. As of Feb. 1, the U.S. military had turned over 376 check points, camps, bases and other facilities to the Afghan government as it continued to manage and control 243 other sites. The disposition of 194 other bases includes, among the most long-term ones, will be determined in negotiations that could stretch into 2014. Most of the bases that survive will retain security facilities, Afghan officials said, while plans call for others to be converted to other purposes.

The latest announcement was made at a media day at Texas Motor Speedway, where drivers, including Tony Stewart, Ron Fellows and Jamie McMurray, speak to the media and drivers.

"The NRA sponsored a NASCAR race this weekend to honor that," said NRA Board Chairman Oliver North.

The question of whether there will be a new pope by Easter, which this year falls on March 31, U.S. Catholic bishops said today, will be an important factor in the decision. The conclave can start as early as March 15 if there is no apparent successor.

"We are looking for the one who will be the new Pope," said one bishop. "We need a new man and equip given their personal commitment to the United States, or European charm."

Biden, speaking to supporters of the Obama administration’s policy of the United States, or European charm."

Men’s basketball set for Senior Night

By KYLE GIBSON
The Patron

The Cam Henderson Center will see Dennis Tinnon, Nigel Spikes and Robert Goff get the final chance to compete as seniors in a home game on Senior Night against Conference USA foe Southern Miss. The Herd is coming off a 110-76 loss to Houston on Saturday and currently stands at 12-17 overall record and 5-9 conference record. Southern Miss has won 4 of its last 5 games and is ranked 2 in the C-USA championship. The result from the first meeting between the two this season saw the Herd lose in overtime. The Golden Eagles beat Marshall 105-104 in Charlottesville, Va., on Jan. 11, 2012. Rebounding is a nature that is important for the team. Dennis Tinnon has been and will be essential for his seniors getting to Marshall. His formative years at Marshall helped him to get a lot of experience before he moved on to bigger and better things. "There’s been a lot of growth that’s gone on these past four years," Spikes said. "I’ve been able to contribute through it all, but it’s been good and I didn’t want it to be bad."

Dennis Tinnon transferred from junior college and won a second pair of eligibility with Marshall from the NCAA over last season. Tinnon and Spikes are proud to be a part of Marshall’s success over the past two years and want more of his time remaining. "It was exciting to know that I helped people play a role to help get us there. "Tinnon said. "We’re struggling this year, but I think we still have a chance to get there and I’m going to do anything in my heart and my mind to help us get there. Get us 3 or 4 games in a row to get in the championship game and beat whoever we need to beat to win." Robert Goff was a fellow junior college transfer, joining the team along with Tinnon last season. Goff said that the emotions will be running high when he takes the floor tomorrow. "There are going to be a lot of emotions," Goff said. "I’ve been trying not to cry, but it means a lot to me." Goff also said that he never really replaced college basketball as part of his future. "Growing up in Illinois, I never thought I’d play in college, ever. So, just being able to graduate is an accomplishment for me," Goff said. "It was exciting to know that I helped people play a role to help get us there. "Tinnon said. "Growing up in Illinois, I never thought I’d play in college, ever. So, just being able to graduate is an accomplishment for me," Goff said. Spikes is the only member of the 2013 senior class that has spent his entire college career with the Herd. The Fort Lauderdale, Fla., native sat out the 2008-2009 season. Goff said that the emotional part of his senior season getting to Marshall was completely different for each. "They all had to take different paths and roads just getting here and then since they’ve been here their paths have been very different," Horton said. "Marshall is led in scoring by the combination of Elijah Primes and Dantana Kerns, who average 16 and 13 points per game, respectively. Dwayne Denis leads Southern Miss in scoring with 14 points per game, but the team is led in minutes and assists by guard Neil Watson. "The game will be sitting on CBS Sports Network, which moves the game from the usual Wednesday night slot. Tip-off of senior night is set for 7 p.m. in the Cam Henderson Center. Kyle Gibson can be contacted at gibson210@marshall.edu.
Late last week, Barnes & Noble announced how much Nook owners have spent on e-books so far in 2013. So far, Nook purchases have declined 26 percent from the same period last year, and the sales of the Nook are also declining. This is due to the rising popularity of tablets.

The e-reader was initially released in 2010, and was the front runner for the exploding popularity of the new technology. Most tablets offer e-reader apps, allowing users to have an e-reader at their fingertips along with a miniature computer. The Nook and Amazon Kindle are among the most popular e-readers, but that is not stopping Apple and Android from releasing tablets that perform the same functions as an e-reader — plus more.

Because of the barriers that pre-
duce e-readers also release apps for smartphones and tablets doing the same functions as the e-reader itself, it makes the idea of a tablet that does more than move your device, that does not allow users to read books electronically. E-readers seem to be slowly dying because of the rising popularity of tablets, which could be argued as a positive thing for those who are partisans when it comes to books.

Books are a gem. Physical books are America — and, surprisingly, may be able to be used to extend his state's early voting period. The president has to wait more than an hour to have no excuse not to do it.

While we have the technology to add 50 million citizens eligible to the rolls while improving accuracy and security. Citizens could register online or paperlessly with public and private agencies. Their registra-

By WENDY WEISER (MC)

After the State of the Union, the big question remains: Can Congress, Democrats and Republicans put aside partisan politics to address the most pressing issue of the day — making sure everyone could have the opportunity to vote. More Americans toil under the disfranchise of 19th-century paper-based systems that are inefficient and rife with errors.

The Pew Center on the States found that one in five eligible citizens is not on the rolls, and one in eight registration record has erroneous errors. When poll workers have access to a paper to find names that have been misspelled or included at the wrong address, long lines are a requirement. In 2008, up to 3 million citizens tried to vote but could not vote due to registration problems while, and to ensure no eligible voter is

Apple loses title of most valuable company to Exxon

BY JEREMY J. GOWNS

Shares of Exxon Mobil Corp. have passed Apple Inc., making it the most valuable company in terms of market capitalization.

In Monday’s trading session, Exxon’s shares climbed 2.4 percent to about $42.50, giving the company a market capitalization of $448.8 billion, or a total value of all available shares. Shares of Exxon Mobil Corp. have passed Apple Inc., making it the most valuable company in terms of market capitalization.

SEASON

Continued from Page 1

This will be the first year the information session has been given.

“We encourage any student who is considering an international formation or who is very intrigued by a career in for- eign affairs to attend the information session,” Stoler said. “There will be no rush to ask questions and answers after the session; everyone should feel free to ask for more information if they think they might be interested.”

Stoler said that more information on the students’ future, the better equipped they are to de- cide if a particular career might be right for them. The international affairs information session will be held in the Memorial Student Center, “Room 180,” on Tuesday, February 26.
