**Addiction documentary screening opened to the public Thursday**

**By RACHAEL ROBBINS THE PARTHENON**

Marshall University students and Huntington community members have the opportunity to attend a free screening of the original documentary, “The Anonymous People.”

“The Anonymous People” is a film that highlights the stigma surrounding addiction and promotes a system that supports recovery and denounces criminalization of the problem.

“This film is not your typical documentary about addiction. It’s a story often seen on reality television or in the news,” Greg Williams, the film’s producer, said in a press release. “There are no caricatures or one-dimensional people, pictures of the brain or fried eggs in a pan. This film is about the answer to the very fundamental question: Why don’t we treat addiction in the same way we treat other issues?”

**We set out to find the answer to one very fundamental question:** Why don’t we treat addiction in the same way we treat other health issues?

**MU soccer alum stars player development business**

**By KYLEE MCMULLEN THE PARTHENON**

Kyle Sniatecki, a former Marshall University soccer player and alumnus from Buffalo, N.Y., recently started his own business called Soccer by Sniatecki, LLC.

Sniatecki has been playing soccer since he was 6 years old. Growing up, he played on various premier club teams in New York and was part of the Olym- pic Development Program that gave him opportunities to play in Austria, England, Germany, Ireland and Scotland.

ODP led to exposure to college coaches that gave Sniatecki the opportunity to represent the ThunderCats on the soccer field. He served as co- captain, senior year and starter all four years.

Sniatecki said the idea to start a business came after much thought, prayer and dis- cussion with close friends and family members. Everything pointed to his true passion.

“By the time I finished with Marshall, I was 23 years old and ready to start a business of my own,” Sniatecki said.

“After being with the ThunderCats for four years and gaining some valuable contacts that even if the companies are not hiring right now, they are for the future, the student has a way to keep in touch with them,”

Chris Naper, a graduating senior health studies major, attended the expo to find a career he can have with his family.

“I appreciate Marshall giving us a chance to be able to come here and they actually look- ing out for us for our future,” Naper said. “Not to just get you, but actually want you to study and give back to the community that makes Marshall happen.”

During the event, Career Services offered students the opportunity to have a professional photograph taken for their LinkedIn accounts.

Particularly with seniors, it is important they build a LinkedIn profile, because it is a networking tool like no other,” Stoler said. “It reaches everyone, so we’re trying to help them with a professional-looking photo.”

Sara James, a Cabell Huntington County resident, attended the expo to help stu- dents learn how to apply for a job with the hospital.

“We want people to think of us first whenever they are out seeking jobs,” James said. “We want to tell them about our company and this wonderful hospital that we have in our area.”

**Students, recruiters meet at Career Expo**

**By JESSICA ROSS THE PARTHENON**

Career Services had its annual Spring Career Expo Wednesday in the Don Morris Room of the Memorial Student Center.

Area businesses were recruiting for part-time, full-time and internship positions in a variety of areas, such as customer service, healthcare, retail management, media sales, insurance, marketing and engineering.

“One of the things that are great about networking is to get to know of several hundred stu- dents at one time,” Debbi Nieder, the assistant director for develop- ment and outreach at Career Services, said. “If I am at one of these accepting resumes and can kind of build a pool of applicants for present and future use, so it really benefits them, as well as being able to network with the students.”

The companies gave out business cards, brochures and other information about their companies to the students who attended.

“This gives students a great opportunity to network with a lot of different companies and most recruiters that they might not have been able to,” Sniatecki said. “They’re the ones that give them just some valuable contacts that even if the companies are not hiring right now, they are for the future, the student has a way to keep in touch with them.”

Chris Naper, a graduating senior health studies major, attended the expo to find a career he can have with his family.

“I appreciate Marshall giving us a chance to be able to come here and they actually look- ing out for us for our future,” Naper said. “Not to just get you, but actually want you to study and give back to the community that makes Marshall happen.”

**Spring brings chance of late week severe weather**

**By MEGAN OSBORNE THE PARTHENON**

The possibility of late week- end thunderstorms could potentially lead to severe weather and flooding, according to the National Oceanic and Atmospheric Administration.

Thursday, in zones B5 and B5 of the Memorial Student Center.

“We set out to find the answer to one very fundamental question:** Why don’t we treat addiction in the same way we treat other health issues?”

Supreme Court says political donors can spread wealth much wider

By MICHAEL DOTTE

The Supreme Court on Wednesday further opened up the tops of political campaign programs with a 5-4 decision that removes longstanding limits on how much money an individual can contribute to political candidates and committees.

The decision means a wealthy individual could start contributing more than $5.5 million to parties and committees and candidates over two years.

“They ... would intrude without justification on a citizen’s ability to participate in the exercise of the most fundamental First Amendment activities,” Chief Justice John Roberts Jr. wrote in sum of the court’s opinion.

The decision was 5-4 in a split that would be difficult to predict for the two-year election cycle. Roberts’ 4-page opinion, joined by Justice Anthony Kennedy, conservative justices, continua...

The high price of free speech

By BOB RAY SANDERS
FORT WORTH STAR-TELEGRAM (MCT)

For some time I've wondered how the First Amendment — like an incorruptible Court — works to defend us. But it would have been more than un-
insured people it would have helped already — if certain powerful politicians level this country more than they have in the past. I don't use the word "an-
noyance" hyperbolically. I honestly believe that the hearings in Washington and state "leaders" have tossed President Barack Obama's political agenda beyond simply dampening or reinvigorating it; he seems to be the appropriate word.

Yet, I’m here to argue that something is being done to the betterment of this country and people. Obama has come to the conclusion that this is the appropriate word. He
doesn't have to worry about the current
time, the law was to be the

The Constitution of the United States, the nation’s fundamental law, is the supreme law of the land. It establishes the national government, defines the power and limitations of government, and sets forth the basic rights and liberties of the people. The Constitution is the foundation of American society and is the basis for all laws and actions of the federal government.

The national economy is a complex system of individual and institutional actors. The economy is characterized by the interdependence of supply and demand, the role of government, and the importance of market mechanisms. The economy is driven by the forces of supply and demand, which are influenced by a range of factors, including consumer behavior, government policies, and technological change. The economy is also subject to economic cycles, which are characterized by periods of growth, recession, and recovery.

The environment is a complex system of interactions between living organisms and their physical and chemical surroundings. The environment is characterized by the interdependence of living organisms and their physical and chemical surroundings. The environment is driven by the forces of natural processes, which are influenced by a range of factors, including climate, geography, and human activities. The environment is also subject to environmental cycles, which are characterized by periods of change, stability, and restoration.

The political system is a complex system of institutions and processes that govern the allocation of power and resources in a society. The political system is characterized by the interdependence of political actors and their social and institutional environments. The political system is driven by the forces of political competition, which are influenced by a range of factors, including the distribution of power, the role of government, and the importance of market mechanisms. The political system is also subject to political cycles, which are characterized by periods of stability, change, and transition.

The social system is a complex system of interactions between individuals and their social and institutional environments. The social system is characterized by the interdependence of social actors and their cognitive, social, and institutional environments. The social system is driven by the forces of social interaction, which are influenced by a range of factors, including culture, social norms, and social institutions. The social system is also subject to social cycles, which are characterized by periods of stability, change, and transition.
